

TAHOE METROPOLITAN PLANNING ORGANIZATION

FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM

Revised January 23, 2013

ABSTRACT

Title: Tahoe Metropolitan Planning Organization

2013 Federal Transportation Improvement Program

Author: Tahoe Metropolitan Planning Organization

Subject: Transportation Program of Projects

October 2012 through September 2016

Date: Tahoe Metropolitan Planning Organization Governing Board

Adoption Date: September 26, 2012 Revised Date: January 23, 2013

Source of Copies: Tahoe Regional Planning Agency

Tahoe Metropolitan Planning Organization

128 Market Street Stateline, NV 89449 www.tahoempo.org

Abstract: The 2013 Federal Transportation Improvement Program for the Lake Tahoe

Basin is a four-year program consisting of projects for highway, transit, bicycle, and pedestrian projects. The projects are recommended for various stages of development during the program period. The project listings include the location and description of proposed work, the project cost, the anticipated

funding sources, and the scheduled year of work.

Local Use
Guidelines:

State and federal regulations mandate the development of the Federal Transportation Improvement Program. Local agencies and transportation

operators must have their major projects approved in the Federal

Transportation Improvement Program to qualify for most categories of state

and federal transportation funding.

TAHOE METROPOLITAN PLANNING ORGANIZATION TMPO RESOLUTION NO. 2013 - 01

REVISED 2013-2016 FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM FOR THE LAKE TAHOE REGION

WHEREAS, The Tahoe Metropolitan Planning Organization (TMPO) is the designated planning organization for the Lake Tahoe Basin as defined by the Transportation Equity Act for the $21^{\rm st}$ Century; and

WHEREAS, the 2013 TMPO Federal Transportation Improvement Program (FTIP) has been developed and maintained in accordance with Moving Ahead for Progress in the 21st Century; and

WHEREAS, the Federal Clean Air Act Amendments require that no department, agency, or instrumentality of the Federal Government shall engage in, support in any way or provide financial assistance for, license or permit, or approve an activity which does not conform to an implementation plan approved or promulgated under Section 110; and

WHEREAS, no metropolitan planning organization designated under Title 23 of the U.S. Code shall give its approval to any project, program or plan which does not conform to an implementation plan approved or promulgated under Section 110; and

WHEREAS, the 2013 FTIP meets all applicable transportation planning requirements per Title 23 CFR Part 450; and

WHEREAS, the assurance of conformity to an implementation plan is the affirmative responsibility of the Tahoe Metropolitan Planning Organization; and

WHEREAS, the 2012 Regional Transportation Plan (RTP) for the Lake Tahoe Basin describes a transportation system envisioned for the horizon years and was adopted as a financially constrained plan by the TMPO Governing Board on December 12, 2012; and

WHEREAS, the 2013 FTIP is consistent with the transportation system and financial plan described in the 2012 RTP; and

WHEREAS, the 2013 FTIP meets Air Quality Conformity requirements; and

WHEREAS, the 2013 FTIP is financially constrained by year and includes a financial plan that demonstrates which projects can be implemented using committed funds; and

WHEREAS, the 2013 FTIP includes all regionally significant transportation projects to be funded from local, state or federal resources; and

WHEREAS, the 2013 FTIP has been developed under TMPO policies for community input and interagency consultation procedures; and

WHEREAS, the 2013 FTIP does not interfere with the timely implementation of the Transportation Control Measures contained in the State Implementation Plan.

NOW, THEREFORE, BE IT RESOLVED, that the Governing Board of the Tahoe Metropolitan Planning Organization adopts this resolution approving the Revised 2013 Federal Transportation Improvement Program for the Lake Tahoe Region.

BE IT FURTHER RESOLVED, that TMPO staff is hereby directed and authorized to work with Caltrans, the Nevada Department of Transportation, the Federal Highway Administration, the Federal Transit Administration and the Environmental Protection Agency to make whatever technical changes or corrections are needed to the format and organization of the document to obtain its approval by these agencies.

BE IT FURTHER RESOLVED, that the TMPO Board authorizes its staff to administratively amend the 2013 FTIP as outlined in the Public Input and Project Selection Procedures outlined in the 2013 FTIP.

PASSED AND ADOPTED by the Governing Board of the Tahoe Metropolitan Planning Organization at its regular meeting held on January 23, 2013, by the following vote:

Ayes: Ms. Aldean, Mr. Beyer, Ms. Berkbigler, Mr. Cashman, Mr. Cole, Mr. High, Ms. McDermid, Ms. Reedy, Mr. Robinson, Ms. Santiago, Mr. Sevison, Mr. Shute

Shelly Aldean, Chair TMPO Governing Board

1.0 WHAT IS THE FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM (FTIP)?

The 2013 Federal Transportation Improvement Program for the Lake Tahoe Region is a four-year program of surface transportation projects for the Tahoe Metropolitan Planning Organization (TMPO) that is consistent with the Tahoe Regional Transportation Plan (RTP) and related local, state, and federal planning processes. The FTIP is prepared by the TMPO in accordance with the TMPO Public Participation Plan and through cooperation with California Department of Transportation (Caltrans), Nevada Department of Transportation (NDOT), Federal Highway Administration (FHWA), Federal Transit Administration (FTA), local transit operators, local agencies, and the general public. The FTIP is a primary feature of TMPO's continuing, cooperative, and comprehensive transportation planning and programming process. Input and coordination is sought and obtained at all levels.

The current federal transportation bill known as the Safe, Accountable, Flexible, Transportation Efficiency Act: A Legacy for Users (SAFETEA-LU) was enacted into law in 2005 and has been extended through March 31, 2012. *This bill is due to expire on March 31, 2012 and a clear successive transportation funding bill is still under debate. This document has been developed in accordance with the United States Department of Transportation's metropolitan planning regulations 23 Code of Federal Regulations Part 450. SAFETEA-LU requires all transportation projects that are regionally significant, federally funded, or requiring a federal action to be incorporated into the FTIP. According to SAFETEA-LU requirements, the FTIP must be updated at least every four years, cover a programming period of not less than four years and contain a priority list of projects grouped by year. This document covers federal fiscal years 2013 through 2016. The FTIP must be financially constrained by year, meaning that the amount of dollars committed to the projects must not exceed the amount of dollars estimated to be available and include sufficient financial information to demonstrate that projects can be funded as programmed. Funding shown in the first two years of the FTIP is available and committed. Funding shown in the third and fourth years is reasonably expected to be available. Funding shown after the fourth year is exhibited for information only.

The 2013 FTIP identifies a total of \$358,566,000 in revenue that supports new and existing transportation projects along with the operation and maintenance of the current transportation system in the Tahoe Region. The revenue is provided through local (12%), state (57%), federal transit (10%), and federal highway (21%) funds. See table below for break down per fiscal year. (Refer to Appendix A for Financial Summary.)

2013 FTIP Revenue	x1000's				
	2012/13	2013/14	2014/15	2015/16	Total
Local	\$19,495	\$9,311	\$10,852	\$3,160	\$42,818
State	\$70,353	\$111,560	\$22,968	\$0	\$204,881
Federal Transit	\$7,051	\$24,254	\$2,857	\$2,860	\$37,022
Federal Highway	\$6,865	\$2,360	\$63,910	\$710	\$73,845
Total	\$103,764	\$147,485	\$100,587	\$6,730	\$358,566

^{*}On July 6, 2012, the new federal transportation bill "Moving Ahead for Progress in the 21st Century" (MAP-21) was signed into law. MAP-21 is a two-year bill commencing October 01, 2012 and will expire on September 30, 2014.

2.0 SETTING

The Lake Tahoe Region is located on the border of the states of California and Nevada, between the Sierra Crest and the Carson Range. Approximately two-thirds of the Region is located in California and

one-third within Nevada. The Tahoe Region contains an area of about 501 square miles, of which approximately 191 square miles comprise the surface waters of Lake Tahoe. Lake Tahoe dominates the features of the Region and is the primary focus of local environmental regulations to protect its exceptional water clarity. Nearly 85 percent of the land area in the Lake Tahoe Basin is publicly owned and represents a major recreation attraction.

The communities of the Lake Tahoe Region span five counties, two states, and one incorporated city. Located within the California portion of the Tahoe Region is the incorporated City of South Lake Tahoe, and portions of El Dorado County and Placer County. This part of the Region is within the fourth Congressional Districts of California. The Nevada portion of the Region contains portions of Carson City, Douglas County, and Washoe County. Based on the 2010 Census, the resident population of the Tahoe Region was approximately 54,862. This is a rather significant decline from the 62,894 population estimated by the 2000 census. This population decline has occurred more or less evenly in the North Shore and the South Shore, with each decreasing in population by about 13 percent. Of the 54,862 population, 41,176 people reside within the California portion, while the Nevada side of the Tahoe Region, portions of Washoe County, Douglas County, and the rural area of Carson City make up the remaining 13,686 in population.

Lake Tahoe and the surrounding areas provide a major recreational opportunity for residents of the surrounding states. The primary market for recreation at Lake Tahoe is from northern California, primarily the Sacramento and San Francisco Bay Area. Destination visitors to the Region arriving via Reno Tahoe International and Sacramento International Airports have increased over the past 10 years, however the recent periods of decline are attributable to global economic conditions.

Serving the resident and visitor populations are public and private fixed route transit, shuttles, trolleys, demand-responsive services, air transportation via the South Lake Tahoe Airport, and a local and regional highway network. There are seven access points to the Basin from outside the Region. A variety of state route segments encircle the Lake. The most important of these are the three major roads that ring Lake Tahoe: US Highway 50; Nevada State Route 28; and California State Route 89. These three roads connect community centers around Lake Tahoe to each other, and serve as the principal links to outside regions in both states. In addition to their important role as regional connectors, these roads serve as the 'main streets' of the region's largest community areas. Intersecting and supplementing these regional roadways are 619 miles of local streets. These local routes include a range of facility types from urban-style arterial streets and roadways in South Lake Tahoe, California and Stateline, Nevada with sidewalks and bicycle facilities, to rural county roads outside of urban centers. Public transit is provided on the north shore by Tahoe Area Regional Transit, which is operated by Placer County. Transit on the south shore is provided by BlueGO, a service of the Tahoe Transportation District, which has incorporated a variety of public and private services, including fixed route and demand response transit, as well as neighborhood and ski shuttle services. North Lake Tahoe Express and the South Tahoe Express provide shuttle service to the Reno Tahoe International Airport. Both the North and South Shores are additionally served by visitor trolleys, ski and rafting shuttle services, special event shuttles, and others funded by a combination of public and private funds.

3.0 TAHOE BASIN TRANSPORTATION PLANNING/PROGRAMMING STRUCTURE

The Lake Tahoe Region holds federal, state, and local transportation planning authorities that do not always align due to various timing, institutional, and policy limitations. The Region's planning complexity requires the utmost coordination and collaboration among transportation and land use

planning partners. The following section will attempt to describe some of the transportation planning authorities that are applicable for regional transportation planning, and a brief description of the transportation-related entities that have a role in the policy or technical decision-making process.

3.1 Tahoe Regional Planning Agency

The Tahoe Regional Planning Agency (TRPA) was created by P.L. 96-551 and is governed by a fourteen member Governing Board, with a non-voting federal representative serving as the fifteenth member. Each state has seven representatives, including one representative from each local jurisdiction. TRPA is unique because of its regional bi-state responsibilities under the Lake Tahoe Planning Compact for land use planning, transportation planning, project review and approval, enforcement of TRPA ordinances, and the achievement of environmental goals.

3.2 Tahoe Metropolitan Planning Organization

The Tahoe Metropolitan Planning Organization (TMPO), created in 1999, is responsible as the forum for taking the required actions under federal regulations regarding metropolitan planning organizations. The TMPO defined area is concurrent with that of the TRPA. The TMPO Board of Directors is comprised of the fourteen voting members of the TRPA Governing Board, and a voting representative of the United States Forest Service, Lake Tahoe Basin Management Unit (USFS). The TMPO voted to provide that the Chair and Vice-Chair of the TRPA serve as Chair and Vice-Chair of the TMPO unless the TMPO votes otherwise.

TMPO meetings are held during the TRPA meetings, so notices and agendas are mailed at the same time. The TRPA Board must adjourn and the TMPO Board then convenes after being joined by the USFS representative. Once TMPO actions are taken, the TMPO adjourns and the TRPA reconvenes without the USFS representative.

It is important to note that these two policy bodies, although they embody many of the same individuals, have diverse responsibilities. The TRPA's overriding obligation is adherence to the Compact, including attaining and maintaining environmental thresholds. The TMPO's mission, on the other hand, is to provide policy decisions on transportation plans and programs. In many circumstances these two differences will be minor, while in some cases conflicting philosophies may develop.

3.3 Regional Transportation Planning Agency (California Only)

TRPA is statutorily designated by the State of California as a Regional Transportation Planning Agency (RTPA) for the Tahoe Region. As an RTPA, TRPA must fulfill various statutory requirements, including those of the Transportation Development Act, coordination with Caltrans on the development of Regional Transportation Plans and Regional Transportation Improvement Programs, and other project related activities. The TRPA Governing Board indicates that it is sitting as the RTPA when taking a policy action, but no change to the membership of the TRPA Governing Board occurs.

3.4 Tahoe Transportation District

Established under Article IX of the TRPA Bi-State Compact (PL-96-551), the Tahoe Transportation District (TTD) has the authority to own and operate public transportation systems and to issue transportation bonds to pay for transit services in the Basin. The TTD is responsible for the implementation of transportation plans, programs and projects. The TTD Board of Directors is comprised of representatives from the counties within the Region and the City of South Lake Tahoe, the private sector, South Shore and Truckee – North Tahoe Transportation Management Associations, transit providers and special transit districts formed under California law. The California Department of Transportation and the Nevada Department of Transportation each have a non-voting member on the

Board of Directors. TTD and TMPO work together closely to plan investments in transportation infrastructure and transit service.

3.5 Tahoe Transportation Commission

To ensure a collaborative venue for transportation planning, the TMPO established the Tahoe Transportation Commission (TTC) to review and discuss transportation plans, programs, and projects prior to making its recommendations to the policy board. The TTC provides an opportunity for coordinated technical review and public involvement with transportation related issues. The TTC is comprised of the voting membership of the TTD, with additional representatives from the Washoe Tribe of CA and NV, USFS and the TRPA Advisory Planning Commission.

