

# TAHOE METROPOLITAN PLANNING ORGANIZATION FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM

FINAL September 2016

# 2017 FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM Fiscal Years 2016/2017 – 2019/2020

Tahoe Regional Planning Agency Tahoe Metropolitan Planning Organization PO Box 5310 128 Market Street Stateline, NV 89449

Final

September 2016

#### **TRPA/TMPO** Governing Board

Casey Beyer, Chair	Governor of California Appointee
James Lawrence, Vice Chair	Nevada Department of Conservation and Natural Resources
	Representative
Shelly Aldean	Carson City Representative
Marsha Berkbigler	Washoe County Commissioner, District 1
Tim Carlson	Presidential Appointee
Elizabeth Carmel	California Assembly Speaker Appointee
Timothy Cashman	Nevada At-Large Member
Hal Cole	City of South Lake Tahoe Council Member
Nancy McDermid	Douglas County Commissioner, District 4
Barbara Cegavske	Nevada Secretary of State
Mark Bruce	Governor of Nevada Appointee
Sue Novasel	El Dorado County Supervisor, District 5
Larry Sevison	Placer County Representative
Bill Yeates	California Senate Rules Committee Appointee
E. Clement Shute Jr	Governor of California Appointee
Jeff Marsolais	USFS Forest Supervisor (TMPO Board Member)

TRPA Executive Director
TRPA Chief Operating Officer
TRPA General Counsel
Clerk to the Board

Long Range and Transportation Planning Manager

<b>TRPA/TMPO Staff Contribu</b>	itors
Judy Weber	Associate II Transportation Planner

Nick Haven

Disclaimer

The Tahoe Regional Planning Agency is the federally designated Metropolitan Planning Organization (MPO) for the Lake Tahoe Region which plans and funds transportation and transit improvements to support attainment of regional environmental thresholds. The MPO planning process is carried out by the transportation staff at TRPA and MPO actions are taken by the agency's Governing Board with an additional representative from the US Forest Service. The "TMPO" designation differentiates functions specific to transportation planning or MPO requirements.

# **EXECUTIVE SUMMARY**

The Tahoe Metropolitan Planning Organization (TMPO) 2017 Federal Transportation Improvement Program (FTIP) for the Lake Tahoe Basin is a comprehensive four-year program consisting of transportation projects for highway, transit, bicycle and pedestrian projects that receive federal funds, require a federal action, or are regionally significant. TMPO, as the federally designated Metropolitan Planning Organization (MPO) for the Tahoe Region, prepares and adopts the program every two years in conjunction with local agencies, California Department of Transportation (Caltrans), Nevada Department of Transportation (NDOT), the Federal Highway Administration (FHWA), and the Federal Transit Administration (FTA).

The Fixing America's Surface Transportation (FAST) Act is the current federal transportation bill that was signed into law on December 4, 2015 and requires MPOs to prepare and adopt a FTIP. The FAST Act funds surface transportation programs for fiscal years 2016 through 2020. It is the first long-term surface transportation authorization enacted in a decade that provides long-term funding certainty for surface transportation. The FAST Act builds on the changes made by the prior federal transportation bill and establishes and funds new programs. It mandates the states and MPOs to take a performance-based approach to planning and programming. The 2017 FTIP complies with all FAST Act requirements.

The FTIP must be updated at least every four years, covering a programming period of four years, and contain a list of projects grouped by year. The FTIP must be financially constrained by year, meaning the amount of dollars programmed to the projects must not exceed the amount of dollars estimated to be available and include a financial plan to demonstrate that the projects can be implemented and funded as programmed.

The 2017 FTIP is a short-range program that implements the long-range Regional Transportation Plan (RTP). All projects included in the FTIP must be consistent with the current RTP. The 2017 FTIP programs the Region's transportation projects over the next four federal fiscal years (FFY) 2016-2017 through 2019-2020. The projects are recommended for various stages of development during the program period. The project listings include the location and description of proposed work, the project cost, the anticipated funding sources, and the scheduled year of work. Local agencies and transportation operators must have their major projects approved in the FTIP to qualify for most categories of state and all federal transportation funding.

2017 Federal Transportation Improvement Program

# SECTION 1: REGIONAL SNAPSHOT

The Lake Tahoe Basin is a unique and sensitive natural environment, home to approximately 57,000 full-time residents<sup>1</sup>, and a destination for millions of visitors each year. Residents and visitors alike are committed to preserving the natural beauty of the Lake and surrounding areas.

The Basin is located on the border of the states of California and Nevada, between the Sierra Nevada Crest and the Carson Range. Approximately two-thirds of the Region is located in California and onethird within Nevada. In total, the Region comprises about 501 square miles including the waters of Lake Tahoe which measure 191 square miles. Lake Tahoe is the dominate natural feature of the Basin and is the primary focus of local environmental regulation to protect and restore its exceptional water clarity. Nearly 85 percent of the land area in the Lake Tahoe Basin is publicly owned and represents a major recreation attraction.

The Lake Tahoe Region contains the incorporated area of the City of South Lake Tahoe and portions of El Dorado County and Placer County, California and Washoe County, Douglas County, and the rural area of Carson City, Nevada.

Lake Tahoe and the surrounding areas provide a major recreational opportunity for residents of the nearby states. The primary market for recreation at Lake Tahoe is from northern California, mainly the Sacramento and San Francisco Bay Area. Overnight and day visitors can more than triple the Region's population during peak periods. Growth industries for the Tahoe Region include health services, green building, and environmental education. Lake Tahoe is investing in walkable, mixed-use town centers served by reliable and convenient public transit, with streets that encourage biking and walking as much as driving. The Tahoe Region has established performance measures to monitor its transportation system's performance in meeting set goals. The measures include system usage, accessibility by non-auto modes of transportation, environmental impacts, and safety. TMPO is working closely with Caltrans and NDOT to refine and enact these performance measures.

Serving the resident and visitor populations are public and private fixed route transit, shuttles, trolleys, demand-responsive services, a regional bicycle trail network, and a local and regional highway network. There are seven access points to the Basin from outside the Region. A variety of state route segments encircle the Lake. The most important of these are the three major roads that ring Lake Tahoe: US Highway 50; State Route 28; and State Route 89. These three roads connect community centers around Lake Tahoe to each other, and serve as the principal links to outside regions in both states. In addition to their important role as regional connectors, these roads serve as the 'main streets' of the Region's largest community areas. Intersecting and supplementing these regional roadways are 619 miles of local streets. These local routes include a range of facility types from urban-style arterial streets and roadways in South Lake Tahoe, California and Stateline, Nevada, many with sidewalks and bicycle facilities, to rural county roads outside of urban centers.

Public transit is provided on the North shore by Tahoe Truckee Area Regional Transit (TART), which is operated by Placer County. The TART service was rebranded in 2015 to share the name with the transit service provided by the Town of Truckee. Transit on the South shore is provided by South Shore transit operated by Tahoe Transportation District. The transit systems have incorporated a variety of public and private services, including fixed route and demand response transit, as well as neighborhood and ski shuttle services. Both the North and South Shores are additionally served by visitor trolleys, ski and

<sup>&</sup>lt;sup>1</sup> 2014 TMPO Tour Based Transportation Model

rafting shuttle services, special event shuttles, and others funded by a combination of public and private funds. North Lake Tahoe Express and the South Tahoe Express provide shuttle service to the Reno Tahoe International Airport.

The TMPO is charged with implementing a continuing, comprehensive, and cooperative transportation planning process among states and local communities. The core mission of the TMPO, consistent with the goals of the Tahoe Regional Planning Agency (TRPA) and the Regional Transportation Planning Agency (RTPA), is to establish a safe, efficient and integrated transportation system that reduces reliance on the private automobile, provides for alternative modes of transportation, serves the basic transportation needs of the citizens of the Tahoe Region, supports the economic base of the Region in the movement of goods and people, and minimizes adverse impacts on humans and the environment.

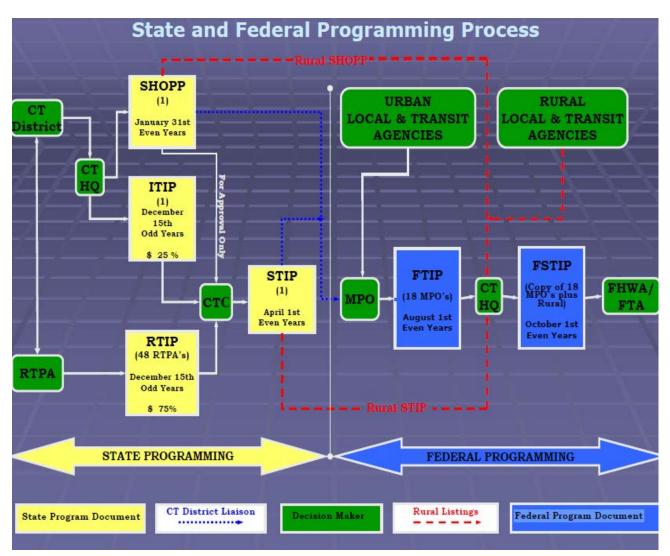

# SECTION 2: FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM

The Federal Transportation Improvement Program for the Lake Tahoe Region is a four-year comprehensive listing of surface transportation projects for the Tahoe Metropolitan Planning Organization that is consistent with the Tahoe Regional Transportation Plan and related local, state, and federal planning processes. The TMPO is the designated Metropolitan Planning Organization for the Tahoe Region. The FTIP is prepared by the TMPO in accordance with the current Public Participation Plan and through cooperation with Caltrans, NDOT, FHWA, FTA, local transit operators, local agencies, and the general public. The FTIP is a primary feature of TMPO's continuing, cooperative, and comprehensive transportation planning and programming process. Input and coordination is sought and obtained at all levels.

The document is developed in accordance with the FAST Act and the United States Department of Transportation's metropolitan planning regulations Title 23 Code of Federal Regulations Part 450. Federal regulations require all transportation projects that receive federal funds, require a federal action, or are regionally significant be incorporated in the FTIP. The FTIP must be updated at least every four years, cover a programming period of not less than four years and contain a priority list of projects grouped by year. The TMPO prepares and adopts the FTIP every two years.

The 2017 FTIP covers federal fiscal years 2017 through 2020. The FTIP must be financially constrained by year, meaning that the amount of dollars committed to the projects must not exceed the amount of dollars estimated to be available and include sufficient financial information to demonstrate that projects can be funded as programmed. The FTIP provides an overall snapshot to the federal government illustrating current and pending uses of federal and state transportation funds. All projects included in the FTIP must be consistent with and included in the current Lake Tahoe's RTP. The RTP is the long range policy and planning document, whereas the FTIP is the short range implementing document that enables those planned projects to begin work. The FTIP includes the projects from the RTP that have committed or reasonably available funding. TMPO's 2017 FTIP provides a four-year list of programmed projects and project segments to be implemented over the next four fiscal years. In order to provide easy access and visualization of transportation information TMPO tracks all transportation projects including FTIP projects in the EIP Project Tracker online: https://eip.laketahoeinfo.org/Project/TransportationList

For the state of California, FTIP projects are recorded and tracked in the California Transportation Improvement Program System (CTIPS). All of the TMPO's FTIP projects, including both California and Nevada, are entered into CTIPS. The California State and Federal programming process flow chart is shown in the table below.

In Nevada, NDOT recently implemented an electronic Statewide Transportation Improvement Program (eSTIP) that includes transportation projects for the State (<u>http://estip.nevadadot.com/default.asp</u>).

The eSTIP allows the department, in partnership with local agencies, to adopt and amend the various Transportation Improvement Programs (TIPs) and the Statewide Transportation Improvement Program (STIP) electronically via a web based application. The eSTIP allows each Metropolitan Planning Organizations to manage all transportation projects that are federally funded or regionally significant in one system that is incorporated into the NDOT STIP. The eSTIP also provides an interactive public website allowing for increased transparency. TMPO enters only the Nevada projects into the eSTIP.

# **SECTION 3: TRANSPORTATION PLANNING STRUCTURE**

The Lake Tahoe Region holds federal, state, and local transportation planning authorities that do not always align due to various timing, institutional, and policy limitations. The Region's planning complexity requires the utmost coordination and collaboration among transportation and land use planning partners. The following section will attempt to describe some of the transportation planning authorities that are applicable for regional transportation planning, and a brief description of the transportation-related entities that have a role in the policy or technical decision-making process.

# 3.1 Tahoe Regional Planning Agency

The Tahoe Regional Planning Agency is a unique bi-state agency established by a Compact between the states of California and Nevada and ratified in public law by the U.S. Congress. The original Compact was approved in 1969 (Public Law 91-148). It was revised in 1980 (Public Law 96-551). The Compact's essential purpose is to protect and restore the environment of the Lake Tahoe Basin, maintain the equilibrium between the Region's natural endowment and its manmade environment, and preserve the scenic beauty and recreational opportunities of the region. TRPA is governed by a body of seven voting members from California and seven voting members from Nevada. There is also a nonvoting federal representative, for a total of 15 board members. With the addition of a representative from the United States Forest Service, the TRPA Board serves as the Board of the Tahoe Metropolitan Planning Organization (TMPO). The TRPA Board meets monthly and its meetings are open to the public, including those sections of any TRPA meeting during which the Governing Board acts as the TMPO and the Regional Transportation Planning Agency for the California side of the Tahoe Basin (See 3.3 below).

# 3.2 Tahoe Metropolitan Planning Organization

The Tahoe MPO was authorized by Congress in the Transportation Equity Act for the 21st Century (TEA-21), Public Law 105-178. Based on subsequent required actions taken by the States of California and Nevada and local governments in the Region, TMPO was formally launched on July 1, 1999. As the federally designated transportation planning agency for the Tahoe Region, TMPO is responsible for taking all actions under federal regulations required of metropolitan planning organizations. TMPO's defined area of jurisdiction is concurrent with that of the TRPA. The TMPO Board is comprised of the fourteen voting members of the TRPA Governing Board and a voting representative of the United States Forest Service. The TMPO's role is to provide planning, funding, and technical assistance that encourages a transportation system that is multi-modal and sustainable. TMPO Board meetings are conducted as part of TRPA/TMPO meetings. These meetings are open to the public.

It is important to note that these two governing bodies, although they include many of the same representatives, have diverse responsibilities. The TRPA's overriding obligation is adherence to the Tahoe Regional Planning Compact, including the responsibility to achieve and maintain environmental threshold carrying capacity standards ("Thresholds"). The TMPO's mission is to provide policy decisions on transportation plans and programs.

# 3.3 Regional Transportation Planning Agency (California Only)

TRPA is designated in California state statutes as the Regional Transportation Planning Agency (RTPA) for the California portion of the Lake Tahoe Region. As an RTPA, TRPA must fulfill various statutory requirements, including those of the Transportation Development Act (TDA), coordination with Caltrans in the development of a Regional Transportation Plan and Regional Transportation Improvement Program, and other project-related activities. The TRPA Governing Board indicates that it is sitting as the RTPA when taking RTPA actions, but no change to the Governing Board membership occurs.

# 3.4 Tahoe Regional Planning Agency Advisory Planning Commission

The Advisory Planning Commission (APC) is established under the Compact to support and assist the TRPA Governing Board with technical and scientific issues. The 21-member body is made of up local planners, general members of the community, and other representatives who are experts in their fields. As a TRPA function, the APC does not review or act on TMPO or RTPA programming actions, but does have jurisdiction over planning issues related to the TRPA Regional plan. Each month, the APC holds open meetings and encourages the public to take an active role in the decision-making process.

#### 3.5 Tahoe Transportation Commission

The Tahoe Transportation Commission (TTC) serves as an advisory body to the TMPO Board. The core membership of TTC is the board of the Tahoe Transportation District (TTD). (See 3.6 below). The TTD and TTC boards share a membership that includes representatives from local jurisdictions, the region's two community-based transportation management associations, an at large position, and non-voting representatives from the California Department of Transportation (Caltrans) and Nevada Department of Transportation (NDOT). The TTC board includes a representative from the US Forest Service and one from the Washoe Tribe of Nevada and California. The TTC board meets on a regular basis and its meetings are open to the public.

# 3.6 Tahoe Transportation District

The TTD was established in Article IX of the 1980 Tahoe Regional Planning Compact (Public Law 96-551) as a special purpose district and given the responsibility for facilitating and delivering safe, environmentally positive transportation programs and projects, including transit operations. Its membership was modified as currently defined and its responsibilities and authorities expanded when the Legislatures of California and Nevada enacted "substantively identical" legislation in 1997. The TTD Board of Directors is comprised of representatives from the five counties within the region, the City of South Lake Tahoe, and private sector members from the South Shore Transportation Management Association (SS/TMA), Truckee North Tahoe Transportation Management Association (TNT/TMA), and an at-large member representing a public or private transportation system in the region. Caltrans and NDOT have non-voting seats on the board. TTD meets on a monthly basis and its meetings are open to the public. TTD and TMPO work closely to coordinate investments in transportation infrastructure and transit services.

# SECTION 4: CONSISTENCY WITH PLANS AND STATE AND FEDERAL PROGRAMMING

The following are key planning documents that combine to create the context within which the 2017 FTIP was developed:

# 4.1 Lake Tahoe Regional Plan

The TRPA adopted its first Regional Plan consistent with the requirements of Public Law 96-551 in 1987. The Regional Plan Update was adopted by the Governing Board on December 12, 2012. This document is required by the Tahoe Regional Planning Agency's Compact and is the overarching 20-year planning document in the Basin for the Tahoe Regional Planning Agency. The Regional Plan provides a blueprint for attaining and maintaining environmental threshold carrying capacities and balancing the environment and economy. The Plan looks to further integrate transportation and land use to create sustainable livable communities throughout the Region. The Regional Plan can be found at: <a href="http://www.trpa.org/regional-plan/">http://www.trpa.org/regional-plan/</a>.

# 4.2 Regional Transportation Plan

The Regional Transportation Plan is the conforming long-range transportation plan that meets federal, state, and TRPA requirements. The purpose of the RTP is to "...establish regional goals, identify present and future needs, deficiencies and constraints, analyze potential solutions, estimate available funding, and propose investments."<sup>2</sup> The RTP includes both long-range and short-range strategies that lead to the development of an integrated multi-modal transportation system that enhances the quality of life in the Tahoe Region, promotes sustainability, and facilitates the safe and efficient movement of people and goods. The RTP is currently being updated and is targeted for a December 2016 adoption. The 2017 FTIP incorporates projects from the RTP. The Regional Transportation Plan can be found at: http://www.tahoempo.org/planning.aspx?SelectedIndex=1.