3.6 TRPA Advisory Planning Commission

The Advisory Planning Commission (APC) is established under the Compact to support the TRPA Governing Board. The 17-member body is comprised of a number of state and local representatives, and is designed to provide technical review of projects and regional planning proposals prior to review and action by the TRPA Governing Board. As a TRPA function, the APC does not review or act on TMPO or RTPA programming actions, but does have jurisdiction over planning issues related to the TRPA regional plan. The TTD has a voting representative on the APC.

4.0 CONSISTENCY WITH TRPA/TMPO, LOCAL, STATE, AND FEDERAL PLANS AND PROGRAMMING POLICIES

The following are key planning documents that combine to create the context within which the 2013 FTIP was developed:

4.1 Lake Tahoe Regional Plan

The TRPA adopted the 2012 Regional Plan Update for the Lake Tahoe Basin on December 12, 2012. This document is required by the Tahoe Regional Planning Agency's Compact and is the overarching 20-year planning document in the Basin for the Tahoe Regional Planning Agency. The Regional Plan provides a blueprint for attaining and maintaining environmental threshold carrying capacities, balancing the environment and economy, and integrating transportation and land use to create sustainable livable communities throughout the Region.

4.2 Regional Transportation Plan

The 2012 Regional Transportation Plan (RTP) or *Mobility 2035* adopted on December 12, 2012 is the conforming long-range transportation plan that meets federal, state and local requirements. The RTP sets forth goals, policies, and objectives to maintain, preserve, and enhance the existing transportation system and to guide future development of the transportation system. The 2013 FTIP includes projects from the RTP.

4.3 Public Participation Plan

The needs of the public are one of the most important foundations for transportation planning and programming. Seeking comprehensive public participation is critical for developing meaningful transportation plans and programs. The TMPO proactively strives to involve the public in identifying and addressing transportation issues, with the goal of creating a strong working relationship between the TMPO and its constituents. The TMPO Public Participation Plan was adopted by the agency in May 2008 (see Appendix J). This plan is intended to ensure that public participation is an integral and effective part of the TMPO's activities and decisions are made with the benefit and consideration of

important public perspectives. A copy of the TMPO Public Participation Plan can be downloaded at http://www.tahoempo.org/planning.aspx?SelectedIndex=0.

4.4 California Programming

California Regional Transportation Planning Agencies are the recipients of various transportation funds and bonds, primarily the State Transportation Improvement Program (STIP), as well as other federal funding sources that are distributed statewide. The TRPA/TMPO receives STIP funds each even numbered year. For STIP funding, projects are approved and included in the STIP by the California Transportation Commission directly from the TRPA Regional Transportation Improvement Program (RTIP). Projects selected for the RTIP are selected based on a number of criteria including safety, congestion, operational improvements, pedestrian, bicycle, and transit.

Caltrans is the recipient of transportation funds known as the State Highway Operation and Protection Program (SHOPP). The SHOPP includes projects designed to maintain the safety and integrity of the State Highway System. These include storm water quality improvements, pavement and bridge rehabilitation projects, traffic operational improvements, and seismic safety projects.

4.5 Nevada Programming

In Nevada, all state projects are programmed through the Nevada State Transportation Improvement Program (STIP). The STIP includes one and three year elements as well as a long-range element. Projects selected for the Nevada STIP are included based on similar criteria as in California, including safety, transit, air, and water quality improvements.

4.6 Federal Programming

The TRPA/TMPO receives federal funding sources such as Federal Transit Administration (FTA) programs, Congestion Mitigation and Air Quality (CMAQ), Regional Surface Transportation Program (RSTP), and other annual and discretionary grants that are allocated on an annual basis. These federal funds are funded through the current federal transportation bill known as the SAFETEA-LU. There is uncertainty in future federal transportation funding that involves congressional appropriations due to the SAFETEA-LU bill is currently under an extension, and a clear successive transportation funding bill is still under debate. Projects selected for federal funding are selected based on the specific fund criteria. Federal legislation requires projects to be included in the RTP and the FTIP in order to be eligible for federal transportation funding.

5.0 2011 FTIP ACCOMPLISHMENTS

The previous FTIP has been successful in moving projects forward. However due to the cost of developing transportation projects in the Tahoe Basin and the reduction of federal and state funding it has been difficult to make vast improvements to the transportation system over the short life of a FTIP cycle.

Notable achievements include:

- Tahoe City Transit Center
- US Highway 50 Phase I Improvement Project
- Nevada Stateline to Stateline Bikeway Project South Demo

6.0 2013-2016 FTIP DEVELOPMENT

The 2013 FTIP development and approval process spans a total of 12 months. In January of 2012, TMPO staff initiated the FTIP development process at the regularly scheduled monthly Tahoe Transportation Commission meeting. The following dates outline significant milestones in this document's development:

January 13 TTC Board meeting - 2013 FTIP development announcement FTIP development communication sent to jurisdictions

February 01 2013 FTIP Project Data Request posted to websites/sent to jurisdictions

March-June Development of Draft FTIP

July 20 TTC Board review Draft FTIP - initiate 30 day public comment period

July 23 Commence 30 day public comment period for Draft FTIP

August 10 TTC Board meeting - FTIP public hearing
August 21 End 30-day public participation for Draft FTIP

September 14 TTC endorsement on Final FTIP

September 26 TMPO Governing Board approval of Final FTIP

October 01 Final FTIP to Caltrans and NDOT December 17 FTIP/FSTIP Federal approval

6.1 Agency Consultation

Details of the draft FTIP have been circulated for intergovernmental review. A goal of the FTIP process is to promote stakeholder relationships that foster cooperative efforts to achieve common transportation goals. Agencies responsible for activities that may be affected by the proposed transportation projects have been consulted for their perspectives on planning issues, needs, and priorities.

6.2 Preliminary Financial Estimates, Project Selection, and Project Priorities

The first step in developing a financially-constrained plan is to determine how much money is reasonably expected to be available to maintain, operate, and improve the Region's transportation system. During the development of the FTIP, projects that were already financially constrained were examined to explore if additional funding sources existed to incorporate new projects. The 2011 FTIP included projects that were financially constrained and based on limited federal, state, and local financial funding available for the 2013 FTIP cycle the incorporataion of new projects into the 2013 FTIP is fairly limited. Project priorities were selected based on availability of additional funding. This outcome suggested that new projects that did not have additional funding sources associated to it could not be included in this FTIP. The priority projects in this document are projects that will continue to advance from the 2011 FTIP.

6.3 Visualization

In addition to the electronic availability of the FTIP and project related information at http://www.tahoempo.org/ftip.aspx?SelectedIndex=2, the TMPO has produced a Project Location Map for the FTIP projects (see Appendix B). TMPO has also partnered with the TTD in developing a visual "TIP tool" that allows for the mapping and provision of project information, including GIS maps, financial, and scope of project data throughout the basin. The TIP tool can be accessed at http://tahoe.dtstiptool.com/.

7.0 AMENDING THE FTIP

Since the TMPO is a bi-state MPO, complexities exist for amending the TIP that does not occur for other MPOs solely located in California or Nevada. (Refer to Appendix G for recommended procedures to follow when amending the FTIP.) When making changes to the FTIP there are three basic categories that a change will be classified as (defined below):

7.1 Amendments

An amendment is a revision to the FTIP that involves a <u>major</u> change to a project. This includes the addition or deletion of a project or a project group, a major change in project cost, project phase initiation dates, or a major change in project scope or design. An amendment also requires public review and comment, re-demonstration of financial constraint, and an air quality analysis. There are three types of amendments based on air quality conformity. The TMPO processes amendments on a quarterly basis. If there is an FTIP issue that needs addressing immediately, an amendment can be processed outside of the regular schedule to accommodate the situation. Also note, changes to projects that are included only for financial illustrative purposes outside of the four-year FTIP period do not require an amendment.

Amendment Types:

- Amendments requiring a New Air Quality Conformity Analysis: 30-day public review and comment period
- Amendments that rely on the Existing Air Quality Conformity Analysis: seven-day public review and comment period
- Amendments containing Exempt projects requiring no additional Air Quality Conformity
 Determination: seven-day public review and comment period

7.2 Administrative Modifications

An administrative modification is a <u>minor</u> revision to the FTIP that does not require formal public review and comment, re-demonstation of financial constraint, or a conformity determination and is approved by the executive director. The TMPO processes administrative modifications on an as needed basis. The TMPO executive director has delegated authority from Caltrans to approve administrative modifications for the Federal Statewide transportation Improvement Program(FSTIP). All administrative modifications and amendments are listed online at http://www.tahoempo.org/ftip.aspx?SelectedIndex=2. The following changes can be processed through administrative modifications:

- Revise description of a project or a grouped project without changing the project scope or without conflicting with the approve environmental
- Revise the funding amount listed for a project or a project phase; additional funding is limited to the lesser of 40 percent of the total project cost or \$10 million
- Minor changes to a project phase or initiation date

7.3 Expedited Project Selection Process

The Tahoe Metropolitan Planning Organization has a formal process in place for selecting projects for delivery in accordance with 23 Code of Federal Regulations (CFR) Part 450.332. Project programming allows for the advancement or delay of projects within the four-year Federal Transportation Improvement Program and Statewide Federal Transportation Improvement Program that is referred to as the Expedited Project Selection Process (EPSP) found in 23 CFR 450.220 and 450.330. TMPO as

the Metropolitan Planning Organization for the Tahoe Basin has entered into an EPSP with Caltrans' Office of Federal Programs and the Nevada Department of Transportation. These procedures have been agreed to by partnering agencies, including the State(s) and transit operators within the Region. The projects listed within the FTIP have all been selected based on the regulations of 23 CFR Part 450. The EPSP procedures are outlined below.

TMPO agrees that projects in the four-year FTIP period funded through Congestion Mitigation Air Quality, Regional Surface Transportation Program, Federal Transit Administration programs, Southern Nevada Public Lands Management Act, Federal Lands Highway Program in accordance with 23 U.S.C. 204, the Federal Emergency Relief Program, and all other programs must be programmed through a project selection procedure. This procedure includes consultation with member agencies, transit operators, State Department(s) of Transportation. These programmed projects may be advanced or delayed within the four-year FTIP period by TMPO staff consistent with TMPO's adopted EPSP.

TMPO agrees that projects funded within the State Transportation Improvement Program may be advanced or delayed within the FTIP subsequent to the approval by the California Transportation Commission. TMPO and Caltrans agree that Caltrans may move projects in the State Highway Operation and Protection Program document within the four-year FTIP period without amending the FTIP, with notification to TMPO.

TMPO agrees that projects funded within NDOT's STIP may be advanced or delayed within the four-year FTIP period without amending the FTIP, with notification to the TMPO.

TMPO agrees that if any projects were to be funded through the Highway Safety Improvement Program (HSIP), High Risk Rural Roads Program (HRRR), Safe Routes to School (SRTS) Program and/or the Highway Bridge Program (HBP) that have been programmed through a selection process by Caltrans Division of Local Assistance in cooperation with the Federal Highway Administration, that these projects may be advanced or delayed within the four-year FTIP period by the appropriate HSIP, HRRR, SRTS, and/or HBP program mangers with notification to the TMPO.

All advancing or delaying of funds through the EPSP process must not negatively impact the deliverability of other projects in the regional program, and must not affect the financial constraint of the FTIP.

8.0 PROJECT MONITORING AND ANNUAL LISTING OF OBLIGATED PROJECTS

Projects are continuously monitored by TMPO staff. Additionally, projects that are subject to the California Assembly Bill 1012 "Use it or Lose It" are monitored to ensure that all available funding sources are expended in the Tahoe Basin. Project implementation is an important objective in the Tahoe Region and if any uncertainties arise then these issues are brought forth through funding recommendations to the Tahoe Transportation Commission for action.

Every year the TMPO, in cooperation with the state department of transportation, develop an Annual Listing of Obligated Projects for which federal funds were obligated as well as when certain federal funds will be obligated. The annual list includes investments in pedestrian and bicycle facilities as well as highway operational improvements. The Annual Listing of Obligated Projects is available on the TMPO website at www.tahoempo.org.

9.0 AIR QUALITY CONFORMITY ANALYSIS

The 2013 FTIP's air quality analysis is based on the air quality conformity analysis conducted for the 2012 RTP. The 2013 FTIP does not add any non-exempt projects in comparison to the previous FTIP. In air quality non-attainment and maintenance areas, all projects must be in conformance with the California and Nevada State Implementation Plans (SIP) for air quality standards before they can be included in the FTIP. The TMPO is responsible for conducting conformity determinations for both California and Nevada portions of the Basin where conformity requirements apply. EPA requires two 10 year CO maintenance plans. In California, EPA has approved the Lake Tahoe Air Basin (LTAB) second 10 year maintenance plan which ends in 2018. In Nevada, the first 10 year maintenance plan ends in 2014. (Refer to Appendix H for 2012 Air Quality Conformity Analysis.)

10.0 FINANCIAL SUMMARY

The financial summary identifies the transportation funding revenues that are programmed in this document. The projects within this document are considered financially constrained and financial information will be adjusted accordingly with the most current information as it becomes available. Accompanying the financial summary are individual project tracking sheets that are produced in the California Transportation Improvement Program Systems program. Both California and Nevada projects are tracked within this database. (Refer to Appendix A for Financial Summary.)

11.0 OPERATIONS AND MAINTENANCE OF THE EXISTING SYSTEM

The Operations and Maintenance (O&M) of the existing transportation system is a priority investment in the Lake Tahoe Region. Keeping the region's transportation system in a state of good repair is a major challenge for all transportation agencies in the region. TRPA, Caltrans, NDOT, and the region's localities share this responsibility. There are 110 miles of state and federal highways in the Tahoe region. These routes, managed by Caltrans and NDOT, form the backbone of the region's transportation system. Typical projects include pavement maintenance, water quality treatment and operational improvements of these roadways. Caltrans utilizes, primarily, the State Highway Operation and Protection Program (SHOPP), while NDOT utilizes state funding and federal highway funding for its maintenance activities. The local jurisdictions are responsible for maintaining the 619 miles of local streets and roads. These local routes include a range of facility types from urban-style arterial streets and roadways in South Lake Tahoe, California and Stateline, Nevada with sidewalks and bicycle facilities, to rural county roads outside of urban centers. Typical projects include pavement maintenance, operational improvements, and snow removal of the local streets and roads.

The transit systems are operated and maintained by the two transit operators in the Lake Tahoe Region. The transit operators utilize federal (FTA 5311) and state (LTF and STA) transit funds as well as local/private (farebox and private contributions) funds to maintain the transit operations in the Lake Tahoe Region.

The expenditures for O&M in the FTIP are consistent with the expenditures listed in the RTP accessed at http://www.trpa.org/documents/docdwnlds/rtp_final.pdf. Estimates for expenditures represent Caltrans, Nevada DOT, and local jurisdiction figures. With the recent reduction of funding from the state of California for local governments, roadway O&M expenditures have been reduced dramatically

for local governments in the California portion of the Lake Tahoe Basin.

The TRPA tracks miles of roadway treated for stormwater runoff, however neither the TRPA nor the TMPO formally report on other road maintenance indicators. Individual jurisdictions have a variety of methods for monitoring maintenance needs over time. Road maintenance is an important component in how well the transportation system functions. Many jurisdictions have developed a performance measure for road maintenance. These measures use varying factors, including the amount of money spent on maintenance (as a percent of budget, an absolute amount, or a cost per capita); or the percentage of road miles needing rehabilitation.

Comments:

****** Version 9 - 08/29/2012 *******

Carry over from 2010

New project Harrison Avenue Bike Trail Connection

Add Demo Section 115 funds of \$1,655 to FY 12/13 ROW

******* Version 8 - 08/28/2012 *******

Move RSTP funds \$222,000 from CON to ROW FY11/12

******* Version 7 - 06/22/2012 *******

adding project from 2008FTIP- LT Blvd Enhancement

add SR2S funds of \$450,000 CON FY11/12

add USFS funds \$150,000 PE and \$100,000 CON to FY11/12

******* Version 6 - 05/30/2012 *******

reduce CMAQ by \$200,000 FY 12/13

increase CMAQ by \$83,000 FY 11/12

reduce RSTP by \$69,000 FY11/12

****** Version 5 - 04/04/2012 *******

Add Lake Parkway Sidewalk Project NV TE \$583,000 CON FY 11/12

******* Version 4 - 10/07/2011 *******

Increase FY10/11 CMAQ funds by \$268,000 per actual CMAQ apportionment rec'd 7/15/11. Decrease USFS funds by \$125,000 FY 10/11. See detail grouped listing for specific project changes.

******* Version 3 - 07/21/2011 *******

1. Add Meeks Bay to Sugar Pine Point Bike Trail Project FLH \$350,000 PE FY11/12

******* Version 2 - 04/05/2011 ********

New Group Listing for Bike and Pedestrian Projects

Combines Sawmill 2, El Dorado Beach, and Pioneer Trail from 2008 FTIP

AMENDING THE FTIP

Processing a TMPO FTIP or FTIP Amendment that Adds or Modifies FSTIP Programming in Both California and Nevada and is Subject to the AQ Conformity Determination Requirements

I.

Once a FTIP or Amendment and any necessary AQ Conformity determination is approved by the TMPO Board, the TMPO submits the approved FTIP or Amendment with any required AQ Conformity analysis and determination documentation to:

NDOT and Caltrans requesting approval of the TMPO FTIP by the Governor (or the Governor's designee) in each state,

-And-

FHWA's CA Division office and the FTA's Region IX office requesting the required joint FHWA/FTA Conformity Determination (with informational copy to: U.S. EPA & FHWA's NV Division office)

II.

NDOT submits the State (Nevada) approved TMPO FTIP or Amendment and any required AQ conformity documentation to the FHWA's NV Division office and the FTA's Region IX office (with courtesy copy to FHWA's CA Division) documenting NDOT approval of the TMPO FTIP and requesting inclusion of the Nevada projects from the TMPO FTIP or Amendment into Nevada's STIP.

-And-

Caltrans submits the State (California) approved TMPO FTIP or FTIP Amendment and any required AQ conformity documentation to FHWA's CA Division office and the FTA's Region IX office (with courtesy copy to FHWA's NV Division) documenting Caltrans approval of the TMPO TIP and requesting inclusion of the California projects from the TMPO FTIP or Amendment into California's FSTIP.

III.

In consultation with the U.S. EPA, the FHWA CA Division office and the FTA Region IX office make the required AQ conformity determination on the TMPO FTIP or Amendment (with a courtesy copy to FHWA's NV Division).

IV.

On receipt of the California Governor's approval and completion of FHWA/FTA action on the AQ conformity determination for the TMPO's FTIP or Amendment, the FHWA NV Division office and the FTA Region IX office act jointly in responding to the Nevada DOT FSTIP programming request (with courtesy copy to FHWA CA Division).

-And-

On receipt of the Nevada Governor's approval and completion of FHWA/FTA action on the AQ conformity determination for the TMPO's TIP or Amendment, the FHWA CA Division office and the FTA Region IX offices act jointly in responding to the Caltrans FSTIP programming request (with courtesy copy to FHWA NV Division).

Processing a TMPO FTIP or FTIP Amendment that Adds or Modifies FSTIP Programming in Nevada Only and is Subject to the AQ Conformity Determination Requirements

Ī.

Once a FTIP or Amendment and any necessary AQ Conformity determination is approved by the TMPO Board, the TMPO submits the approved FTIP or Amendment with any required AQ Conformity analysis and determination documentation to:

NDOT and Caltrans requesting approval of the TMPO TIP by the Governor (or his designee) in each State,

-And-

FHWA's NV Division office and the FTA's Region IX office requesting the required FHWA/FTA Conformity Determination (with informational copies to the U.S. EPA and FHWA CA Division offices)

II.

NDOT submits the State (Nevada) approved TMPO FTIP or Amendment and any required AQ conformity documentation to the FHWA's NV Division office and the FTA's Region IX office (with courtesy copy to FHWA's CA Division) requesting inclusion of the projects from the TMPO FTIP or Amendment into Nevada's FSTIP.

III.

In consultation with the U.S. EPA, the FHWA NV Division office and the FTA Region IX office make the required AQ conformity determination on TMPO's FTIP or Amendment (with courtesy copy to FHWA's CA Division).

IV.

On receipt of the Nevada Governor's approval of the TMPO FTIP or Amendment and completion of the FHWA/FTA action on the AQ conformity determination for the FTIP or Amendment, the FHWA's NV Division office and the FTA's Region IX office act jointly in responding to the Nevada DOT STIP programming request (with courtesy copy to FHWA's CA Division office).

Processing a TMPO FTIP or FTIP Amendment that Adds or Modifies FSTIP Programming in <u>California Only and is Subject to the AQ Conformity</u> Determination Requirements

I.

Once a FTIP or Amendment and any necessary AQ Conformity determination is approved by the TMPO Board, TMPO submits the approved FTIP or Amendment with any required AQ Conformity analysis and determination documentation to:

NDOT and Caltrans requesting approval of the TMPO FTIP by the Governor (or his designee) in each State,

-And-

FHWA's CA Division office and the FTA's Region IX office requesting the required FHWA/FTA Conformity Determination (with informational copies to the U.S. EPA and FHWA NV division offices)

II.

Caltrans submits the State approved TMPO FTIP or Amendment and any required AQ conformity documentation to the FHWA's CA Division office and the FTA's Region IX office (with courtesy copy to FHWA's NV Division) requesting inclusion of the projects from the TMPO FTIP or Amendment into California's FSTIP.

III.

In consultation with the U.S. EPA, the FHWA CA Division office and the FTA Region IX office make the required AQ conformity determination on TMPO's FTIP or Amendment (with courtesy copy to FHWA's NV Division).

IV.

On receipt of the California Governor's approval of the TMPO FTIP and completion of the FHWA/FTA action on the AQ conformity determination for the FTIP or Amendment, the FHWA's CA Division office and the FTA's Region IX office act jointly in responding to the Caltrans FSTIP programming request (with courtesy copy to FHWA's NV Division office).

Processing a TMPO FTIP or Amendment that Adds and/or Modifies FSTIP programming in <u>Both California and Nevada and is Exempt</u> from the Requirement to Determine AQ Conformity

I.

Once the TMPO Board approves the FTIP or Amendment, the TMPO submits the approved FTIP or Amendment to the NDOT and Caltrans for approval by the Governor (or Governor's designee) in each State.

II.

NDOT submits the TMPO FTIP or Amendment (as approved by the TMPO and Nevada's Governor) to the FHWA's NV Division office and the FTA's Region IX office (with courtesy copy to FHWA CA Division) requesting inclusion of the TMPO FTIP or Amendment into Nevada's STIP.

-And-

Caltrans submits the TMPO FTIP or Amendment (as approved by the TMPO and California's Governor) to FHWA's CA Division office and the FTA's Region IX office (with courtesy copy to FHWA NV Division) requesting inclusion of the TMPO FTIP or Amendment into California's FSTIP.

III.

On receipt of the California Governor's approval of the TMPO's TIP or Amendment the NV Division office and the FTA's Region IX offices act jointly in responding to the Nevada DOT FSTIP programming request (with courtesy copy to FHWA's CA Division).

-And-

On receipt of the Nevada Governor's approval of the TMPO's FTIP or Amendment the FHWA's CA Division office and the FTA's Region IX offices act jointly in responding to the Caltrans programming request (with courtesy copy to FHWA NV Division).

Processing a TMPO FTIP or Amendment that Adds and/or Modifies FSTIP Programming in <u>Nevada Only and is Exempt</u> from the Requirement to Determine AQ Conformity

I.

Once the TMPO Board approves a FTIP or Amendment, the TMPO submits the approved FTIP or Amendment to the NDOT and Caltrans for approval by the Governor (or Governor's designee) in each State.

II.

Caltrans notifies the TMPO (with courtesy copy to FHWA's NV and CA Divisions) of the California Governor's approval of the FTIP or Amendment

III.

NDOT submits the TMPO FTIP or Amendment (as approved by the TMPO and Nevada's Governor) to FHWA's NV Division office and the FTA's Region IX office requesting inclusion of the TMPO TIP or Amendment into Nevada's STIP.

IV.

On receipt of the Nevada Governor's approval of the TMPO's FTIP or Amendment, the FHWA's NV Division office and the FTA's Region IX office act jointly in responding to the Nevada DOT FSTIP Programming request (with courtesy notification to FHWA CA Division).

Processing a TMPO FTIP or Amendment that Adds and/or Modifies FSTIP Programming in <u>California Only and is Exempt</u> from the Requirement to Determine AQ Conformity

I.

Once the TMPO Board approves a FTIP or Amendment, the TMPO submits the approved FTIP or Amendment to Caltrans and NDOT for approval by the Governor (or Governor's designee) in each State.

Ш

NDOT notifies the TMPO (with courtesy copy to FHWA's NV and CA Division offices and FTA's Region IX office) of the NV Governor's approval of the FTIP or Amendment

III.

Caltrans submits the TMPO TIP or Amendment (as approved by the TMPO and California's Governor) to FHWA's CA Division office and the FTA's Region IX office requesting inclusion of the TMPO FTIP or Amendment into California's FSTIP.

IV.

On receipt of the California Governor's approval of the TMPO's FTIP or Amendment, the FHWA's CA Division office and the FTA's Region IX office act jointly in responding to the Caltrans FSTIP Programming request (with courtesy notification to FHWA NV Division).

AIR QUALITY CONFORMITY ANALYSIS

APPENDIX E 2012 Conformity

Purpose

The purpose of conformity is to ensure that regional transportation planning and programming remain consistent with state and local air quality planning efforts to achieve and/or maintain the National Ambient Air Quality Standards (NAAQS). As the Metropolitan Planning Organization (MPO) and the Regional Transportation Planning Agency (RTPA) for Tahoe Region, the Tahoe Metropolitan Planning Organization (TMPO) has prepared this analysis pursuant to the 1990 federal Clean Air Act Amendments (CAAA) and the State Implementation Plan (SIP) for California and Nevada.

The Transportation Conformity Rule requires all jurisdictions in non-attainment areas or who are under federally approved maintenance plans to submit a conformity analysis if the planning or programming documents identify projects that have been defined as non-exempt. The CAAA also directs MPOs to facilitate the expeditious implementation of the Transportation Control Measures (TCMs) that are included in the SIP. No TCMs are applicable to the Tahoe Region therefore no control measures are identified for implementation.

Emissions Tests

The TMPO is responsible for conducting conformity determinations for both the California and Nevada portions of the Basin where conformity requirements apply. EPA requires two 10 year CO maintenance plans. In California, EPA has approved the Lake Tahoe Air Basin (LTAB) second 10 year maintenance plan which ends in 2018. In Nevada, the first 10 year maintenance plan ends in 2014. Please refer to Table A for the current conformity designations by County.

Pursuant to the conformity regulation, a regional emission analysis which incorporates all conformity non-exempt projects must meet the established emission tests before Mobility 2035 can be determined to conform with the State Implementation Plans (SIP). For California counties, the MPO must demonstrate that proposed transportation programs and plans are consistent with the SIP by showing that emissions associated with these plans and programs do not exceed applicable carrying capacities or "emission budgets" previously adopted by the California Air Resources Board (CARB). In Nevada, conformity is determined by applying a build/no build assessment for those areas that are either classified as non-attainment or are under a Maintenance Plan. Both Douglas and Washoe Counties have been designated as Limited Maintenance Areas, where the emissions test only applies for to non-attainment areas.

Table A Pollutant and Conformity Designation by Jurisdiction

Jurisdiction	Pollutant	Reason for Conformity Analysis
El Dorado County	CO	Current Maintenance Plan
Placer County	CO	Current Maintenance Plan
Douglas County	CO	Limited Maintenance Plan
Carson City County	CO	Limited Maintenance Plan

Modeling and Analytical Assumptions (California)

Pursuant to the conformity regulation, a regional emissions analysis which incorporates all conformity non-exempt projects must meet the emissions budget test before *Mobility 2035* can be determined to conform to the SIP. This analysis is holistic in scope, with final conformity being based on the program rather than on a project-by-project basis.

On November 30, 2005, the EPA took direct and final action to approve a State Implementation Plan revision that was submitted by the California Air Resources Board. The revision titled "Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Planning Purposes; Carbon Monoxide Maintenance Plan Update for Ten Planning Areas; Motor Vehicle Emissions Budgets: Technical Correction" (Federal Register/Vol. 70, No 229/Wednesday, November 30, 2005/Rules and Regulations) provides a 10-year update to the carbon monoxide maintenance plan, for 10 planning areas of which the LTAB was included. As part of this update the following Motor Vehicle Emission Budget (MVEB) was developed for the LTAB.