# 4.3 Sustainable Communities Strategy

California's Senate Bill 375 (SB 375) calls for each metropolitan planning organization to develop a Sustainable Communities Strategy (SCS) identifying the transportation, land use, and housing strategies that will reduce regional Greenhouse Gas (GHG) emissions. TMPO's RTP sets forth a forecasted development pattern for the Region, which, when integrated with the transportation network will reduce greenhouse gas emissions from automobiles and light trucks to achieve greenhouse gas emission reduction targets approved by the state.

# 4.4 Public Participation Plan

TMPO's Public Participation Plan was recently updated and approved by the TMPO Board on July 26, 2016. The purpose of the Plan is to ensure that public participation is an integral and effective part of TMPO's activities. Consistent public outreach and input is one of the most important foundations for developing transportation planning, programming, and project delivery documents and investments.

<sup>&</sup>lt;sup>2</sup> 2010 California Regional Transportation Plan Guidelines, California Transportation Commission 2017 Federal Transportation Improvement Program

The Public Participation Plan can be found at: <u>http://www.tahoempo.org/planning.aspx?SelectedIndex=1</u>.

# 4.5 Lake Tahoe Environmental Improvement Program

Launched in 1997, the Lake Tahoe Environmental Improvement Program (EIP) is a partnership of federal, state, and local agencies, private interests, and the Washoe Tribe, created to protect and improve the extraordinary natural and recreational resources of the Lake Tahoe Basin. The EIP provides an implementation framework for Lake Tahoe restoration projects. Transportation projects contained in the Regional Transportation Plan and FTIP are included in the Air Quality and Transportation focus area of the EIP. Additional EIP project/program information can be found at: <a href="https://eip.laketahoeinfo.org/">https://eip.laketahoeinfo.org/</a>.

# 4.6 California Programming

California Regional Transportation Planning Agencies are the recipients of various transportation funds, primarily the State Transportation Improvement Program (STIP). The STIP is a biennial document adopted by the California Transportation Commission (CTC) each even numbered year. It is a comprehensive listing of major projects funded from specified state and federal funding programs. The STIP will include projects carried forward from the previous STIP plus new projects and reserves from those proposed by regional agencies in their Regional Transportation Improvement Program (RTIP) and by Caltrans in its interregional transportation improvement program (ITIP). Caltrans is the recipient of transportation funds known as the State Highway Operation and Protection Program (SHOPP). The SHOPP includes projects designed to maintain the safety and integrity of the State Highway System. These include storm water quality improvements, pavement and bridge rehabilitation projects, traffic operational improvements, and seismic safety projects. The STIP and SHOPP projects are programmed in the FTIP and incorporated in the Federal Statewide Transportation Improvement Program.

# 4.7 Nevada Programming

In Nevada, all state projects are programmed through the Nevada State Transportation Improvement Program (STIP). The STIP includes one- and three- year elements as well as a long-range element. Projects selected for the Nevada STIP are included based on similar criteria as in California, including federal funding, safety, congestion, pedestrian, bicycle, transit, and water quality improvements. Nevada Department of Transportation (NDOT) is the recipient of federal transportation funds, such as, Surface Transportation Block Grant and Federal Transit Administration funds.

# 4.8 Federal Programming

As each MPO is required to develop a FTIP, each state is required to develop a Federal Statewide Transportation Improvement Program (FSTIP) pursuant to federal regulations. The FSTIP incorporates all FTIPs throughout the State. Federal legislation requires projects to be included in the RTP, the FTIP, and the FSTIP in order to be eligible for federal transportation funding. The TRPA/TMPO receives a variety of federal funding sources such as Federal Transit Administration programs, Surface Transportation Block Grant progam, Congestion Mitigation and Air Quality program, and other annual and discretionary grants that are allocated on an annual basis. All of the federal fund sources have eligibility criteria that a project must meet in order to be considered for the fund source.

# SECTION 5: 2017-2020 FTIP DEVELOPMENT

The 2017 FTIP development and approval process spans a total of 11 months. In February 2016, TMPO staff initiated the FTIP development process. The following dates outline significant milestones in the document's development:

February 9 & 10, 2016	FTIP development workshop
February 26, 2016	FTIP Project Data Request noticed
March 11, 2016	TTC Board meeting - Draft 2017 FTIP Information Only
April-June 2016	Development of Draft 2017 FTIP
July 11, 2016	Start 30-day public comment period for Draft 2017 FTIP
July 22, 2016	TTC Board meeting - Public hearing
August 12, 2016	Close 30-day public comment period for Draft 2017 FTIP
September 09, 2016	TTC recommendation of 2017 FTIP
September 28, 2016	TMPO Governing Board approval of 2017 FTIP
September 30, 2016	2017 FTIP to Caltrans and NDOT
December 16, 2016	FTIP/FSTIP Federal approval

#### 5.1 Agency Consultation

The draft FTIP is circulated for intergovernmental review. A goal of the FTIP process is to promote stakeholder relationships that foster cooperative efforts to achieve common transportation goals. Agencies responsible for activities that may be affected by the proposed transportation projects have been consulted for their perspectives on planning issues, needs, and priorities.

# **5.2 Preliminary Financial Estimates**

The first step in developing a financially-constrained plan is to determine how much money is reasonably expected to be available to maintain, operate, and improve the Region's transportation system. During the development of the FTIP, additional funding sources besides the non-discretionary funds apportioned to Tahoe were explored to see if funds existed to incorporate new projects in the 2015 FTIP. The 2015 FTIP included projects that were financially constrained and based on the limited federal, state, and local funding available for the new FTIP cycle the incorporation of new projects into the 2017 FTIP is limited.

# 5.3 Project Selection and Priorities

The FTIP implements the first four years of the region's long-range Regional Transportation Plan. Project selection and priorities are based on the availability and eligibility of funding, project readiness, and project consistency with local and regional plans, conformity to federal and state standards, and if it is listed in the current Regional Transportation Plan. New projects that do not have federal funding sources associated to it cannot be included in the FTIP. The majority of priority projects in this document are projects that will continue to advance from the 2015 FTIP. For federally funded projects, including the Surface Transportation Block Grant (STBG) and Congestion Mitigation and Air Quality (CMAQ) program, funding guidelines are established and a Call for Projects is announced when funding is available. The selected projects for STBG and CMAQ are included in the FTIP for approval by TRPA/TMPO. The funding estimates and program guidelines are included in Appendix B & C.

# 5.4 Expedited Project Selection Process

The Tahoe Metropolitan Planning Organization has a formal process in place for selecting projects for delivery in accordance with 23 Code of Federal Regulations (CFR) Part 450.332. Project programming allows for the advancement or delay of projects within the four-year Federal Transportation Improvement Program and Statewide Federal Transportation Improvement Program that is referred to as the Expedited Project Selection Process (EPSP) found in 23 CFR 450.220 and 450.330. TMPO as the Metropolitan Planning Organization for the Tahoe Basin has entered into an EPSP with Caltrans' Office of Federal Programs and the Nevada Department of Transportation. These procedures have been agreed to by partnering agencies, including the State(s) and transit operators within the Region. The projects listed within the FTIP have all been selected based on the regulations of 23 CFR Part 450. Projects from the first four years of the 2017 FTIP have been selected using the approved project selection procedures. The EPSP procedures are outlined below.

TMPO agrees that projects in the four-year FTIP period funded through Congestion Mitigation and Air Quality Program, Surface Transportation Block Grant Program, Federal Transit Administration, Federal Highway Administration, in accordance with 23 U.S.C. 204, the Federal Emergency Relief Program, and all other programs must be programmed through a project selection procedure. This procedure includes consultation with member agencies, transit operators, and state department of transportation. These programmed projects may be advanced or delayed within the four-year FTIP period by TMPO staff consistent with TMPO's adopted Expedited Project Selection Process.

TMPO agrees that projects funded within the State Transportation Improvement Program may be advanced or delayed within the FTIP subsequent to the approval by the California Transportation Commission. TMPO and Caltrans agree that Caltrans may move projects in the State Highway Operation and Protection Program document within the four-year FTIP period without amending the FTIP, with notification to TMPO.

TMPO agrees that projects funded within NDOT's STIP may be advanced or delayed within the fouryear FTIP period without amending the FTIP, with notification to the TMPO.

TMPO agrees that projects from all Caltrans' state managed programs may be moved within the fouryear FSTIP period by the program managers with notification to TMPO.

Any advancing or delaying of funds through the EPSP process must not negatively impact the deliverability of other projects in the regional program and must not affect the financial constraint of the FTIP. Projects from the first four years of the 2017 FTIP have been selected using the approved project selection procedures.

# 5.5 Public Participation

Public participation is one of the most important foundations for transportation planning and programming. The FTIP is circulated for a 30-day public review and comment period that is consistent with the procedures identified in TMPO's Public Participation Plan. The FTIP document is made available online, available for pick-up, and announced through email. Prior to the close of the 30-day public comment period TMPO will hold a public hearing. After the close of the public comment period, the comments are reviewed, responded to, and compiled (Appendix L).

The FTIP public participation process also satisfies the public participation requirement for development of the Program of Projects (POP) for the FTA 5307 Program through the 30-day public review and comment period and the public hearing.

### 5.6 Visualization

The TMPO website provides a central location for information on regional transportation planning in the Lake Tahoe Basin. Here, you will find helpful links to major plans, programs, including the 2017 FTIP, and studies from the Tahoe Regional Planning Agency (TRPA) transportation division, the Tahoe Metropolitan Planning Organization (TMPO), and the Regional Transportation Planning Agency (RTPA) for the State of California.

TMPO maintains reports, studies, and plans online for public download. The TMPO is committed to providing user-friendly access to our online resources. Information can be found at www.tahoempo.org and www.trpa.org. Additional websites and portals that connect the public and agencies to project and monitoring information include the Environmental Improvement Program Tracker, Sustainability Dashboard, and Commodities Tracker. These can be found at: <u>https://laketahoeinfo.org/</u>.

To help the public find the information they need, which may be housed on the TMPO, TRPA, or TTD websites, the TMPO and TTD have created a joint landing page, located at www.linkingtahoe.com. Hardcopies of approved plans are also made available, and are professionally printed and distributed to public agencies, and available at the front counter at TRPA.

# SECTION 6: FINANCIAL CONSTRAINT/PLAN AND FUNDING SOURCES

# 6.1 Financial Constraint

By Federal law, the FTIP must be a financially constrained document. It shall include a financial plan that demonstrates how the projects can be funded while the existing transportation system is being adequately operated and maintained. Funding shown in the first two years of the FTIP is available and committed. Funding shown in the third and fourth years is reasonably expected to be available. Funding shown after the fourth year is exhibited for information only. The Code of Federal Regulations, Title 23: Highways Part 450-Planning Assistance and Standards 450.104 define "available" and "committed" as below:

Available funds means funds derived from an existing source dedicated to or historically used for transportation purposes. For Federal funds, authorized and/or appropriated funds and the extrapolation of formula and discretionary funds at historic rates of increase are considered "available." A similar approach may be used for State and local funds that are dedicated to or historically used for transportation purposes.

*Committed funds* means funds that have been dedicated or obligated for transportation purposes. For State funds that are not dedicated to transportation purposes, only those funds over which the Governor has control may be considered "committed." Approval of a TIP by the Governor is considered a commitment of those funds over which the Governor has control. For local or private sources of funds not dedicated to or historically used for transportation purposes (including donations of property), a commitment in writing (e.g., letter of intent) by the responsible official or body having control of the funds may be considered a

2017 Federal Transportation Improvement Program

commitment. For projects involving 49 U.S.C. 5309 funding, execution of a Full Funding Grant Agreement (or equivalent) or a Project Construction Grant Agreement with the USDOT shall be considered a multi-year commitment of Federal funds.

# 6.2 Financial Plan

The FTIP is a financially constrained surface transportation improvement program developed by the MPO in conjunction with local partners and in collaboration with state and federal agencies. It provides an overall picture to local, state, and federal government indicating the current and pending uses of federal and state transportation funds. The FTIP is the four-year implementation plan of the current Regional Transportation Plan. The 2017 FTIP transportation funding is provided through many different avenues. Local funds include a variety of sources such as; county or city funds, transient occupancy tax, developer impact fees, mitigation fees, bond measures, sales tax, and other private funds. The federal and state revenue projections are based on the available data provided through the FHWA, FTA, Caltrans, and NDOT. TMPO continually monitors the developments in funding programs and the funding needs of the transportation projects programmed in the FTIP. When a significant funding change occurs it is reviewed by TMPO and its transportation partners and if necessary, appropriate actions are taken to modify funding and maintain the financial constraint state of the FTIP.

The Financial Summary identifies the transportation funding revenues that are programmed for the 2017 FTIP cycle for federal fiscal years 2016-2020 (Appendix A). The projects within this document are considered financially constrained and financial information will be adjusted accordingly with the most current information as it becomes available. Accompanying the financial summary are individual project tracking sheets that are produced in the California Transportation Improvement Program Systems (CTIPS) program (Appendix D). Both California and Nevada projects are tracked within this database.

# 6.3 Funding Sources Identified in the FTIP

The following are key funding programs identified in the 2017 FTIP:

#### Federal Highway Administration Programs

- Congestion Mitigation and Air Quality Program (CMAQ)
- Surface Transportation Block Grant Program (STGB)
- Transportation Alternative Program (TAP)
- Federal Lands Access Program (FLAP)

# Federal Transit Administration Programs

- Section 5307 Urbanized Area Transit Formula
- Section 5310 Enhanced Mobility for Seniors and Individuals with Disabilities
- Section 5311 Rural Area Transit Formula (NV only)
- Section 5339 Bus and Bus Facilities

#### State Programs

- State Transportation Improvement Program (STIP)
- State Highway Operation and Protection Program (SHOPP)
- Active Transportation Program (ATP) California TAP

# State and Local Funds

State and local funds come from a wide variety of sources. These funds are not required to be reported in the FTIP, however, if the funds are used to match federal dollars on a federalized project or if they are attached to a regional significant project the funds must be programmed in the FTIP. State and local fund sources may include the following:

- City and County fees
- Proposition 1B
- Transportation Development Act (TDA)
- TRPA Mitigation Fees
- Local Property Tax
- State Gas Tax
- Sales Tax
- Private Foundation Contributions

# SECTION 7: AMENDING THE FTIP

Since the TMPO is a bi-state MPO, complexities exist for amending the TIP that do not occur for other MPOs solely located in California or Nevada (Appendix F). When making changes to the FTIP there are three basic categories that a change will be classified as (defined below):

# 7.1 Amendments

An amendment is a revision to the FTIP that involves a <u>major</u> change to a project. This includes the addition or deletion of a project or a project group, a major change in project cost, project phase initiation dates, or a major change in project scope or design. An amendment also requires public review and comment, re-demonstration of financial constraint, and an air quality analysis. There are three types of amendments based on air quality conformity. The TMPO processes amendments on a quarterly basis. If there is an FTIP issue that needs addressing immediately, an amendment can be processed outside of the regular schedule to accommodate the situation. Also note, changes to projects that are included only for financial illustrative purposes outside of the four-year FTIP period do not require an amendment.

Amendment Types:

- 1. Amendments requiring a New Air Quality Conformity Analysis: 30-day public review and comment period
- 2. Amendments that rely on the Existing Air Quality Conformity Analysis: seven-day public review and comment period
- 3. Amendments containing Exempt projects requiring no additional Air Quality Conformity Determination: seven-day public review and comment period

# 7.2 Administrative Modifications

An administrative modification is a minor revision to the FTIP that includes:

• Revise description of a project or a grouped project without changing the project scope or without conflicting with the approved environmental

2017 Federal Transportation Improvement Program

- Revise the funding amount listed for a project or a project phase; additional funding is limited to the lesser of 40 percent of the total project cost or \$10 million for California projects and the lesser of 40 percent of the total project cost or \$5 million for Nevada projects.
- Minor changes to a project phase or initiation date

The TMPO Executive Director has delegated authority from Caltrans for approving administrative modifications for the Federal Statewide Transportation Improvement Program. All administrative modifications and amendments are listed online at:

http://www.tahoempo.org/ftip.aspx?SelectedIndex=2.

# SECTION 8: COMPLIANCE AND ANNUAL LISTING OF OBLIGATED PROJECTS

# 8.1 Project Monitoring

Projects are continuously monitored by TMPO staff. Additionally, projects that are subject to the California Assembly Bill 1012 "Use it or Lose It" are monitored to ensure that all available funding sources are expended in the Tahoe Basin. Project implementation is an important objective in the Tahoe Region and if any uncertainties arise then these issues are brought forth through funding recommendations to the Tahoe Transportation Commission for action.

# 8.2 Title VI and Environmental Justice

TMPO complies with state and federal laws that mandate all regional planning and programming efforts to be consistent with Title VI of the Civil Rights Act of 1964 and the Americans with Disabilities Act of 1990. Title VI states that, "no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefit of, or be subjected to discrimination under any program or activity receiving federal financial assistance." Title VI serves as the legal foundation for what is today referred to as environmental justice. Likewise, Environmental Justice is defined by EPA as "the principles of environmental justice call for fairness, regardless of race, color, national origin or income, in the development of laws and regulations that affect every community's natural surroundings, and the places people live, work, play and learn." TMPO's Title VI Plan outlines various programs, activities, and services in place that demonstrate TMPO's commitment to meet Title VI requirements. Public outreach to and involvement of individuals in low income and minority communities covered under Title VI, are critical to regional planning and programming decisions. The investments made in the FTIP must be consistent with Title VI and support Environmental Justice. An equal opportunity is provided for all populations to provide input into the transportation planning process. And in accordance with ADA guidelines, all meetings conducted by the MPO take place at locations which are accessible to persons with mobility limitations.

# 8.3 Annual Listing of Obligated Projects

Annually the TMPO, in cooperation with California and Nevada State Departments of Transportation and the transit operators in the Region, develop a listing of projects for which federal funds were obligated in the preceding year. The annual list includes investments in pedestrian and bicycle facilities as well as highway operational improvements. The Annual Federal Obligation Report is available on the TMPO website at <u>www.tahoempo.org</u>.

# SECTION 9: AIR QUALITY CONFORMITY ANALYSIS

The 2017 FTIP's air quality analysis is based on the air quality conformity analysis conducted for the most recent RTP. The TMPO conducts an interagency consultation process that includes the California Air Resources Board, the Nevada Department of Environmental Protection, the Federal Highways Administration, the U.S. Environmental Protection Agency, the California Department of Transportation and the Nevada Department of Transportation as part of the air quality conformity process.

TMPO includes proactive public involvement to ensure access to technical and policy information is available. The 2017 FTIP does not add any non-exempt projects in comparison to the previous RTP and FTIP. In air quality non-attainment and maintenance areas, all projects must be in conformance with the California and Nevada State Implementation Plans (SIP) for air quality standards before they can be included in the FTIP. The TMPO is responsible for conducting conformity determinations for both the California and Nevada portions of the Tahoe Region where conformity requirements apply (Appendix G). In California, Environmental Protection Agency (EPA) requires two 10-year CO Maintenance Plans for El Dorado and Placer Counties. In Nevada, where Douglas and Washoe counties are classified as Limited Maintenance Areas EPA includes provisions for interagency consultation procedures should Carbon Monoxide concentrations exceed pre-determined triggers.