		Emission	Budget
CO Maintenance Area	Area Included	2010	2018
Lake Tahoe North Shore	Eastern Placer	11	11
Lake Tahoe South Shore	Eastern El Dorado	19	10

Note: Winter Seasonal emissions are in tons per day. Emissions budget represent CARB's seasonal on-road motor vehicle emission inventory

The conformity regulations requires that a conformity analysis must include the attainment milestone year of the SIP, the forecast horizon year of the applicable RTP and have no analysis gaps greater than 10 years. Based on these requirements, the conformity analysis years selected for this analysis are: 2010, 2020, and 2035. A description of the conformity modeling planning assumptions is provided in Table B.

Table B

Modeling Assumptions	2012 RTP Conformity Assumptions
Socio-economic growth assumptions	TRPA Regional Plan Update Growth Forecasts
Vehicle Activity Levels (trips, VMT) (LDA, LDT, MDT, UB, MCY, SBUS, HHDT, HDGT,)	ARB Default Activity (2010, 2020, 2030) –TMPO Model (2010, 2020, 2035)

Emission Budgets	2005 40 CFR (2010, 2018)

Mobility 2035 TransCAD Modeling and Network Analysis

The Mobility 2035 impact on travel behavior is assessed at the regional scale using the TMPO TransCAD Tour-Based Travel Demand Model. The TransCAD model identifies the impact on region-wide circulation patterns and vehicle miles of travel (VMT). The socio-economic data inputs for the regional network travel demand model were derived from the most recent growth allocations (2020 and 2035) identified through the TRPA Regional Plan Growth Alternatives (Table C). Both Non-Exempt projects required modifications to the 2020 TransCAD street networks. New roads or road extensions were coded by creating new links; widening projects required re-coding the number of lanes on affected links; channelization improvements entailed increasing the coded lane capacities, and passing lanes and/or roadway improvements/upgrades were reflected by increasing the average free flow speeds on affected links.

Note: Additional Information concerning the TMPO TransCAD Model Development and Calibration can be found in *Lake Tahoe Resident and Visitor Model: Model Description and Final Results*: Parsons, Brickerhoff Quade & Douglas. August 2007. Additional information concerning the TRPA Growth Assumptions can be found in the *TRPA Regional Plan Update Draft Environmental Impact Statement*; TRPA, April 25, 2012.

Non-Exempt Projects - The Lake Tahoe Basin is subject to a transportation conformity analysis on specific types of projects (termed "non-exempt projects) that are included within the planning and programming documents.

Exempt projects generally include projects that will not increase roadway capacity or VMT, safety improvements, maintenance of existing transit systems, such as bus replacement and the addition of bus shelters to be implemented in the Lake Tahoe Region. The following non-exempt projects have been identified for the Tahoe Region.

US50 South Shore Community Revitalization Project - Scheduled for completion in 2017 this project will realign U.S. Highway 50 near the casino corridor to improve bicycle, pedestrian and transit opportunities. The project straddles the California/Nevada Stateline area in El Dorado County and Douglas County and is proposed to reduce the existing U.S. Highway 50 to two eastbound lanes with westbound traffic redirected on Lake Parkway.

State Route 89/Fanny Bridge Community Revitalization Project – Scheduled for completion in 2018 this project addresses seasonal traffic congestion at the Tahoe City Wye in Placer County and the structural and seismic deficiencies of Fanny Bridge on the Truckee River. Fanny Bridge will be upgraded to provide improved pedestrian and bicycle safety with a new SR 89 alignment through the 64-acre United States Forest Service parcel located west of the existing State Route 89.

Table C TRPA Regional Plan Alternative Growth Allocation and Development Rights Accounting

On-Road Motor Vehicle Emissions Analysis

The on-road mobile source emissions estimates for Mobility 2035 were produced with the EPA approved EMFAC2007 (v. 2.30 November 6, 2006) emission inventory model developed by the California Air Resources Board (ARB) for use in California. EMFAC calculates emission factors that are used as input to the activity module to produce an on-road mobile source emissions inventory. Additional analysis was completed with the updated EMFAC2011 which ARB has updated with the latest information on vehicle populations and miles traveled in California. Both models were used because EMFAC2007 is the current model accepted by EPA for purposes of conformity analysis, but it is anticipated that EPA will accept EMFAC2011 in the fall of 2012 and will use the model for conformity analysis thereafter. Both models use inputs on the types of vehicles in use, vehicle speeds, vehicle operating conditions (e.g., cold starts, hot starts, hot stabilized running etc.,) and temperature corrections (for diurnal and hot soak evaporative processes) to generate on-road vehicle emission factors. These emission factors are applied to the appropriate on-road activity data (e.g., VMT, VMT by speed class, and number of trip starts for each vehicle type and technology group) stratified by time of day (to account for diurnal ambient temperature variations) to produce a countywide on-road mobile source emissions estimate.

The emissions associated with VMT and vehicle starts are accounted for in the EMFAC models based on the distribution of these trips by vehicle classification, vehicle technology class, operating mode and activity by time of day. ARB default distributions were used for this purpose. The Emission Budget Results and On-Road Activity Data can also be found in Table D.

California Conformity Determination

As a result of the emission results identified in Table D, the TMPO finds the proposed new transportation programs discussed in this document do not affect CO attainment nor exceed the CO budget in either Placer or El Dorado Counties for the life of this plan. For this reason, the TMPO stipulates that this plan is consistent with the California's State Implementation Plan for air quality and is therefore in full compliance with the conformity requirements of the Clean Air Act.

Nevada Conformity

Nevada's conformity analysis differs slightly from California's in that there is no emissions budget to form a conformity determination. As mentioned previously, Carson City and Douglas Counties are working under a limited maintenance plan for CO (NDEP's Carbon Monoxide Redesignation Request and Limited Maintenance Plan which was adopted by the EPA February 2004). Areas with Limited Maintenance Plans do not need to conduct a regional emissions analysis, however the limited maintenance plans for these areas includes provisions for interagency consultation procedures should CO concentrations exceed a pre-determined "trigger." This trigger includes two verified 8-hour average concentrations in excess of 7.65 ppm (85% of the CO NAAQS) at any one monitoring site in any CO season (November through February) as the pre-violation action level. Since Mobility 2035 is working under a Limited Maintenance Plan in Nevada, it is not required to satisfy the regional emissions analysis for a given pollutant.

In March 2012, NDEP drafted another revision to Nevada SIP for Carbon Monoxide titled 2012 Revision to the Nevada State Implementation Plan for Carbon Monoxide; Updated Maintenance Plan for the Nevada side of the Lake Tahoe Basin, NDEP 2012. Under the transportation conformity rule, EPA guidance asserts that in limited maintenance plan areas, emissions budgets may be treated as not constraining because the area is unlikely to grow enough that a violation of the NAAQS would occur and that emissions need not be capped for the maintenance period.

Executive Director
Tahoe Metropolitan Planning Organization
P.O. Box 5310
128 Market Street
Stateline, NV 89449

SUBJECT:

Tahoe Metropolitan Planning Organization's (TMPO) 2013 FTIP Conformity

Determination

Dear Ms. Marchetta:

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have completed our review of the conformity determination for the Tahoe Metropolitan Planning Organization's (TMPO) 2013 FTIP. A FTA/FHWA air quality conformity determination is required pursuant to the Environmental Protection Agency's (EPA) *Transportation Conformity Rule*, 40 CFR Parts 51 and 93, and the United States Department of Transportation's *Metropolitan Planning Rule*, 23 CFR Part 450.

On January 23, 2013, TMPO adopted the 2013 FTIP and made the corresponding conformity determination. The conformity analysis submitted by TMPO indicates that all air quality conformity requirements have been met. Based on our review, we find that the 2013 FTIP and conformity determination conform to the applicable state implementation plan in accordance with the provisions of 40 CFR Parts 51 and 93. In accordance with the July 15, 2004, Memorandum of Understanding (MOU) between the Federal Highway Administration, California Division and the Federal Transit Administration, Region IX, the FTA has concurred with this conformity determination. Additionally, this conformity determination was made after consultation with the EPA, Region 9 office.

If you have questions or need additional information concerning this approval, please contact Joseph Vaughn (Joseph. Vaughn@dot.gov) of the FHWA California Division office at (916) 498-5346.

Sincerely,

For: Vincent P. Mammano Division Administrator

TMPO Public Notice

P.O. Box 5310 128 Market Street Stateline, Nevada 89449 (775) 588-4547 ◆ Fax (775) 588-4527

NOTICE OF 30 DAY PUBLIC COMMENT PERIOD

Tahoe Metropolitan Planning Organization Draft 2013 - 2016 Federal Transportation Improvement Program

The Tahoe Metropolitan Planning Organization announces a public comment period for the Draft 2013 Federal Transportation Improvement Program (FTIP) as required by the United States Department of Transportation's metropolitan planning regulations 23 Code of Federal Regulations Part 450. This notice will commence on July 23, 2012 and conclude on August 21, 2012. Written comments will be accepted until 5:00 pm on August 21, 2012.

The 2013 FTIP for the Lake Tahoe Region is a four-year program of surface transportation projects for the Tahoe Metropolitan Planning Organization that is consistent with the Lake Tahoe Regional Transportation Plan and related local, state and federal planning processes.

The 2013 FTIP document is available upon request or can be accessed online at:

http://www.tahoempo.org

Written comments should be sent to:

Tahoe Metropolitan Planning Organization Attn: Judy Weber, Transportation Planner P.O. Box 5310 Stateline, NV 89449

Or via email: jweber@trpa.org

Public Participation Plan

Public Participation Plan

Amended July 2010

The needs of the public are one of the most important foundations for transportation planning. Seeking comprehensive public participation is critical for developing meaningful transportation plans. The Tahoe Metropolitan Planning Organization (TMPO) proactively strives to involve the public in identifying and addressing transportation issues, with the goal of creating a strong working relationship between the TMPO and its constituents. This plan is intended to ensure that public participation is an integral and effective part of the TMPO's activities and that decisions are made with the benefit and consideration of important public perspectives.

Introduction

This document is the Public Participation Plan for the Tahoe Metropolitan Planning Organization (TMPO). The TMPO is the transportation planning agency for the Tahoe Basin, as designated by the federal government, and its goal is to provide for regional mobility. The TMPO is required to have a Continuing, Comprehensive, and Coordinated transportation planning process that considers all transportation modes, provides a forum for public input, and supports social and economic goals. The 3C process brings together transportation projects set forth by local agencies into one regional plan, prioritizes these projects and helps provide and locate funding for these projects.

Since the purpose of regional planning is to meet public mobility needs, a vital part of this planning effort is involvement of the public. Effectively involving different stakeholder groups in the regional transportation planning process is crucial for determining whether planned projects meet public needs, and for ensuring that public funds are directed to the areas of highest need. A clear planning process that facilitates a high level of public participation ensures well-prepared planning documents, which can then line the region up for funding and other opportunities.

Important considerations affecting participation of different groups are:

- Time, location, and accessibility of meetings
- Reaching people within their own communities and during existing meeting schedules
- Provision of food, childcare, and translation at meetings
- Presentations focused to specific interests of group
- Placement of announcements and flyers using different types of media

The TMPO aims to create a plan that outlines effective methods for reaching the many different groups of people and stakeholders in the Lake Tahoe Basin. The draft plan outlines feedback received from the public, and incorporates this feedback into the public outreach process for TMPO documents. Readers of this document should be able to learn of the many opportunities for public input, and how and when these opportunities occur. The goal of this plan is to invite greater public input into transportation planning, to make members of the public aware of all opportunities for input, to make clearer the sometimes complex planning process, and to cultivate interest in transportation planning in the Lake Tahoe Basin.

Tahoe Metropolitan Planning Organization (TMPO)

Under the federal Transportation Equity Act for the 21st Century (TEA-21), the Tahoe Region was designated as a Metropolitan Planning Organization (MPO). The jurisdiction of the TMPO covers all areas within the watershed that drains into Lake Tahoe. This includes parts of two California counties, El Dorado and Placer, and three Nevada counties, Douglas, Washoe, and Carson. The TMPO board is made up of 16 members. Fifteen of these members are the same members that make up the board of the Tahoe Regional Planning Agency (TRPA), which cooperatively leads the effort to preserve, restore and enhance the unique natural and human environment of the Lake Tahoe region. Seven of the TMPO members are from California and seven are from Nevada. There is one representative of the US Forest Service, in recognition of the major role this agency plays in transportation provision in the Basin, and one non-voting Presidential Appointee. Six members, who are locally elected officials or their designees, represent the units of local government.

The Tahoe Transportation Commission (TTC) serves as an advisory body to the TMPO. The core membership of the TTC is the board of the Tahoe Transportation District, created by the Tahoe Regional Planning Compact (Public Law 96-551) to own and operate intra-regional and inter-regional transportation services and facilities. The TTD and TTC boards share a membership that includes local jurisdictions, California and Nevada Departments of Transportation (non-voting), the US Forest Service, Transportation Management Associations, and an at-large position. In addition, the TTC includes a representative of the TRPA Advisory Planning Commission and a member of the Washoe Tribe.

The TMPO is charged with implementing a "continuing, comprehensive and cooperative transportation planning process among states and local communities." By federal law, the TMPO is required to produce several documents, including a Regional Transportation Plan (RTP), a Transportation Improvement Program (TIP), an Overall Work Program (OWP), a Coordinated Human Services Transportation Plan (CHSP) and a Public Participation Plan (PPP). With the passing of California Senate Bill 375, California MPOs are now required to produce a "Sustainable Communities Strategy" (SCS) for reduction of greenhouse gasses as part of the Regional Transportation Plan.

Planning Factors

Federal regulations require that the MPO planning process provide for the consideration of projects and strategies that will:

- Support economic vitality of the area, especially enabling global competitiveness, productivity and efficiency;
- Increase the safety and security of the transportation system for motorized and non-motorized users;
- Increase the accessibility and mobility options available to people and freight;
- Protect and enhance the environment, promote energy conservation and improve quality of life;
- Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
- · Promote efficient system management and operation; and
- Emphasize the preservation of the existing transportation system.

In addition, in accordance with both federal and state regulations, the MPO planning process shall:

- Include a proactive public involvement process;
- Be consistent with Title VI of the Civil Rights Act of 1964;
- Identify actions necessary to comply with the Americans with Disabilities Act of 1990;
- Provide for the involvement of traffic, ridesharing, parking, transportation safety and enforcement agencies, commuter rail operators, airport and port authorities, appropriate private transportation providers, congestion management agencies, other transportation agencies and commissions, and, where appropriate, city officials;
- Provide for the involvement of local, state and federal environmental, resource and permit agencies as appropriate.