# SECTION 10: 2015 FTIP ACCOMPLISHMENTS

The previous FTIP was successful in moving projects forward. Given the cost of developing transportation projects in the Tahoe Region and the reduction of federal and state funding it has been difficult to make significant improvements to the transportation system over the short life of a FTIP cycle. There were four amendments and eight administrative modifications processed during the 2015 FTIP cycle. Four projects were completed, three projects deleted, and ongoing projects were carried forward into the 2017 FTIP. The table below shows the 2015 FTIP notable achievements.

2015 FTIP ACCOMPLISHMENTS						
Project Name	Location	Accomplishment	Lead Agency			
California High Efficiency Sweeper	El Dorado County	2015- delivered	Caltrans			
City of South Lake Tahoe Street Sweepers	El Dorado County	2016- delivered	City of South Lake Tahoe			
SR28/Fanny Bridge Community Revitalization Project Phase 1	Placer County	100% funded	Tahoe Transportation District			
SR28/Fanny Bridge Community Revitalization Project Phase2	Placer County	100% funded	Tahoe Transportation District			
Kings Beach Commercial Core Improvement Project "Core of the Core"	Placer County	2015- delivered	Placer County			

2017 Federal Transportation Improvement Program

# SECTION 11: OPERATIONS AND MAINTENANCE OF THE EXISTING SYSTEM

The Operations and Maintenance (O&M) of the existing transportation system is a priority investment in the Lake Tahoe Region. Keeping the Region's transportation system in a state of good repair is a major challenge for all transportation agencies in the Region. TRPA, Caltrans, NDOT, and the Region's localities share this responsibility. There are 110 miles of state and federal highways in the Tahoe Region. These routes, managed by Caltrans and NDOT, form the backbone of the Region's transportation system.

Typical projects include pavement maintenance, water quality treatment and operational improvements of these roadways. Caltrans utilizes, primarily, the State Highway Operation and Protection Program (SHOPP), while NDOT utilizes state funding and federal highway funding for its maintenance activities. The local jurisdictions are responsible for maintaining the 619 miles of local streets and roads. These local routes include a range of facility types from urban-style arterial streets and roadways in South Lake Tahoe, California and Stateline, Nevada with sidewalks and bicycle facilities, to rural county roads outside of urban centers. Typical projects include pavement maintenance, operational improvements, and snow removal of the local streets and roads.

The transit systems are operated and maintained by the two transit operators in the Lake Tahoe Region. The transit operators utilize federal (FTA) and state (TDA) transit funds as well as local/private (fare box and private contributions) funds to maintain the transit operations in the Lake Tahoe Region.

The expenditures for O&M in the FTIP are consistent with the expenditures listed in the RTP. Estimates for expenditures represent Caltrans, Nevada DOT, and local jurisdiction figures. With the recent reduction of funding from the state of California for local governments, roadway O&M expenditures have been reduced dramatically for local governments in the California portion of the Lake Tahoe Basin.

# Surface Transportation Block Grant

# **Program Guidelines**

May 2016

# Surface Transportation Block Grant Program 2016 Funding Cycle

# **Program Guidelines**

# Introduction

The Tahoe Regional Planning Agency, in its capacity as the Tahoe Metropolitan Planning Organization (TMPO) is responsible for allocating and programming various federal and state funding programs. TMPO works with partners to deliver the Regional Transportation Plan for the Lake Tahoe Region. The Surface Transportation Block Grant Program (STBG) is one of the primary federal funding programs for the region to implement transportation projects identified in the Regional Transportation Plan to be moved forward for programming in the Federal Transportation Improvement Program (FTIP).

STBG funding is authorized by the recently passed federal transportation bill Fixing America's Surface Transportation (FAST) Act, signed into law on December 4, 2015. The FAST Act converts the longstanding Surface Transportation Program into the Surface Transportation *Block Grant* Program under Section 133 of Title 23 of the United States Code. The Lake Tahoe Region benefited from specific legislative language in the FAST Act directing STBG funding allocation based on a fixed population of 210,000 in the California and Nevada portions of the Region. The STBG promotes flexibility in State and local transportation decisions and provides funding to best address State and local transportation needs. This program funding may be used by States and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway and certain local roads, pedestrian and bicycle infrastructure, transit capital, planning projects, and intercity passenger projects.

TMPO is required to program the STBG funds that are apportioned to the Tahoe Region in the Federal Transportation Improvement Program (FTIP). STBG funds are reimbursable federal aid funds, subject to the requirements of Title 23, United States Code. Eligible costs for funds include preliminary engineering, right-of-way acquisition, capital costs, and construction costs associated with an eligible activity.

# STBG 2016 Funding Cycle Key Dates

May 27, 2016	Release STBG Call for Projects for 2017 FTIP
June 17, 2016	Applications Due to TMPO
June 27 , 2016	Staff Recommendation for STBG funding (FY16-18)
July 8, 2016	STBG projects included in 2017 Draft FTIP - TTC Board Meeting (Public Hearing)
September 2016	Approval of final 2017 FTIP, including STBG projects – TMPO Governing Board

STBG Funding application: http://www.tahoempo.org/stbg.aspx

# Applications are due no later than 5:00 pm on June 17, 2016.

The completed application must be submitted electronically to Judy Weber at jweber@trpa.org.

# **Program Goals**

The goal of TMPO Surface Transportation Block Grant Program funding is to support the implementation of the Regional Transportation Plan/Sustainable Communities Strategy (Mobility 2035) by enhancing the transportation system to provide mobility, social, and environmental improvements. The program targets regionally significant corridor revitalization projects identified by 2035 (Figure 6-3 of Mobility 2035-page 6-9) and eligible projects contained in Mobility 2035 by creating specific funding targets. These funding guidelines will be updated to account for future Regional Transportation Plans and/or Federal transportation legislation in order to remain aligned with updated goals, priorities, and requirements as necessary.

# Funding

STBG funding is apportioned directly to TMPO by the Federal Highway Administration (FHWA) in accordance with the Federal FAST Act. The funding is allocated by state (CA and NV) and must be awarded to projects in the corresponding state. TMPO provides estimated allocations for future fiscal years through 2020.

# **Available Funding**

The estimated funding available for this call for projects is:

	FFY 15/16	FFY 16/17	FFY 17/18
CA-STBG	\$1,765,551	\$1,844,863	\$1,920,081
NV-STBG	\$1,127,379	\$1,178,368	\$1,226,982
TOTALS	\$2,892,930	\$3,023,231	\$3,147,063

# Match Requirements

The non-federal funding match requirement is 11.47% for California projects and 5% for Nevada projects.

# **Funding Targets**

In order to prioritize regionally significant corridor revitalization projects and to provide funding for other transportation projects identified in the Regional Transportation Plan the following funding target amounts apply to this program. These targets will be used as guidance when determining allocation of funding, and do not represent a required minimum or maximum amount for each project type.

60% - Corridor Revitalization projects 40% - Other eligible transportation projects

# **Recommended Minimum Project Request**

In order to maximize efficiency and recognizing the administrative requirements of these federal funds, it is recommended that projects request a minimum of \$250,000 in STBG funds.

# Eligibility

### **Eligible Applicants**

- Local, state, and regional government entities
- Transit operators

#### **Project Eligibility**

Illustrative eligible project types:

- Capital costs for transit projects and publicly owned bus terminals and facilities;
- Car pool projects, fringe and corridor parking facilities and programs; and bicycle transportation and pedestrian walkways;
- Capital and operating costs for traffic monitoring, management, and control facilities and programs;
- Surface transportation planning programs;
- Transportation control measures (TCMs);
- Construction, reconstruction, rehabilitation, resurfacing, restoration, and operational improvements for highways and bridges;
- Highway and transit safety improvements and programs, hazardous elimination, projects to mitigate hazards caused by wildfire, and railway-highway grade crossings;
- Participation in wetlands mitigation efforts

All stages of work are eligible for funding; Preliminary Engineering, Right of Way, and/or Construction. For additional information regarding project eligibility or other areas of the STBG program please refer to this FHWA guidance: <u>http://www.fhwa.dot.gov/specialfunding/stp/160307.cfm.</u>

# **Initial Project Screening**

TMPO staff will conduct an initial project screening to determine if a submitted project will proceed to the evaluation process. If a project does not clear the screening process the applicant will be notified and may be provided an opportunity to submit additional information to support clearance of the project. TMPO staff will use the following screening criterion:

- The project must be listed in the adopted Lake Tahoe Regional Transportation Plan.
- The project must be ready for programming in the Federal Transportation Improvement Program.
- The project must have federal environmental clearance underway or completed
- The project has adhered to the appropriate federal-aid project development process in each state, if already underway.
- The project sponsor must demonstrate technical capacity and reliability for delivering similar projects (scale and complexity).
- A request for construction funding must demonstrate that environmental, engineering and right-of-way will be ready by the time funds are requested.
- The project sponsor must identify the commitment for ongoing operations and maintenance for any capital project.
- The projects must be consistent with statewide, regional, or local complete streets requirements.

## Project Evaluation Criteria

Reviewers will evaluate and score applications using the following selection criteria and relative weighting (maximum of 50 points):

Project location. The application must describe the project location,	N/A
including specifying the state in which work will be performed/delivered.	
Work plan and timeline.Projects application should clearly illustrate the steps for implementation and a detailed project timeline with key	15 points
milestones.	
<b>Demonstrated need.</b> The applicant should clearly identify the purpose and need of the project.	10 points
Potential for project success. Applicant's ability to carry out project based	10 points
on:	
<ul> <li>Readiness of Project</li> </ul>	
<ul> <li>Reasonable work-plan</li> </ul>	
<ul> <li>Coordination with public</li> </ul>	
<ul> <li>Project leadership and council/board endorsement</li> </ul>	
<ul> <li>Available funding to complete and maintain the project</li> </ul>	
Project Consistency with local, regional, state and federal plans and	5 points
policies. Applicants ability to show consistency with plans and policies	
(Area Plans, RTP, complete streets policies, etc.)	
Ability to demonstrate appropriate management of project and funds.	5 points
Applicant must demonstrate the capacity to deliver projects in a timely	
manner.	
Matching funds. Applicant must identify non-federal matching funds.	5 points
Project applications that can show additional committed matching funds,	
beyond the required amount, will be the most competitive.	

## Application and Submittal

- Download application here: <u>http://www.tahoempo.org/stbg.aspx</u>
- Completed application may be submitted electronically to Judy Weber at jweber@trpa.org.
- The deadline for submitting an application is June 17, 2016.
- Submitted projects will be scored by TMPO and selected project sponsors will be notified by June 27, 2016.

## **Post-Award Steps**

If your project is awarded the following steps apply:

- The project must begin no later than within three years of the awarded fiscal year.
- Enter or edit the project in the Lake Tahoe EIP Tracker Tool: <u>https://eip.laketahoeinfo.org/</u>. This
  information will be used to program the project in the Federal Transportation Improvement
  Program.
- Provide quarterly project updates and schedule changes as necessary via the Lake Tahoe EIP Tool.

- California projects must work with Caltrans Local Assistance on the Request for Authorization (E76) process for obligation of the funds. Follow the processes in the Caltrans Local Assistance Procedures Manual: <u>http://www.dot.ca.gov/hg/LocalPrograms/lam/lapm.htm</u>
- Nevada projects, work with NDOT on the Local Public Agency (LPA) process. Follow processes in the Nevada Local Public Agency Manual: <u>http://www.nevadadot.com/uploadedFiles/NDOT/About\_NDOT/NDOT\_Divisions/Engineering/D</u> <u>esign/2010\_04\_April\_LPA\_Manual.pdf</u>
- TMPO shall retain the right to redirect program funding to other agencies so as not to lose funding to the Tahoe Region. Affected project sponsors will be contacted prior to reallocation.

## TAHOE METROPOLITAN PLANNING ORGANIZATION

# Congestion Mitigation and Air Quality Program Guidelines

March 2016

### **Congestion Mitigation and Air Quality Program**

#### I. Introduction

The Congesting Mitigation and Air Quality Improvement Program was created under the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991, and was reauthorized under all Federal Transportation Acts since ISTEA, including the most recent Fixing America's Surface Transportation (FAST) Act. FAST Act provides millions of CMAQ funds annually to California. The funds are distributed to Metropolitan Planning Organizations and Regional Transportation Planning Agencies in federally designated air quality nonattainment and maintenance areas within the state in accordance with the formula set forth in Section 182.7 of the Streets and Highways Code.

The purpose of the Congestion Mitigation and Air Quality (CMAQ) Program is to provide a flexible funding source to state and local governments for transportation projects and programs to help meet the requirements of the Clean Air Act. The funding is available to air quality nonattainment areas and maintenance areas that do not meet the National Ambient Air Quality Standards for ozone, carbon monoxide, and particulate matter (both PM10 and PM2.5).

The CMAQ program supports the two important goals of the U.S. Department of Transportation to improve air quality and relieve congestion. Funds may be used for a transportation project or program that is likely to contribute to the attainment or maintenance of a national ambient air quality standard, with a high level of effectiveness in reducing air pollution, and that is included in the metropolitan planning organization's (MPO's) current transportation plan and transportation improvement program (TIP). CMAQ projects must be a transportation project, must generate an emissions reduction, and must be located in or benefit a nonattainment or maintenance area.

#### **II. Program Eligibility and Requirements**

**A. Eligible Area:** The CMAQ funds may be invested in the El Dorado County portion of the Tahoe Region, including the City of South Lake Tahoe (CSLT).

#### B. Eligible Applicants

- Local governments (need a Master Agreement with Caltrans)
- Transit Operators

#### C. Eligible Projects and Programs

- Diesel Engine Retrofit s and Other Advance Truck Technologies
- Idle Reduction
- Congestion Reduction and Traffic Flow Improvements
- Freight/intermodal
- Transportation Control Measures (TMC)
- Transit Improvements
- Bicycle and Pedestrian Facilities and Programs
- Travel Demand Management
- Public Education and Outreach Activities
- Transportation Management Associations
- Carpooling and Vanpooling
- Carsharing
- Extreme Low-Temperature Cold Start Programs
- Training
- Inspection/Maintenance (I&M) Programs
- Innovation Projects
- Alternative Fuels and Electric Vehicles and Associated Fueling Infrastructure
- D. Eligible Stage of Work: Preliminary Engineering, Right of Way, and/or Construction
- **E. State/Local Match:** The match requirement (non-federal) is 11.47 percent. Toll Credits are available to use for match requirement.
- F. Cost-Effectiveness Analysis: The program or project must generate a cost-effectiveness emissions reduction (see link to ARB tool below.)

#### **III. Project Eligibility and Requirements**

- **A. Project Eligibility:** CMAQ project must meet three basic criteria; it must be a transportation project, it must generate an emissions reduction, and it must be located in or benefit a nonattainment or maintenance area.
- **B.** Selection Criteria: The following criteria will be taken into consideration during project evaluation and selection.

Project Location

Project must be located in the El Dorado County portion of the Lake Tahoe Region

Implementation Plan

 Projects that can clearly show the steps for implementation and a reasonable timeline, will receive the highest scores in this category

Demonstrated need

 Level of need for mobility, economic, environmental, and/or community improvements in this area

#### Clear goals

Clarity of project goals

Potential for project success. Applicant's ability to carry out the project over time based on:

- Project readiness, What stage of work project is in
- Work plan
- Project leadership
- Available funding to complete project

Project Consistency with local, regional, or statewide plans (Regional Transportation Plan, Active Transportation Plan, EIP, Area Plan, etc.)

How well the project application shows the consistency with plans

Addresses emissions reduction and cost effectiveness

How well project reduces emissions while still cost-effective

Matching funds

- Project applications that can show a larger proportion of other sources of dedicated funding for the project will be the most competitive
- **C. Project Evaluation:** Reviewers will evaluate applications using the following selection criteria and relative weighting (maximum of 50 points):

<b>Project location.</b> Located in the El Dorado County portion of the Tahoe Region	Required
Work plan and timeline. Clear work plan for implementation of project and reasonable timeline.	15 points
<b>Demonstrated need.</b> Level of need for mobility, economic, environmental, and/or community improvements in this area.	10 points
<ul> <li>Potential for project success. Applicant's ability to carry out project based on:</li> <li>Readiness of Project</li> <li>Reasonable work-plan</li> <li>Coordination with public</li> <li>Project leadership</li> <li>Available funding to complete project</li> </ul>	10 points

<b>Project Consistency with local, state and federal plans.</b> Applicants ability to show consistency with plans	5 points
<b>Addresses emissions reduction and cost effectiveness.</b> To what extent the project will reduce emissions while still being cost effectiveness.	5 points
<b>Matching funds.</b> Project applications that can show a larger proportion of other sources of dedicated funding for the project will be the most competitive.	5 points

#### D. Project Requirements

- The project must be listed in the adopted Lake Tahoe Regional Transportation Plan and ready to be programmed in the Federal Transportation Improvement Program.
- The project must meet National Environmental Policy Act (NEPA) requirements.
- The project sponsor must provide a cost-effectiveness analysis with the application. The California Department of Transportation (Caltrans) in partnership with the California Air Resource Board (ARB) has published "Methods to Find the Cost-Effectiveness of Funding Air Quality Projects" which can be of assistance in determining to what extent a project reduces emissions. See ARB link: <u>http://www.arb.ca.gov/planning/tsaq/eval/eval.htm</u>
- The project must begin no later than within three years of the awarded fiscal year.
- The project sponsor must have a track record that demonstrates technical capacity and reliability for delivering similar projects.
- A request for construction funding must demonstrate that environmental, engineering and right-of-way will be ready by the time funds are requested and the financial ability for ongoing operations and maintenance.
- The projects should be consistent with statewide or local complete streets requirements.

#### E. Application and Submittal

- Download application here: <u>http://www.tahoempo.org/cmaq.aspx?SelectedIndex=2</u>
- Completed application and Cost- Effectiveness Analysis may be submitted electronically to Judy Weber@<u>jweber@trpa.org</u>.
- The deadline for submitting an application is April 18, 2016.
- Submitted projects will be scored by TMPO and selected project sponsors will be notified by April 29, 2016.
- F. Post Award Steps: If your project is awarded the following steps apply:
  - Enter the project in the Lake Tahoe EIP Tracker Tool: <u>https://eip.laketahoeinfo.org/</u>. It then will be programmed in the Federal Transportation Improvement Program (FTIP).
  - Provide funding source information for local (non-federal) match of 11.47 percent.
  - Work with Caltrans Local Assistance on the Request For Authorization (E76) process for obligation of the funds. Follow the processes in the Caltrans Local Assistance Procedures Manual: <u>http://www.dot.ca.gov/hq/LocalPrograms/lam/lapm.htm</u>
  - Provide quarterly project updates and schedule changes as necessary via the Lake Tahoe EIP Tool.