• Provide for the involvement of affordable housing advocates, transportation advocates, neighborhood and community groups, environmental advocates, home builder representatives, broad-based business organizations, landowners, commercial property interests, and homeowner associations;

Federal Requirements for Public Participation

The TMPO proactively strives to involve the public in identifying and addressing transportation issues, with the goal of creating a strong working relationship between the TMPO and its constituents. Several Federal laws and regulations guide the TMPO in involving the public in its activities. They include:

Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU)

SAFETEA-LU states that the Metropolitan Planning Organization (MPO), in consultation with interested parties, shall develop and use a documented participation plan that defines a process for providing citizens, affected public agencies, representatives of public transportation employees, freight shippers, providers of freight transportation services, private providers of transportation, representatives of users of public transportation, representatives of users of pedestrian walkways and bicycle transportation facilities, representatives of the disabled, and other interested parties with reasonable opportunities to be involved in the metropolitan transportation planning process.

SAFETEA-LU also requires that a minimum public comment period of 45 calendar days shall be provided before the initial or revised participation plan is adopted by the MPO.

Title VI of the Civil Rights Act of 1964

Title VI states that, "No person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefit of, or be subjected to discrimination under any program or activity receiving federal financial assistance." Title VI serves as the legal foundation for what is today referred to as environmental justice.

Americans with Disabilities Act (ADA)

The American with Disabilities Act (ADA) of 1990 encourages the participation of people with disabilities in the development and improvement of transportation and paratransit plans and services. In accordance with ADA guidelines, all meetings conducted by the MPO will take place at locations which are accessible to persons with mobility limitations.

• Executive Order 12898 – Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 requires that disproportionately high and adverse human health or environmental effects on minority and low-income populations be identified and addressed in order to achieve environmental justice.

Executive Order 13175 - Consultation and Coordination with Indian Tribal Governments
 Executive Order 13175 was passed in order to establish regular and meaningful consultation and
 collaboration with tribal officials in the development of federal policies that have tribal implications, to
 strengthen the United States government-to-government relationships with Indian tribes, and to reduce
 the imposition of unfunded mandates upon Indian Tribes.

Clean Air Act Amendments (CAAA)

The Clean Air Act Amendments (CAAA) of 1990 require the transportation community to improve air quality while sustaining adequate mobility for transportation users. CAAA and the transportation planning provisions of SAFETEA-LU (Section 6011 – Transportation Conformity) are intended to ensure that integrated transportation and air quality planning occurs among representatives of the MPOs, state and local air quality planning agencies, state and local transportation agencies, and other organizations in the areas designated by the U.S. Environmental Protection Agency (EPA) as non-attainment or maintenance areas.

National Environmental Policy Act (NEPA)

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) regulations implementing the National Environmental Policy Act (NEPA) of 1969 (as amended) outline requirements to carry out an environmental review process for implementing projects from a Transportation Improvement Program (TIP). NEPA has its own set of public participation requirements for review period and notification of interested parties on a project basis.

State Requirements for Public Participation

The State of California is taking a pro-active approach to reducing greenhouse gas emissions. California has its own public participation requirements for MPOs in relation to legislation on greenhouse gas reductions.

Senate Bill 375 (SB-375),

Senate Bill 375 requires MPOs to adopt a Sustainable Communities Strategy (SCS) and/or Alternative Planning Strategy (APS) as part of the regional transportation plan. Senate Bill 575 further clarified the role of the TRPA Regional Plan as the Lake Tahoe Region's SCS. The SCS sets forth a forecasted development pattern for the region, which, when integrated with the transportation network will reduce greenhouse gas emissions from automobiles and light trucks to achieve greenhouse gas emission reduction targets approved by the state board. If greenhouse gas emission targets cannot be reached, then an APS shall be prepared. Each MPO shall adopt a public participation plan for development of the SCS or APS that includes:

- Outreach efforts to encourage the active participation of a broad range of stakeholder groups in the planning process, including, but not limited to, affordable housing advocates, transportation advocates, neighborhood and community groups, environmental advocates, home builder representatives, broad-based business organizations, landowners, commercial property interest, and homeowner associations;
- Consultation with congestion management agencies, transportation agencies, and transportation commissions:
- Workshops throughout the region to provide the public with the information and tools necessary to provide a clear understanding of the issues and policy choices;
- Preparation and circulation of a draft SCS not less than 55 days before adoption of a final regional transportation plan;
- Public hearings on the draft SCS;
- A process for enabling members of the public to provide a single request to receive notices, information and updates

TMPO Documents

The TMPO produces two major documents, the Regional Transportation Plan and the Transportation Improvement Program, that directly lead to the implementation of projects in the Lake Tahoe Basin. Smaller documents, such as the Public Participation Plan, Overall Work Program, and Coordinated Human Services Plan direct TMPO staff on how to create the RTP and TIP and identify priorities for work tasks and study areas. Public input is a vital component of each of these documents, and ultimately results in needed improvements to Lake Tahoe's transportation system.

Regional Transportation Plan (23 CFR 450.322)

The major document that the TMPO produces is called the Regional Transportation Plan (RTP). The RTP addresses a 20-year planning horizon. Through this document, the TMPO brings together transportation projects set forth by different local agencies into one plan, prioritizes these projects and provides funding for them. The RTP includes both long-range and short-range strategies that lead to the development of an integrated multimodal transportation system to facilitate the safe and efficient movement of people and goods. By federal law, this Regional Transportation Plan is required to be fiscally constrained and meet air quality conformity standards and other state and federal requirements. The RTP is revised every four years as the Tahoe Region is in an air quality maintenance area. Regions that are not in air quality maintenance or non-attainment revise their RTPs every five years. In accordance with California Senate Bill 375, passed in September, 2008, RTPs must also include a Sustainable Communities Strategy (SCS) that outlines how the region will meet greenhouse gas reduction targets.

Transportation Improvement Program (23 CFR 450.324)

The Transportation Improvement Program (TIP) is a four-year document that includes all capital and non-capital surface transportation projects within the boundaries of the Tahoe Metropolitan Planning Organization that are either federally funded, regionally significant, or require a federal action. For a project to be included in the TIP, it must be in the RTP. High priority projects from the RTP are selected for inclusion into the TIP through the public process and a final decision by the TMPO board. For each project or project phase, the TIP includes a project description, estimated total project cost, amount of federal funds to be obligated, agencies responsible for carrying out the project or phase, and other project details. The TIP also includes a financial plan that demonstrates how the approved TIP can be implemented and recommends additional financing strategies for needed projects and programs. Only projects with assured or reasonably expected funding may be included in the TIP.

Overall Work Program (23 CFR 450.308)

The Overall Work Program (OWP) is a statement of work produced annually by the TMPO that identifies the planning priorities and activities to be carried out within the metropolitan planning area. The OWP includes a description of the planning work and resulting products, who will perform the work, time frames for completing the work, and the source of funds.

Public Participation Plan (23 CFR 450.316)

The Public Participation Plan (PPP) is a document that defines a process for providing citizens, affected public agencies, representatives of public transportation employees, freight shippers, providers of freight transportation services, private providers of transportation, representatives of users of public transportation, representatives of users of pedestrian walkways and bicycle transportation facilities, representatives of the disabled, and other interested parties with reasonable opportunities to be involved in the metropolitan transportation planning process.

Coordinated Human Services Transit Plan

The Coordinated Public Transit Human Services Transportation Plan (CHSP) is a strategy for public transportation service delivery that identifies the transportation needs of individuals with disabilities, older adults, and individuals with limited income. The plan lays out strategies for meeting these needs and prioritizing services. All transit planning processes in the Basin should refer to the CHSP.

Special Planning Studies

The TMPO undertakes special planning studies that are listed in the OWP, for specific, large-scale projects such as a new transportation system or re-configuration of a downtown street layout. The studies identify feasibility of the project, impacts and benefits, and different alternatives. The public is asked to comment and be involved in the planning process for these studies.

Development of the Public Participation Plan

The development of this Public Participation Plan consisted of four major outreach components, intended to give the public a variety of mediums for providing input. These included a series of public workshops, a survey, targeted outreach to specific stakeholder groups, and follow-up phone calls to cooperating agencies that did not participate in any of the first three activities.

The goals of these outreach activities were:

- To learn from the public how they wish to be contacted and how they want to participate in the planning process;
- To generate interest in the transportation planning process;
- To educate the public on planning activities.

To generate interest and attract more participation, the public participation discussion and outreach was combined with initial outreach for the Regional Transportation Plan. Two "Transportation Roundtables" were conducted and an on-line survey was advertised along with the Roundtable announcements. A letter and a copy of the survey were sent to a list of approximately 500 individuals and agencies. The list included representatives from local, state, and federal government, natural and environmental resource agencies, churches, lodging associations, representatives of different transportation user groups, and participants in the Place-Based planning process. Notices were sent primarily through e-mail; however those without e-mails or those who were considered more effectively reached through mail were sent paper letters and surveys, along with pre-paid return envelopes. For a complete list of all groups contacted, see Appendix A. Additional outreach was carried out through newspaper ads in English and Spanish newspapers, press releases, flyers in English and in Spanish, and web advertisements.

Transportation Roundtables

Two transportation roundtables, one on the North Shore of Lake Tahoe and one on the South Shore of Lake Tahoe, were conducted in March 2008. Spanish translation and food were provided and advertised. Roundtable agendas included:

- Demographic and traffic information
- Summary of proposed major RTP projects and policies
- Interactive activities on walkable communities
- Discussion on the best ways to reach the public and stakeholder groups

Surveys

A total of 273 surveys were completed between February 14 and March 19, 2008. This includes both paper and electronic responses. Near the end of the survey, respondents were asked to choose the transportation topics in which they were interested, and to provide their address if they wished to receive more information. In addition, at the close of the survey, respondents were directed to the TMPO website where there is a link for signing up for the TMPO mailing list.

Outreach to specific groups

There are several stakeholder groups that have unique input into the transportation planning process, but may be harder to reach than other groups. These include minority and low-income communities, second homeowners, and disabled and special needs. Minority, low-income, and special needs users in particular have high rates of transit ridership, walking and bicycling. Second homeowners are not always as frequent users of the transportation system, but they often have concerns that their voice is not heard in the planning process since they are frequently absent from the Basin during public meeting times.

In addition to the Roundtable and survey mailing, these groups were reached through phone calls to representatives, and announcements and/or discussion at regularly scheduled meetings. For a detailed account of these communications, please see Appendix B.

Results

The surveys and Roundtable discussions showed that e-mail was the preferred method for receiving information about public input opportunities, followed by community meetings and presentations to community groups. Newspaper and Website were also popular ways of learning of opportunities.

Other methods mentioned at the Roundtables and on the surveys were:

- Flyers at transit shelters and in the buses, with tear-off tags to take home
- School newsletters, which are often translated into Spanish
- MySpace, Facebook, and other on-line communities
- Newspaper "What's Happening" calendar

Suggestions from specific groups were:

Latino community:

- Provide information at existing classes, meetings, and congregations such as churches
- Have representatives of the Latino community give the presentations themselves
- Provide food, childcare, translation at meetings
- Go door-to-door with flyers announcing meetings
- Announce meetings on "Radio Azteca"
- Print announcements in local Spanish newspapers
- · Distribute notices in Spanish through the school district

Disabled and Special Needs:

- Ensure that meetings are held at times and locations that are accessible by paratransit
- Mail surveys to social service representatives

Second Homeowners:

- Create mailing list from County Assessor Parcel database
- Post web banners on websites with weather and ski report information
- Request that local organizations such as non-profits and homeowner associations include information in newsletters and e-mail broadcasts to their membership
- Consult with Fire Safe Councils--they have been successful in reaching the second homeowners

For complete set of survey results, see Appendix D.

Follow-Up Contact

Calls and/or personal e-mails were placed to several public agencies with whom the TMPO collaborates and who did not respond to the survey or attend the Transportation Roundtables:

- U.S. Fish and Wildlife Service
- Nevada Division of Environmental Protection
- Washoe Tribe
- Tahoe City Public Utility District
- South Tahoe Public Utility District
- North Tahoe Public Utility District

A summary of the input received from these calls and e-mails is included in Appendix B.

Implementation of Public Participation Input

There were many new suggestions that came out of the Public Participation process. The TMPO selected those that staff feels can garner the most input from a diverse set of stakeholder groups, taking into consideration staff and resource limitations. The process itself, and future processes like it, will help to build the TMPO's mailing list, so that over time it may reach an ever wider audience during transportation planning activities.

At a minimum, public meetings and opportunities for public comment for all TMPO documents will be advertised and carried out in the following ways:

- E-mail and mailing to those on the mailing list.
- Announcements will be targeted based on interests indicated when signing up.
- Summaries of documents will be translated into Spanish where appropriate.
- Legal notices of comment periods will be printed in newspapers of local circulation, and mailed to U.S. post offices and libraries, and transit operators for posting on buses and shelters.
- Public notice of workshops will be provided at least 7 days in advance.
- Depending on the scale and focus of the document, specific stakeholder groups may be addressed at their regularly scheduled meetings, or specialized meetings to gain their input may be held.
- Input will be sought at regularly scheduled meetings of transportation entities around the Basin as appropriate, as listed in the "Ongoing Public Participation Forums" section of this document.
- Public meetings will be held at locations and times accessible by transit and paratransit, to the extent feasible.
- Public meetings for document input will set aside time specifically for hearing from the public, and will offer comment cards for those who do not wish to speak.
- Draft documents for review will be posted on the TMPO website, made available at the TMPO/TRPA front counter and available by e-mail or hard copy upon request. A small fee may be assessed for provision of hard copies.
- Techniques that help the public to better conceptualize and understand information will be used. This includes the use of large-format graphs, pictures and diagrams and maps in both documents and public workshops, and brainstorming techniques at public workshops.
- Through the Tahoe Transportation District (TTD) and Tahoe Transportation Commission (TTD), the TMPO will consult with agencies and officials responsible for other planning activities within the Tahoe area that are

affected by transportation. Interactive workshops at TTC meetings will provide for due consideration of other related planning activities in the area.

Other methods that may be used:

- Flyers posted at restaurants, cafes, ski resorts, Laundromats and other community locations
- Hold brief workshops or comment sessions on transit
- Providing food, childcare and translation at meetings

For public input plans specific to each document, see Appendix C.