#### Tahoe Regional Planning Agency - Federal Transportation Improvement Program

(Dollars in Thousands)

#### Comments:

\*\*\*\*\*\*\* DFTIP Version 1 - 05/18/2016 \*\*\*\*\*\* Carry Over from 2015. Toll Credits will be used for match on CA CMAQ and STBG funds.

 \*\*\*\*\*\*\*\*
 DFTIP Version 1 - 05/28/2014 \*\*\*\*\*\*\*\*

 Carry Over from 2012. Move PLH \$800k to 14/15

 total project \$75M

 RTP 3

 \*\*\*\*\*\*\*\*

 Version 7 - 05/02/2013 \*\*\*\*\*\*\*

 Add \$1M FHWA PLH funds from NDOT, PE FY 12/13

 \*\*\*\*\*\*\*\*

 Version 6 - 03/22/2012 \*\*\*\*\*\*\*

 Carry over from 2010

 added NDOT \$3,600, CA State \$11,000, PLH \$50.400, private \$7,000, FLH \$1,000

 updated project cost \$75M and project title

Carry Over from 2008 EIP# 777, 791 \*\*\*\*\*\*\* Version 5 - 06/17/2010 \*\*\*\*\*\*\* Estimated Total Project Cost = \$65 million RTP#5 Public lands Highway funding is substitute for Federal Lands Highway 1/2%

 \*\*\*\*\*\*\*
 Version 3 - 10/25/2007

 Move SNPLMA funds from 2004 to 2007/08. PSR to begin early 2008.

 \*\*\*\*\*\*\*
 Version 2 - 05/25/2006

 \*\*\*\*\*\*\*\*
 Version 1 - 10/12/2004

 Total project cost \$70,208,000
 EIS \$1,500,000 (SNPLMA \$1,200,000)

 PE/Design \$1,189,175

# Appendix F

Amending the FTIP

#### Processing a TMPO FTIP or FTIP Amendment that Adds or Modifies FSTIP Programming in <u>Both California and Nevada and is Subject to the AQ Conformity</u> Determination Requirements

I.

Once a FTIP or Amendment and any necessary AQ Conformity determination is approved by the TMPO Board, the TMPO submits the approved FTIP or Amendment with any required AQ Conformity analysis and determination documentation to:

NDOT and Caltrans requesting approval of the TMPO FTIP by the Governor (or the Governor's designee) in each state,

-And-

FHWA's CA Division office and the FTA's Region IX office requesting the required joint FHWA/FTA Conformity Determination (with informational copy to: U.S. EPA & FHWA's NV Division office)

#### II.

NDOT submits the State (Nevada) approved TMPO FTIP or Amendment and any required AQ conformity documentation to the FHWA's NV Division office and the FTA's Region IX office (with courtesy copy to FHWA's CA Division) documenting NDOT approval of the TMPO FTIP and requesting inclusion of the Nevada projects from the TMPO FTIP or Amendment into Nevada's STIP.

-And-

Caltrans submits the State (California) approved TMPO FTIP or FTIP Amendment and any required AQ conformity documentation to FHWA's CA Division office and the FTA's Region IX office (with courtesy copy to FHWA's NV Division) documenting Caltrans approval of the TMPO TIP and requesting inclusion of the California projects from the TMPO FTIP or Amendment into California's FSTIP.

III.

In consultation with the U.S. EPA, the FHWA CA Division office and the FTA Region IX office make the required AQ conformity determination on the TMPO FTIP or Amendment (with a courtesy copy to FHWA's NV Division).

#### IV.

On receipt of the California Governor's approval and completion of FHWA/FTA action on the AQ conformity determination for the TMPO's FTIP or Amendment, the FHWA NV Division office and the FTA Region IX office act jointly in responding to the Nevada DOT FSTIP programming request (with courtesy copy to FHWA CA Division).

-And-

On receipt of the Nevada Governor's approval and completion of FHWA/FTA action on the AQ conformity determination for the TMPO's TIP or Amendment, the FHWA CA Division office and the FTA Region IX offices act jointly in responding to the Caltrans FSTIP programming request (with courtesy copy to FHWA NV Division).

#### Processing a TMPO FTIP or FTIP Amendment that Adds or Modifies FSTIP Programming in <u>Nevada Only and is Subject to the AQ Conformity</u> Determination Requirements

Ι.

Once a FTIP or Amendment and any necessary AQ Conformity determination is approved by the TMPO Board, the TMPO submits the approved FTIP or Amendment with any required AQ Conformity analysis and determination documentation to:

NDOT and Caltrans requesting approval of the TMPO TIP by the Governor (or his designee) in each State,

-And-

FHWA's NV Division office and the FTA's Region IX office requesting the required FHWA/FTA Conformity Determination (with informational copies to the U.S. EPA and FHWA CA Division offices)

II.

NDOT submits the State (Nevada) approved TMPO FTIP or Amendment and any required AQ conformity documentation to the FHWA's NV Division office and the FTA's Region IX office (with courtesy copy to FHWA's CA Division) requesting inclusion of the projects from the TMPO FTIP or Amendment into Nevada's FSTIP.

III.

In consultation with the U.S. EPA, the FHWA NV Division office and the FTA Region IX office make the required AQ conformity determination on TMPO's FTIP or Amendment (with courtesy copy to FHWA's CA Division).

IV.

On receipt of the Nevada Governor's approval of the TMPO FTIP or Amendment and completion of the FHWA/FTA action on the AQ conformity determination for the FTIP or Amendment, the FHWA's NV Division office and the FTA's Region IX office act jointly in responding to the Nevada DOT STIP programming request (with courtesy copy to FHWA's CA Division office).

#### Processing a TMPO FTIP or FTIP Amendment that Adds or Modifies FSTIP Programming in <u>California Only and is Subject to the AQ Conformity</u> Determination Requirements

I.

Once a FTIP or Amendment and any necessary AQ Conformity determination is approved by the TMPO Board, TMPO submits the approved FTIP or Amendment with any required AQ Conformity analysis and determination documentation to:

NDOT and Caltrans requesting approval of the TMPO FTIP by the Governor (or his designee) in each State,

-And-

FHWA's CA Division office and the FTA's Region IX office requesting the required FHWA/FTA Conformity Determination (with informational copies to the U.S. EPA and FHWA NV division offices)

П.

Caltrans submits the State approved TMPO FTIP or Amendment and any required AQ conformity documentation to the FHWA's CA Division office and the FTA's Region IX office (with courtesy copy to FHWA's NV Division) requesting inclusion of the projects from the TMPO FTIP or Amendment into California's FSTIP.

III.

In consultation with the U.S. EPA, the FHWA CA Division office and the FTA Region IX office make the required AQ conformity determination on TMPO's FTIP or Amendment (with courtesy copy to FHWA's NV Division).

IV.

On receipt of the California Governor's approval of the TMPO FTIP and completion of the FHWA/FTA action on the AQ conformity determination for the FTIP or Amendment, the FHWA's CA Division office and the FTA's Region IX office act jointly in responding to the Caltrans FSTIP programming request (with courtesy copy to FHWA's NV Division office).

#### Processing a TMPO FTIP or Amendment that Adds and/or Modifies FSTIP programming in <u>Both California and Nevada and is Exempt</u> from the Requirement to Determine AQ Conformity

I.

Once the TMPO Board approves the FTIP or Amendment, the TMPO submits the approved FTIP or Amendment to the NDOT and Caltrans for approval by the Governor (or Governor's designee) in each State.

П.

NDOT submits the TMPO FTIP or Amendment (as approved by the TMPO and Nevada's Governor) to the FHWA's NV Division office and the FTA's Region IX office (with courtesy copy to FHWA CA Division) requesting inclusion of the TMPO FTIP or Amendment into Nevada's STIP.

-And-

Caltrans submits the TMPO FTIP or Amendment (as approved by the TMPO and California's Governor) to FHWA's CA Division office and the FTA's Region IX office (with courtesy copy to FHWA NV Division) requesting inclusion of the TMPO FTIP or Amendment into California's FSTIP.

III.

On receipt of the California Governor's approval of the TMPO's TIP or Amendment the NV Division office and the FTA's Region IX offices act jointly in responding to the Nevada DOT FSTIP programming request (with courtesy copy to FHWA's CA Division).

#### -And-

On receipt of the Nevada Governor's approval of the TMPO's FTIP or Amendment the FHWA's CA Division office and the FTA's Region IX offices act jointly in responding to the Caltrans programming request (with courtesy copy to FHWA NV Division).

#### Processing a TMPO FTIP or Amendment that Adds and/or Modifies FSTIP Programming in <u>Nevada Only and is Exempt</u> from the Requirement to Determine AQ Conformity

I.

Once the TMPO Board approves a FTIP or Amendment, the TMPO submits the approved FTIP or Amendment to the NDOT and Caltrans for approval by the Governor (or Governor's designee) in each State.

П.

Caltrans notifies the TMPO (with courtesy copy to FHWA's NV and CA Divisions) of the California Governor's approval of the FTIP or Amendment

III.