Evaluation and Update of the Public Participation Plan

Constituents and technology are constantly changing, so the Public Participation Plan must be updated periodically to reflect those needs. The Public Participation Plan will be updated every five years. An outreach effort based on the feedback from the previous plan will be implemented and could include surveys, public meetings, announcements at existing venues, and other outreach methods cited in this plan. At a minimum, the TMPO should seek to obtain feedback from at least two representatives of each stakeholder group, and in some cases many more. Additional feedback should be solicited through brief evaluation forms handed out at the end of public workshops and attached to surveys.

Ongoing Public Participation Forums

While each TMPO document has its own specific public participation process, there are also ongoing public forums that TMPO staff participates in and through which the TMPO has frequent opportunity to hear from and interact with the public. These opportunities provide timely information about transportation issues and decision-making processes to citizens and other affected and interested parties. Each group or board that meets is listed in the table below.

Also, from 2003 to 2008, a series of intensive workshops related to the update of 20-year planning documents in the region has been taking place. These workshops are called the *Regional Planning Process* and the *Place-Based Planning Process*. The process solicits information from stakeholder groups on what environmental, social, and economic standards should be set, and how these standards should be attained. The Place-Based Process invites the members of the public from different locations around the Lake to share their vision of the community. Both of these processes have identified major considerations related to transportation that will be incorporated into the TMPO Regional Transportation Plan.

Public Forum	Description	Included Parties
Coordinated Transit System	The CTS-MCO board combines the existing	Board members

Requesting Notice and Information

Members of the public may provide a single request to receive notices, information, and updates, by calling the Transportation offices of the Tahoe Metropolitan Planning Organization at 775-588-4547, or by visiting the TMPO website, at http://www.tahoempo.org and clicking on the "sign-up" button.

Integration with other Planning Agencies

In developing the RTP and the TIP, the TMPO works very closely with other agencies responsible for planning activities within the Tahoe Area. Since the TMPO shares its board and staff with the Tahoe Regional Planning Agency, there is a close linkage between local planning, environmental protection, and the transportation planning that goes into the RTP. In fact, much of the background planning that forms the basis of the 2008 RTP was gathered through the Basin-wide planning process called PATHWAY. This process combined the long-term planning efforts of four Basin agencies, including the Tahoe Regional Planning Agency, the US Forest Service-Lake Tahoe Basin Management Unit, the Lahontan Regional Water Quality Control Board, and the Nevada Division of Environmental Protection.

SAFETEA-LU also specifies that the planning process for both the RTP and the TIP shall include several specific groups.

- I. Recipients of assistance under Title 49 USC Chapter 53 (Public Transit Capital and Operating Assistance). The groups that receive assistance under this Chapter are the same as those entities that serve on the Tahoe Transportation Commission (TTC) and Tahoe Metropolitan Planning Organization board, who are already involved in the public planning process.
- II. Governmental agencies and non-profits that receive Federal assistance from a source other than the US Department of Transportation to provide non-emergency transportation services. The groups that receive Federal assistance for non-emergency transportation services from sources other than the US Department of Transportation are the same as those entities that serve on the Tahoe Transportation Commission (TTC) and Tahoe Metropolitan Planning Organization board, and are involved in the TMPO public planning process.

- III. Recipients of assistance under 23 USC 204 (Federal Public Lands Highways grants). Recipients of Federal Public Lands Highways are the same as those entities that serve on the Tahoe Transportation Commission (TTC) and Tahoe Metropolitan Planning Organization board, and are involved in the TMPO public planning process.
- IV. Indian Tribal governments. The Tahoe Metropolitan Area includes one Indian Tribal Government, the Washoe Tribe of Nevada and California. The Washoe Tribe is integral in major planning activities, and was active in the PATHWAY process which set the stage for the transportation strategies to be proposed in the 2008 RTP. During the public workshops and comment period for the RTP and TIP, special care will be taken to contact the Washoe Tribe and invite them to workshops and to comment on the documents.
- V. Federal land management agencies. Federal public lands in the Tahoe Metropolitan Planning area include US Forest Service lands. The Forest Service is a member of both the TMPO and the TTD, and so will be directly engaged in the development of the RTP and TIP. As mentioned above, the Forest Service was also a major participant in the PATHWAY process.

Timeline

The timeline for development and approval of the Public Participation Plan is as follows:

Announcement of Transportation Roundtables and Survey Released	February 14, 2008
Transportation Roundtables	March 11 – 12, 2008
Latino Community Outreach	March and April, 2008
Opening of Public Comment Period	March 24, 2008
Closing of Public Comment Period	May 7, 2008
TTC Recommendation to TMPO for Adoption of PPP	May 9, 2008
Approval of PPP at Tahoe Metropolitan Planning Organization Meeting	May 21, 2008

Appendix A -- Stakeholder Groups Contacted

Local Government

State Government

Federal Government

Natural and Environmental Resource Agencies

Economic Development Organizations

Churches

Lodging Associations

Homeowner Associations

Neighboring Region MPOs and COGs

Representatives of the Disabled

Social Service Agencies

The Washoe Tribe of California and Nevada

Representatives of Users of Public Transportation

Representatives of Public Transportation Employees

Representatives of Users of Pedestrian Walkways and Bicycle Transportation Facilities

Providers of Freight Transportation

Freight Shippers

Private Providers of Transportation

Transportation Management Associations

Chambers of Commerce and other local business organizations

Tourism Organizations

Citizens

Non-Governmental Organizations

Participants in the Place-Based Planning Process

Appendix B -- Outcomes of Outreach Activities

Each public forum or individual contact yielded specific suggestions for effective public participation.

North Shore Transportation Roundtable

- Distribute info to schools, and they will translate into Spanish and distribute in their newsletters.
- Papers—list the event more often than just once. One way to do this is to get the activity listed in the calendar of events.
- Advertise in transit shelters, and on buses. Make tear-off tabs on the flyers so people can take info home.
- Advertise that we will have Spanish translation at events.
- Send to the Parasol Foundation, who can forward to their list of non-profits.
- Send to ski areas, which have lots of bus users.
- Need to get the Latino community to the meetings.
- E-mail to the Place-Based list.

South Shore Transportation Roundtable

- High School kids at the workshop suggested MySpace, Facebook, and other on-line communities. They suggested that a kid design the page.
- Flyers at schools and colleges, music stores (Mad About Music), restaurants and cafes (Sprouts).

Latino Affairs Commission of City of South Lake Tahoe

- Contact churches: Iglesia de Cristo Verbo de DIOS, St. Theresa's Catholic Church, Lake Tahoe Christian Fellowship. Flyers, make announcements there.
- Flyers, talk to people in person.
- Flyers at the two Mexican grocery stores and Mexican restaurants in South Lake Tahoe.
- Put a notice in Hispano de Tahoe (free newspaper delivered to all Latino households).
- Radio—AM, Radio Azteca. Hector Vazques—Sundays 4 12 (pm?).
- Notices through the School District.

Delicia Spees, South Tahoe Family Resource Center:

The main concern of the Latino community in South Lake Tahoe is sidewalks right on Pioneer Trail.

From Place-Based Meetings:

Better web interface for reviewing documents. TRPA web is hard to use.

Tahoe Area Coordinating Council for the Disabled

- Mail them announcements
- Hold meetings in locations that are accessible for the disabled by transit. Be especially sensitive that flex routes end at 7 pm.

Jill Sarick Santos (former community member--South Shore; e-mail interview regarding outreach to Latino Community)

- Outreach to: Casinos, Ski Resorts, Family Resource Center, Churches, and the ESL program through LTCC (Specific contacts provided)
- Host a workshop with a native speaker or at least, someone fluent in Spanish to present the ideas for transportation.
- HAVE FOOD.
- · Talk with them face to face.
- · Child care for that meeting.
- Pay translators and facilitators.

Emilio Vaca (translator—North Shore; e-mailed regarding outreach to Latino Community)

- Go door to door with flyers.
- Hold specific, separate meeting with Latino Community

Kim Carr (second homeowner)

- Pull addresses out of Assessor Parcel database
- Announce through existing membership groups
- Connect with Fire Safe Councils—they have done successful outreach to second homeowners

U.S. Fish and Wildlife Service

E-mailed twice and called, did not respond.

Nevada Division of Environmental Protection

Preferred method of receiving and giving information is e-mail.

Washoe Tribe

Preferred methods for learning about public input opportunities are phone, e-mail, presentations to community groups and community meetings. Preferred methods for providing input are e-mail, mail and community meetings. They suggested a community meeting format that was a small group with community leaders and experts. Requested that the Washoe Tribe is treated like any other government (state or county) and is at the table.

South Tahoe Public Utility District

E-mail works fine. Make sure to include General Manager and Assistant General Manager in all e-mails with opportunities for commenting on transportation-related documents.

Tahoe City Public Utility District

E-mail is the preferred method for learning about opportunities and providing public input. Suggested holding open house workshops spanning workdays into evenings.

North Tahoe Public Utility District

E-mail, website, and structured presentations to community groups are the best ways to convey information.

Carson Area Metropolitan Planning Organization

E-mail is a fine way to distribute information to them.

The Tahoe Foundation ™

The Tahoe Foundation provided extensive comments on the PPP draft, and offered to host community Planning Forums at the Sierra Nevada College specific to transportation and its relationship to architecture and planning.

Appendix C -- Public Involvement Procedures Specific to TMPO Documents

Each TMPO document has a public participation process associated with it. In addition to those public input methods outlined in the "Implementation of Public Participation Input" section, the following sections give specific details on public noticing procedures, information dissemination, use of the World Wide Web, and other ways that the public is involved in the development of each document.

Regional Transportation Plan (including SCS/APS development) Public Input Opportunities

- Public workshops. At least one workshop shall be held in each county in the region for development of the SCS and RTP. The workshops will be held in central locations that are ADA accessible and accessible by transit and paratransit to the extent feasible. Workshops targeted to the Latino community will be held separately. Each workshop, to the extent practicable, shall include urban simulation computer modeling to create visual representations of the sustainable communities strategy.
- Public review of Draft RTP. There will be a minimum 30-day public comment period on the draft RTP. The Draft RTP, including the SCS, shall be circulated not less than 55 days before adoption of a final RTP. Public comment will be accepted through e-mail, written mail, and fax. If the final RTP differs significantly from the draft made available for public comment, an additional 10-day public comment period will be added for review. There will be a minimum of two public hearings on the draft sustainable communities strategy in the regional transportation plan. To the maximum extent feasible, the hearings shall be in different parts of the region.
- Amendments and Administrative Modifications. RTP amendments that trigger a conformity analysis will require a 30-day public review period. Amendments or modifications which do not trigger a conformity analysis will require a 7-day public review period.

Incorporation of Public Comments

The TMPO will incorporate public comments into the RTP during a two-month period following the close of public comment. Comments and an explanation of how they were addressed will be summarized and posted in a separate document on the TMPO website. If the final RTP differs significantly from the draft made available for public comment, an additional 10-day public comment period will be added for review.

Transportation Improvement Program

Public Input Opportunities

- Public input for the development of the TIP will be held through TTC meetings. All interested parties
 will be provided with a reasonable opportunity to comment on the TIP and the TMPO will provide at
 least one formal public meeting during the TIP development process to solicit public input. The
 meetings will be held in central locations that are ADA accessible, during the regularly scheduled
 Friday morning meetings of the TTD and TTC.
- Public review of Draft TIP. There will be a minimum 30-day public comment period on the draft TIP.
 Public comment will be accepted at regularly scheduled TTC meetings and through e-mail, written
 mail, and fax. If the final TIP differs significantly from the draft made available for public comment,
 an additional 10-day public comment period will be added for review. The Final TIP will be
 presented to the TMPO Governing Board for formal adoption.
- Approved Administrative Modifications to the TIP will be available to the public via the TMPO website. Hard copies of the amendment will be available upon request.
- TIP Amendments will be presented at the TTC for review and comment. There will be a minimum 7-day or maximum 30-day public review period depending on the type of amendment. All comments will be assessed and documented. Amendments will be presented to the TMPO Governing Board for final adoption. Amendments will be noticed and available on the TMPO website.

Amendment Types:

- Amendments requiring a New Air Quality Conformity Analysis: 30-day public review and comment period
- Amendments that rely on the **Existing** Air Quality Conformity Analysis: 7-day public review and comment period
- Amendment containing only **Exempt** projects requiring no additional Air Quality Conformity Determination: 7-day public review and comment period

Incorporation of Public Comments

The TMPO will incorporate public comments into the TIP during a two-month period following the close of public comment. All comments and an explanation of how they were addressed will be listed as an appendix to the TIP, which may be posted separately on the TMPO website. If the final TIP differs significantly from the draft made available for public comment, an additional 10-day public comment period will be added for review.

Overall Work Program

Public Input Opportunities

- Public input on the development of the OWP will be accepted at regularly scheduled TTC meetings.
 The meetings will be held in central locations that are ADA accessible, at the regular Friday morning TTD/TTC meeting time.
- Public review of Draft OWP. There will be a minimum 30-day public comment period on the draft OWP. Public comment will be accepted at a TMPO meeting and through e-mail, written mail, and fax.

Incorporation of Public Comments

The TMPO will incorporate public comments into the OWP during a two-week period following the close of public comment.

Public Participation Plan (PPP)

Public Input Opportunities

- Public workshops. Public workshops will be held in combination with other transportation planning workshops. The workshops will be held in central locations that are ADA accessible and accessible by transit and paratransit to the extent feasible.
- Public review of Draft PPP. There will be a 45-day public comment period on the draft PPP. Public comment will be accepted through e-mail, written mail, and fax.

Incorporation of Public Comments

The TMPO will incorporate public comments into the PPP during a two-week period following the close of public comment. An appendix will summarize public comments and how they were addressed.

Periodic Review of Public Participation Plan

Every five years, with adoption of the RTP, the TTC and TMPO will conduct a review of the Public Participation Plan to ensure effectiveness of procedures and to ensure a full and open participation process.

Coordinated Human Services Plan (CHSP)

Public Input Opportunities

 Public workshops. Public workshops for development of the Coordinated Plan will be held through TTD/TTC meetings. The workshops will be held in central locations that are ADA accessible, during the regularly scheduled Friday morning meetings of the TTD/TTC.

- Public review of Draft Coordinated Human Services Plan (CHSP). There will be a minimum 30-day public comment period on the draft CHSP. Public comment will be accepted at a TTD meeting, Tahoe Area Coordinated Council for the Disabled meeting and through e-mail, written mail, and fax.
- Unmet Transit Needs Hearings are held bi-annually. One will be held on the North Shore of Lake Tahoe and held in conjunction with Placer County and the other on South Shore. The hearings will be held in central locations that are ADA accessible and at times accessible by transit and paratransit.

Special Planning Studies

Public Input Opportunities

- Depending upon the scale of the project, public workshops are often held to inform the public and receive feedback on project alternatives. The workshops are held in central locations that are ADA accessible, usually in the evening or at a time convenient for affected groups.
- Public review of draft studies. There is a minimum 30-day public comment period on draft studies. Public comment is accepted orally at workshops, through e-mail, written mail, and fax.

Incorporation of Public Comments

The TMPO incorporates public comments into the study drafts following the close of public comment. Summaries of comments received and how they were addressed are posted on the TMPO website.

Appendix D – Summary of Public Comment

Date	Provided by	Comment received	Page number or section in final version	How this comment was addressed		
First Draft						
9/7/2007	David Kelly, TAACD	Add that the TACCD promotes senior housing and bike paths	p 17	Incorporated		
9/19/2007	John Greenhut, City of South Lake Tahoe	I would suggest that you provide a definition section for the funding sources so that the casual reader knows what the acronyms mean, where the funds are derived, and how they can be spent.	p 20	Funding source references were expanded slightly to explain what they can be used for. Decided not to devote more of the PPP to funding guidelinesthis is not the purpose of this document.		
Second Dra						
Second Dia	an 					
4/28/2008	Steve Teshara, At-Large Member, Board of Directors, Tahoe Transportation District/Tahoe Transportation Commission; Chair, Truckee- North Tahoe Transportation Management Association; Chair, South Shore Transportation Management Association	Please note that the correct name for the Truckee North Tahoe TMA is: Truckee-North Tahoe Transportation Management Association (not Transit)	p 4	Incorporated		

4/28/2008	Steve Teshara	The core membership of the Tahoe Transportation Commission is the Board of the Tahoe Transportation District. You may wish to note this fact in paragraph two. Also note that the membership of the TTC includes the At-Large position (also on the TTD Board) and a representative of the TRPA Advisory Planning Commission (APC). The reference to the TMA's should be that they are transportation management associations (not transit). Note that the California and Nevada DOT members of the TTD and TTC are ex-officio (non-voting).	р 6	Incorporated
4/28/2008	Steve Teshara	It is my understanding that (as of FY-2007), development of a Coordinated Human Services Transportation Plan is also a requirement of SAFETEA-LU. Accordingly, the CHSTP should be included in the list of documents required in paragraph three.	p 6	Incorporated

		In reviewing the draft CHSTP (March 2008), the purpose appears broader that the current description on page 11. On page 4 of the draft CHSTP is the statement: "Transportation		
		human public transportation plan could eventually unify all		
		transportation services offered		
		by public transit, private		
		companies, non-profit and human services agencies." I am		
		not clear if the CHSTP planning		
		process must, by definition, be		
		incorporated into the planning		
		process for all other public		
		transit services. It would be		
		helpful if both the Public		
		Participation Plan and the		
		Coordinated Human Services		
		Transportation Plan were clear		Added that all public transit planning
4/28/2008	Steve Teshara	on this issue.	p 11	processes should refer to the CHSP.

		Resort Triangle Transportation		
		Planning Coalition (RTTPC).		
		Please change the RTTPC		
		description to read as shown		
		below, and adjust the list of		
		"Included Parties" (taken from		
		the executed RTTPC MOU): A		
		multi-agency coalition whose		
		function is to coordinate, plan, program, monitor and implement		
		capital and operational projects		
		in the North Lake Tahoe-		
		Truckee "Resort Triangle."		
		Included Parties: Member		
		(MOU) Organizations: Placer		
		County, Placer County		
		Transportation Planning		
		Organization, Town of Truckee,		
		Nevada County Transportation		
		Commission, Tahoe Regional		
		Planning Agency. Note: RTTPC		
		has a Technical Advisory Group		
4/28/2008	Steve Teshara	(TAG) (listed members of TAG).	p 17	Incorporated
		Tahoe Transportation District.		
		The description of this "public		
		forum" should note that the TTD		
		was specifically created in		
1/00/0000		Article IX of the Compact (PL-	10	
4/28/2008	Steve Teshara	96-551).	p 18	Incorporated

4/28/2008	Steve Teshara	You may also wish to note that Article IX was amended in 1997 by "substantively identical enactments" approved by California (Senate Bill 815) and Nevada (Senate Bill 24). The primary purposes of the amendments was to: 1) include private sector representation on the TTD Board; and 2) to expand TTD1s capabilities to include the authority to "own and operate support facilities for public and private systems of transportation or facility owned by a county, city or special purpose district or any privately owned transportation system or facility within the region."	p 18	Not incorporatedPPP is not designed to provide this level of detail
4/28/2008	Steve Teshara	Adjustments to the summary list of Board members should be made, consistent with previous notations in this letter.	p 18	Incorporated
4/28/2008	Steve Teshara	On this and several other pages, reference is made to the PATHWAY 2007 planning process. I believe the correct current reference to this planning process is PATHWAY. The name no longer includes a reference to the year 2007.	p 19	Incorporated

4/28/2008	Steve Teshara	For purposes of clarity, please reference the specific type of assistance provided under Title 49, USC Chapter 53 (page 19, # I); also, please reference the specific type of assistance provided under Title 23, USC Chapter 204 (page 20, # III). Note, these are the transit and highway titles, respectively.	p 20	Incorporated
4/28/2008	Steve Teshara	Please add the following Stakeholder Groups to the list of those contacted: Chambers of Commerce and other local business organizations, Tourism organizations, Transportation Management Associations	p 22Appendix A	Incorporated
5/7/2008	Wade Hobbs, FHWA CADO Planning Team	Concerning the discussion of the Federal Requirements for Public Participation on Page 8 of the PPP Document. In the first sentence of the first paragraph under the first bullet titled Safe, Accountable, Flexible I recommend that the sentence be revised to read: "SAFETEA-LU states that the Metropolitan Planning Organization (MPO), in consultation with interested parties, shall develop"	р 8	Incorporated

5/7/2008	Wade Hobbs	Appendix C – The appendix title in the TOC and the title in the appendix are different, You may want to consider removing the word 'plan' from the title in the actual appendix to be consistent with the title in the TOC.	p 2	Added the word "Plan" to the Appendix C line of the Table of Contents.
5/7/2008	Art George, Tahoe Transportation Commission Board Representative to the Washoe	Please extend the comment period for both drafts of the Public Participation Plan as well as the Coordinated Human Services Transportation Plan. There is not adequate time to get these drafts to the number of Washoe Tribal Members who are impacted by these issues. We would greatly appreciate your serious consideration of this request.		The 45-day comment period is longer than most comment periods on planning documents.
5/7/2008	Alexandra Profant, Founder/Director, The Tahoe Foundation ™	The name, "Public Participation Plan" is vague. Suggest changing to "Public Opportunities to Participate in Transportation Planning in the Tahoe Basin MPO"		While we agree that the name does not convey the full scope of the document, we feel that it is concise, and follows federal guidelines. We do refer to the plan as the "Transportation Public Participation Plan" whenever possible to clarify that this document relates to transportation planning.

		In the Introduction paragraph it would be helpful to outline how Public Opportunities to Participate in Transportation Planning in the Tahoe Basin MPO effects such things as land		Added to Introduction, second
		use/zoning, building allocations, and the ability to compete with other areas for money to fine tune or enhance existing service		paragraph: "A clear planning process that facilitates a high level of public participation ensures well-prepared planning documents, which can then
5/7/2008	Alexandra Profant	and/or change/add different service opportunities.	p 5	line the region up for funding and other opportunities."
5/7/2008	Alexandra Profant	Also, to acknowledge the complexity in the unique planning process.	p 5	Added to Introduction, fourth paragraph, that one of the goals of this document is "to make clearer the sometimes complex planning process".
5/7/2008	Alexandra Profant	There is no mention of the TTD in the Introduction.		It is not appropriate to mention the Tahoe Transportation District (TTD) here.
5/7/2008	Alexandra Profant	There is no definition sectionto define the terms "Planning", "Transportation Planning", "Implementation", "Plans". It would be helpful to laypeople to define these concepts and how each apply to which certain outcomes. For instance RTP Plan> participation> Outcomes	p 10	Added to introductory paragraph on this page: "Public input is a vital component of each of these documents, and ultimately results in needed improvements to Lake Tahoe's transportation system."
5/7/2008	Alexandra Profant	There is no organizational chart.		The TMPO will consider adding an organizational chart to its website, which will undergo an overhaul in the next year.

5/7/2008	Alexandra Profant	ADA. It would be helpful to point out that in Nevada a disabled person who can utilize paratransit has to be designated disabled by an MD.		This is not within the scope of this plan.
5/7/2008	Alexandra Profant	Appendix A: Stakeholders. I would like the Tahoe Foundation ™ to be mentioned, if not specifically, then in a separate APPENDIX with others who contact you.	p 22, p 25	Added "Non-Governmental Organizations" to Appendix A, added The Tahoe Foundation ™ to Appendix B and noted some of the communication from the comment letter.
5/7/2008	Alexandra Profant	To include the names, addresses, and phone numbers to the offices we as constituents need to contact to further our participatory efforts is paramount to include in this plan.	p 1, p 19	Included TMPO address, phone, and fax
5/7/2008	Alexandra Profant	The public comment period to respond to this draft needs to be extended.		The 45-day comment period is longer than most comment periods on planning documents. Also, extensive solicitation of input into the public planning process began in mid-February.

Appendix E -- Survey Results

Public Participation

1. What group/groups do you consider yourself to represent?				
		Response Percent	Response Count	
Public agency		21.1%	57	
Public Transportation Employee		4.4%	12	
Freight shipper		1.1%	3	
Provider of Freight Transportation Services		1.1%	3

Through which methods would you be interested in learning about public participation opportunities/providing comments for the RTP and/or FTIP? (check all that apply)

- TACCD
- Flyers posted in key locations around town and at bus stops
- Pathway 2007 and LTFAC meetings
- Need easy access in an interactive way so I don't get too bored.
- Video Conference
- REQUIRE VALID ID FOR BLOG AND EMAIL, NAMES!
- Memorandum
- Surveys like this

Do you have any other suggestions for involving the public in local and regional transportation planning and programming?

AREAS FOR PARKING

Ask people to make suggestions as to what they think should be done to improve transportation. I found that pathway 2007 meetings often didn't provide a place for people to make suggustions. I would go to meetings wanting to suggest something and found no place or time to do that.

Better public transport up and down Hwy 50. More regular routes, MODERN, natural gas buses with open space inside, and clean so guest will use. Much more frequency (every 15 minutes at standard stops) to get more ridership. Perhaps FREE service??? This is the method in Park City UT, Breckenridge, CO and others. Why cant we make our services free with govt subsidies for public transport?

Community Meetings are most effectual. Advanced noticing of at least 2 weeks and holding them in the evenings

Community meetings seem to be the best forum for obtaining commmunity input, but varied times would be nice for people that work so that more people could attend. Also, providing transportation solutions for those who have difficulty getting to the meetings.

Continue to involve public and private sectors to plan and operate high quality, service oriented, and cost efficient public transit, that is sufficiently convenient and nice enough to compete with the private automobile --- and that reduces road congestion and is more healthy for the environment.

COOPERATION -- Less talk, more action

Educate the public on Dual-Mode Guideway System Capacity and State Evacuation Systems

Get the kids involved, they are going to need to make these changes

Hold specific meetings about cycling in-around the Tahoe Basin

Hold workshops/or brief comment sessions on transit (of all types) so you reach the transit user community. This has been good PR for us, and insight.

Interactive website

More bike and ped paths and connections

More publicity via the local media. If locals don't know about the meetings, they won't show up with their opinions and input. Surely, that's not a good idea.

Need to find ways to capture those who don't live in urban core areas. For example, Meyers residents. Most transit related focus has been on the more developed areas, so people in less developed areas may be less apt to pay attention.

need to involve/engage second home owners by creating mroe options for them to 'leave car at home" when they visit Lake... think bus, van, train, smart carpool/ridesharing... and then providing incentives for such behavior (think parking fees, free bus passes, free drink vouchers

at bars, dollar off coupons from merchants...let's reward those sacrifice the convenience of the car

Need to serve late hour employees and area visitors

Notices/questionnaires (English/Spanish) on buses and posted in bus stop shelters.

Please make sure the Washoe Tribe is treated like any other government (state or county) and is at the table.

Posters in stores, restaurants, ski resorts

Postings of meetings at public locations (such as the post office). Attach a loudspeaker to a car and visit the neighborhoods in the evening.

Provide food

Public education such as newspaper articles

Reach our visitor markets (Sacramento and Bay Area, Northern Nevada) in addition to local needs/concerns.

Sidewalks and bike paths/lanes have long been the facilities most requested by the community.

Some of the money TRPA is paid needs to go to the locals.

Study of Light Rail

survey tourists seasonally survey residents and tourists about parking needs

use local groups to help educate and increase involvement in planning

We need to get the community excited about its design and meet their needs so it becomes something for them, not only for those who live outside the community (visitors, service workers, etc). We must make it fun, fast, frequent, friendly and for us all! It needs to be part of what we are most proud of here in the Basin and each community must have local transport that really works if we expect regional and intraregional transportation to be successful. Let's be remembered for our outstanding transportation system which is designed for and by those who want to use it, will use it and also those who don't know at this time how proud they will be of it and WILL want to use it because it works!

What needs or gaps in service do you recognize for elderly, disabled or low income transit riders?

1) Curb to curb public transit is sometimes impacted so heavily that our developmentally disabled consumers are unable to use it reliably for work. 2) Access to county is limited.

All gaps. Not enough frequency, terrible buses. Bad service overall.

BLUE GO is a horrible name for our bus service. It should be called something like "Public Bus". People don't even know that it's a public bus. Bus routes should be posted at bus stops. Bus stops should have shelter from the weather. Sidewalks to the bus stops should be plowed in winter. DUH!! Bus stops should have a place where the bus can pull out of the traffic lane so that the bus doesn't cause traffic jams when it stops to load or unload people.

Blue Go is simply not user friendly enough. Even getting to bus stops is very difficult in the winter.

Distance to bus stop. Snow removal. No sidewalks in winter. Pedestrians forced to battle the cars walking in the road. Get splashed with road slush. No service to Stateline/Meyers.

For low income workers, the housing to job distance, and lack of service external to Tahoe. For other user groups, there are probably unmet needs. Our service is minimal to Tahoe and unable to become any sort of gap to such needs.

Getting to Site locations and their accessibility

Increase in service hours would be helpful, as well as improvement of service connections in the Truckee area.

Irregular transportation hours. Needs to be more routine so the bus can be used at all hours. Lack of regular public transit in South Lake Tahoe. Dangerous for cyclists and walkers on Hwy 50

lack of service after dark, especially in winter lack of service that goes all the way around the Lack of service to Reno and Carson City

Lack of timely transportation to and from work. It currently takes too long to make connections between routes to easily get to work.

lack of walkable community in the North Shore for able or disabled pedestrians

late hour employee transit

Limited hours of service for Blue Go Door to Door outside the city limits.

limited routes in the community and limited after hour service and horrendous maintenance of current transit busses

need later door to door service for disabled public riders. now the cut off time is 6PM for Blue Go.

Night time service in El Dorado County. West slope links to Tahoe. Reduced headways on fixed route service

Nights year round; Lighting.

NO WALKWAYS -- do the Hwy 50 project, PLEASE.

PARKING

poor or no sidewalks for walking, sierra house school gets very upset about walkers interfering with car traffic

Possibly need more options for those outside of urban core areas. I don't know enough about services to really identify gaps for these groups.

public transit for the region

Return to Door-to-Door service and extend hours of operations.

services are not equal to what these people receive in the other parts of Washoe County.

sidewalks. snow removal. visually attractive transit vehicles. alternative fuels transit vehicles.

TART provides absolutely no services inour community for senior, disabled or low income transit riders.

TART stops in the winter are not cleared well and streets in Kings Beach do not have sidewalks and are unsafe to walk to the TART stops.

The best option for elderly or disabled is oftne special paratransit or taxi

The overall services could be improved. Clients have had many complaints over the years.

There are many needs for tribal members, especially because so many are low income and can not afford to have a car. There are many tribal members who work in Dresslerville but have trouble getting back to their homes in Carson City or Woodfords. Public transit to provide transportation to down-town areas may help more people enter the workforce.

Too costly, lack of area coverage, no security and lack of cargo and wait times!

Twice daily transport to Reno for employment and/or shopping.

Very poor transportation here at the Lake

We are a private sector charter company. We get many calls for service from Sacramento to Lake Tahoe. Since Greyhound canceled its service there are no transit or schedule buses to the region. We offer only day trips in to a casino. Karen: I can only help with knowledge we have that people wanted public transportation to Lake Tahoe have no options. If they can't drive a car, they can't get there. If the agency had a pick-up from Placerville in the AM and return in the PM, it might meet this need.

We could do the Tahoe Loop easy enough, we need an effective branch to our lesser covered routes

We need local transportation to be free to the riders and work out some other manner of funding to support it!

We need to get pedestrians and wheelchair-bound people off of highway 50 and onto sidewalks or busses.

What types of transportation would residents be likely or very likely to use that is not provided?

1) sidewalks with street lights, maintained year round for pedestrian use, 2) park and ride lots for users of Amtrak and South Tahoe Express bus services, 3) park and pool lot in Meyers for outdoor enthusiasts

1/2 hour buses

A boat transportation system to get people around the lake.

a bus or two that circle the lake in a clockwise direction.

A Bus to and from Meyers

A light rail system

a more reliable bus system for locals and tourists

a variety of local choices that are frequent, free, and access according to need

Air transportation into and out of the Lake Tahoe area.

Better bike lanes, an efficient bus or van system

Better bus stops and sidewalks

bicycle lanes would facilitate greatly

bicycle trail on West Shore (Homewood to South Lake Tahoe) and in Crystal Bay

Bicycle, if safe bike routes available

Bike if better paths/sidewalks are provided. I live 5 miles from work but won't ride because of winter-caused narrow roads and lack of paths.

Bike if the bike lanes were better.

Bike if there was a separate bike path.

bike path around lake public transit around the lake public transit to Reno and Carson City

Bike path network

Bike paths

bike paths

Bike Paths and Bike Lanes

Bike Routes, if there were more bike routes, residents would choose them over driving.

bike trails

Bikes

Bikes, bikes bikes

Bikes, on a safe, well-planned, and integrated bicycle path system. Walking on snow-plowed pedestrian paths. Buses or light rail if it was convenient, timely, and inexpensive. Since this is my chance to comment, I would like to see the TMPO enforce that bicycle paths that are part of the Tahoe Regional Bicycle and Pedestrian Plan, be built out when NDOT and Caltrans do road improvement and water quality projects in the Tahoe Basin.

Bikes, walking

Bikes, with safe bike paths interconnecting all points; comprehensive coverage of public transportation

boat shuttle

boat transit. bus transit that is more frequent, on time and reliable

Bus

bus - nearest bus stop is 2/3 mile from my house

bus line to Meyers...

Bus services that run later in the evening

Bus, bike,

Connections from Kingsbury Express. Tahoe Youth and Family Services clients are users of public transportation regularly. The transportation barriers create barriers to receiving services and being consistent. Please come to the Lake Tahoe Collaborative, a meeting of human

services agencies each 2nd Monday at 1 pm at Al Tahoe.

consistent free or reduced cost shuttle services between visitor opportunities such as from Tahoe City to Squaw valley etc

Door-to-Door, Destination-to Destination

Dual-Mode Guideway Vehicles and Guideway Systems, because a six foot wide Guideway replaces twelve lanes of highway traffic! You save \$110 Million dollars for every mile you implement!

efficient economic bus service to and from the reno airport from incline; current taxis and shuttles are too expensive

expand bus service/public trans to meyers and xmas valley

expanded bus service (more frequent service going later in the day). year-round clear bike paths for walking/biking

Expanded public transit -- higher frequency (in particular) and longer hours of service Cleared sidewalks and multiuse paths in winter

Free bus service on modern, natural gas buses.

Free or low cost buses

Free, consistent (timing) transit service

Free, frequent jitney or bus service to key points of interest.

Frequent dependable service.

frequent, free, and far reaching public transit, like buses or small vans

Getting people out of their cars is going to be extremely difficult in Lake Tahoe. This area is not built for public transportation.

home/destination pick-up (seniors/disabled), casino workers bus service, elevated light rail hybrid buses

If sidewalks and bike lanes were kept clear in winter, more people would bike for longer portions of the year.

I'm not sure you want to exclude visitors

inexpensive bus scheduled for 8AM 5 PM an Casino shift change times

Just more frequent and organized service to places like Meyers.

late night employee transportation

Light rail down the center lane of Hwy 50

light rail?

modern buses that run on time and have more scheduled routes that INCLUDE the county...Tahoe Paradise, Myers, Christmas Valley

mono rail system along hwy 50

Monorail

Monorail

more bike paths all over the city, using bike paths for walking on east end of pioneer

More bike paths and bike lanes - if Truckee is included, especially along Glenshire Dr

More bus stop routes throughout the City

more busing, more bike lanes, more pedestrian access throughout Truckee

More complete bus service

More convenient, inexpensive local, small transit.

more fingers into the neighborhoods rather than just main roads. Also regular year round transportation over 267 between North Shore and Truckee

more frequent

More frequent bus schedule would help what is already in place

More frequent schedule of bus services. The span between the bus time schedule is not user friendly.

More frequent service, wider use of routes, more efficient buses, some network of continuous

service completely around the lake connecting on one route all communities and major recreation areas.

More frequent service; also, focus on providing more options to/from less urbanized areas. Need to provide more options during late night hours, perhaps with a focus on weekends, for those staying out late, including tourists. Many options I've heard of tend to end well before midnight. Bike lanes (Class 1) should be provided along every highway as possible. For example, when Caltrans did work along hwy 50 between Meyers to the Y, they could have added a bike lane off to the side, providing a safer option for bicycle travel than what currently exists. This would likely be used by many Meyers/Xmas Valley residents. This is just one example of where highway projects are done without using the opportunity to add bike lanes. Need emphasis on clearing paths for bikes/peds in the winter months.

more frequent shuttles

MORE MORE. that's what is needed, more bus routes, availability, access etc. Cable cars, something cute

More regular bus service that goes into the evenings. Late night bus between N Shore/Truckee and vice versa. We need to get the ferry to happen. Transit has to be "cool" for visitors to use it and if it's regular enough for visitors then it will be more than sufficient for workers.

More ski shuttle stops along pioneer trail between ski run and highway 50

motorcycle,running,taxi

North Lake Tahoe - South Lake Tahoe North Lake Tahoe - Reno

North shore to Carson Valley or Reno

north to south and vice versa shuttles

Off Road Bike Trails Buses on more frequent schedule

On occasion, I would use a bus or some coordinated carpooling from Stateline to Incline Village.

Open-Ended Response

Overhead Gondola from one end of town to the other

Programs similar to Citi Lift provided by the RTC in Reno and Sparks

public transit from Meyers to South Lake Tahoe scheduled to run on 15 or 30 minute intervals...

recreation based transit - buses equipped with bike racks, kayak carriers, etc. that circulate and stop at key beaches

regional public transit

regular cost effective services that provide easy access

Regular transport from North Shore to South Shore. Regular, clean, and cheap Hwy 50 transport. Regular transport from outside the basin to inside the basin to reduce traffic, emissions, and NPS pollution. Regular public transport to the Bay Area in a dreamworld.

Relative to other towns/cities/regions, there are no major new transportation options that residents are not being offered. The land use pattern of Tahoe does not provide cost effective options for residents, especially given changing demographics, and job to work locations.

Safe contiguous sidewalks of standard width with benches for resting and free of snow in the winter.

Safer means of walking and biking to work. Sidewalks and bike trails that are clear of snow and connect our communities more strategically. It is a crime that our most financially challenged members of our communities have to take their lives in to their hands every time they walk to work or walk to get groceries. Priorities should be identified for our neighborhoods that have the greatest need for pedestrian amenities based on income, proximity to transit stops, businesses and schools.

service off pioneer blvd. Car pooling

Shuttle to work and back. I'd use a train if one was available, but that seems like just a dream.

Side Walks

Side walks for walking, bike lanes, short loop consistent and reliable small buses for residents and tourists, mass transportation from Reno and Sac for tourists etc.

sidewalks sidewalks!

SIDEWALKS

Sidewalks and cohesive and connected bike path system and bike lanes

Sidewalks for walking on. Better bike trails. Better bus transportation to the neighborhoods. sidewalks in entire city area....cleared in winter... and safe bike lane...with NO bikers on highwayl

sidewalks, bike paths/lanes, low cost, efficient public transit

Since my home is located in the county not the city, it would be helpful for blue go to have home pick up in the county

ski lifts from parking in tahoe city to ski areas!!!

Some form of bus or train from Sacramento to Truckee, with wi-fi, safe, costing maybe 15 or 20 bucks and with free shuttle to Tahoe City plus positive incentives in form of coupons, vouchers, etc. or negative incentives in form of toll on private car (eg at Squaw Valley along river road) once they arrive at Lake.

Sr. Vans to Doc. Visits Door to door vans in County area Keep Blue Go expand to County area where there is no service out beyond Meyers

summer: electric open air cable/bus, similar to what is offered, additional routes and equipment

There is no transportation provided in the Keys. bus service from the business park at Venice and Keys Blvd or 15th street and 89 for instance might be frequently used.

there is only bus transit provided so there is not much of a choice. My clients would use bike lanes, sidewalks, crosswalks, pretty much anything that will SAFELY get them from point A to point B and none of those options exist in Kings Beach.

Train, Vanpool

transportation to work or school outside of regular business hours.

Ultimately, people will be using cars to get around. Developing bike trails, carpooling, buses, boat travel, etc., will not solve any of the issues because of the way people travel and recreate. I would be curious to know how many of the people involved with this effort actually utilize alternative transportation methods - I suspect a few do, but the vast majority do not, which says something.

Unless the Counties are willing to commit endless streams of dollars to public transit it will remain unreliable and unuseable.

water shuttle

water taxi more and better bike trails public transit focused on specific events

waterborne

Waterborne

Waterborne around the lake

We need an infrastructure that reflects our values as an environmentally aware community of outdoor enthusiasts. This means improved bicycle and pedestrian paths.

Well demarcated bike lines and sidewalks seem like a good place to start. It's incredible that we have folks walking down Hwy 50 or Pioneer with no sidewalks in the year 2008. It is very unsafe and arguably racist/classist for the working people in our community.

What types of transportation would residents be likely or very likely to use that is not provided? year-round transportation that serves the entire basin

COMMENTS

PUBLIC COMMENTS

DATE	PROVIDED BY	COMMENT RECEIVED	RESPONSE
8/17/12	Pam Brunnmeier, Caltrans	A new SHOPP Storm Water Mitigation was just approved in the SHOPP/CTIPS. The print-out is attached below. The PM would like to begin PE work as soon as possible, so this would need to go in both the 2011 and upcoming 2013 FTIP's. At the very least, if the PE could get programmed in the 2011 FTIP and then the entire project in the 2013 FTIP, that would work for us.	Added project to the 2011 and 2013 FTIP.
8/17/12	Abhijit Bagde, Caltrans	Page 7, 7.2: Please note that TMPO's executive director has delegated authority from Caltrans to approve administrative modifications for the FSTIP	Note added.
8/17/12	Abhijit Bagde, Caltrans	Page 8, paragraph 4: Remove reference to HES program . Add Highway Safety Improvement Program(HSIP), High Risk Rural Roads Program (HRRR) and Safe Routes to School (SRTS) Program	Removed HES and added HSIP, HRRR, and Safe Routes to School.
8/17/12	Abhijit Bagde, Caltrans	Include draft board resolution.	Included board resolution.
8/17/12	Abhijit Bagde, Caltrans	Include language regarding TMPO's administrative modification process.	Added language.
8/17/12	Abhijit Bagde, Caltrans	Provide the financial summary in the electronic format(see 2013 FSTIP Resources section under link below) when submitting final 2013 FTIP to Caltrans.	Sent electronic format to Gwyn Reese on 7/18/12. Will send electronic format to Caltrans Oct 1.
8/17/12	Abhijit Bagde, Caltrans	Please confirm if "CA State Funds" identified in the Revenue-Appendix are the RSTP State Exchange funds.	The CA State Funds are not RSTP funds.
8/17/12	Abhijit Bagde, Caltrans	TMC0203: Projects with the construction cost (excluding support costs) and /or the right of way cost (excluding support costs) more than \$1 million, all STIP-IIP or RIP funding portion of the project shall be programmed with 100% "STIP-AC" fund type.