NDOT submits the TMPO FTIP or Amendment (as approved by the TMPO and Nevada's Governor) to FHWA's NV Division office and the FTA's Region IX office requesting inclusion of the TMPO TIP or Amendment into Nevada's STIP.

IV.

On receipt of the Nevada Governor's approval of the TMPO's FTIP or Amendment, the FHWA's NV Division office and the FTA's Region IX office act jointly in responding to the Nevada DOT FSTIP Programming request (with courtesy notification to FHWA CA Division).

#### Processing a TMPO FTIP or Amendment that Adds and/or Modifies FSTIP Programming in <u>California Only and is Exempt</u> from the Requirement to Determine AQ Conformity

I.

Once the TMPO Board approves a FTIP or Amendment, the TMPO submits the approved FTIP or Amendment to Caltrans and NDOT for approval by the Governor (or Governor's designee) in each State.

П.

NDOT notifies the TMPO (with courtesy copy to FHWA's NV and CA Division offices and FTA's Region IX office) of the NV Governor's approval of the FTIP or Amendment

III.

Caltrans submits the TMPO TIP or Amendment (as approved by the TMPO and California's Governor) to FHWA's CA Division office and the FTA's Region IX office requesting inclusion of the TMPO FTIP or Amendment into California's FSTIP.

IV.

On receipt of the California Governor's approval of the TMPO's FTIP or Amendment, the FHWA's CA Division office and the FTA's Region IX office act jointly in responding to the Caltrans FSTIP Programming request (with courtesy notification to FHWA NV Division).

# **Appendix G** Air Quality Conformity

Federal Highway Administration Federal Highway Administration California Division

January 28, 2013

650 Capitol Mall, Suite 4-100 Sacramento, CA 95814 (916) 498-5001 (916) 498-5008 (fax)

> In Reply Refer To: HDA-CA

Ms. Joanne S. Marchetta Executive Director Tahoe Metropolitan Planning Organization P.O. Box 5310 128 Market Street Stateline, NV 89449

SUBJECT: Tahoe Metropolitan Planning Organization's (TMPO) 2012 RTP (Mobility 2035) Conformity Determination

Dear Ms. Marchetta:

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have completed our review of the conformity determination for the Tahoe Metropolitan Planning Organization's (TMPO) 2012 RTP. A FHWA/FTA air quality conformity determination is required pursuant to the Environmental Protection Agency's (EPA) *Transportation Conformity Rule*, 40 CFR Parts 51 and 93, and the United States Department of Transportation's *Metropolitan Planning Rule*, 23 CFR Part 450.

On December 12, 2012, TMPO adopted the 2012 RTP and made the corresponding conformity determination. The conformity analysis submitted by TMPO indicates that all air quality conformity requirements have been met. Based on our review, we find that the 2012 RTP and conformity determination conform to the applicable state implementation plan in accordance with the provisions of 40 CFR Parts 51 and 93. In accordance with the July 15, 2004, *Memorandum of Understanding (MOU) between the Federal Highway Administration, California Division and the Federal Transit Administration, Region IX*, the FTA has concurred with this conformity determination. Additionally, this conformity determination was made after consultation with the EPA, Region 9 office.

If you have questions or need additional information concerning this approval, please contact Joseph Vaughn (Joseph Vaughn@dot.gov) of the FHWA California Division office at (916) 498-5346.

Sincerely.

For: Vincent P. Mammano Division Administrator

# APPENDIX E 2012 Conformity

# **Purpose**

The purpose of conformity is to ensure that regional transportation planning and programming remain consistent with state and local air quality planning efforts to achieve and/or maintain the National Ambient Air Quality Standards (NAAQS). As the Metropolitan Planning Organization (MPO) and the Regional Transportation Planning Agency (RTPA) for Tahoe Region, the Tahoe Metropolitan Planning Organization (TMPO) has prepared this analysis pursuant to the 1990 federal Clean Air Act Amendments (CAAA) and the State Implementation Plan (SIP) for California and Nevada.

The Transportation Conformity Rule requires all jurisdictions in non-attainment areas or who are under federally approved maintenance plans to submit a conformity analysis if the planning or programming documents identify projects that have been defined as non-exempt. The CAAA also directs MPOs to facilitate the expeditious implementation of the Transportation Control Measures (TCMs) that are included in the SIP. No TCMs are applicable to the Tahoe Region therefore no control measures are identified for implementation.

# **Emissions Tests**

The TMPO is responsible for conducting conformity determinations for both the California and Nevada portions of the Basin where conformity requirements apply. EPA requires two 10 year CO maintenance plans. In California, EPA has approved the Lake Tahoe Air Basin (LTAB) second 10 year maintenance plan which ends in 2018. In Nevada, the first 10 year maintenance plan ends in 2014. Please refer to Table A for the current conformity designations by County.

Pursuant to the conformity regulation, a regional emission analysis which incorporates all conformity non-exempt projects must meet the established emission tests before *Mobility 2035* can be determined to conform with the State Implementation Plans (SIP). For California counties, the MPO must demonstrate that proposed transportation programs and plans are consistent with the SIP by showing that emissions associated with these plans and programs do not exceed applicable carrying capacities or "emission budgets" previously adopted by the California Air Resources Board (CARB). In Nevada, conformity is determined by applying a build/no build assessment for those areas that are either classified as non-attainment or are under a Maintenance Plan. Both Douglas and Washoe Counties have been designated as Limited Maintenance Areas, where the emissions test only applies for to non-attainment areas.

#### Table A Pollutant and Conformity Designation by Jurisdiction

Jurisdiction	Pollutant	Reason for Conformity Analysis
El Dorado County	CO	Current Maintenance Plan
Placer County	CO	Current Maintenance Plan
Douglas County	CO	Limited Maintenance Plan
Carson City County	CO	Limited Maintenance Plan

# Modeling and Analytical Assumptions (California)

Pursuant to the conformity regulation, a regional emissions analysis which incorporates all conformity non-exempt projects must meet the emissions budget test before *Mobility 2035* can be determined to conform to the SIP. This analysis is holistic in scope, with final conformity being based on the program rather than on a project-by-project basis.

On November 30, 2005, the EPA took direct and final action to approve a State Implementation Plan revision that was submitted by the California Air Resources Board. The revision titled "Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Planning Purposes; Carbon Monoxide Maintenance Plan Update for Ten Planning Areas; Motor Vehicle Emissions Budgets: Technical Correction" (Federal Register/Vol. 70, No 229/Wednesday, November 30, 2005/ Rules and Regulations) provides a 10-year update to the carbon monoxide maintenance plan, for 10 planning areas of which the LTAB was included. As part of this update the following Motor Vehicle Emission Budget (MVEB) was developed for the LTAB.

		Emission Budget	
CO Maintenance Area	Area Included	2010	2018
Lake Tahoe North Shore	Eastern Placer	11	11
Lake Tahoe South Shore	Eastern El Dorado	19	10

Note: Winter Seasonal emissions are in tons per day. Emissions budget represent CARB's seasonal on-road motor vehicle emission inventory

The conformity regulations requires that a conformity analysis must include the attainment milestone year of the SIP, the forecast horizon year of the applicable RTP and have no analysis gaps greater than 10 years. Based on these requirements, the conformity analysis years selected for this analysis are: 2010, 2020, and 2035. A description of the conformity modeling planning assumptions is provided in Table B.

#### Table B

Modeling Assumptions	2012 RTP Conformity Assumptions
Socio-economic growth assumptions	TRPA Regional Plan Update Growth Forecasts
Vehicle Activity Levels (trips, VMT) (LDA, LDT, MDT, UB, MCY, SBUS, HHDT, HDGT,)	ARB Default Activity (2010, 2020, 2030) –TMPO Model (2010, 2020, 2035)

Emission Budgets	2005 40 CFR (2010, 2018)

# *Mobility 2035* TransCAD Modeling and Network Analysis

The Mobility 2035 impact on travel behavior is assessed at the regional scale using the TMPO TransCAD Tour-Based Travel Demand Model. The TransCAD model identifies the impact on region-wide circulation patterns and vehicle miles of travel (VMT). The socio-economic data inputs for the regional network travel demand model were derived from the most recent growth allocations (2020 and 2035) identified through the TRPA Regional Plan Growth Alternatives (Table C). Both Non-Exempt projects required modifications to the 2020 TransCAD street networks. New roads or road extensions were coded by creating new links; widening projects required re-coding the number of lanes on affected links; channelization improvements entailed increasing the coded lane capacities, and passing lanes and/or roadway improvements/upgrades were reflected by increasing the average free flow speeds on affected links.

Note: Additional Information concerning the TMPO TransCAD Model Development and Calibration can be found in *Lake Tahoe Resident and Visitor Model: Model Description and Final Results*: Parsons, Brickerhoff Quade & Douglas. August 2007. Additional information concerning the TRPA Growth Assumptions can be found in the *TRPA Regional Plan Update Draft Environmental Impact Statement*; TRPA, April 25, 2012. Non-Exempt Projects - The Lake Tahoe Basin is subject to a transportation conformity analysis on specific types of projects (termed "non-exempt projects) that are included within the planning and programming documents. Exempt projects generally include projects that will not increase roadway capacity or VMT, safety improvements, maintenance of existing transit systems, such as bus replacement and the addition of bus shelters to be implemented in the Lake Tahoe Region. The following non-exempt projects have been identified for the Tahoe Region.

US50 South Shore Community Revitalization Project -Scheduled for completion in 2017 this project will realign U.S. Highway 50 near the casino corridor to improve bicycle, pedestrian and transit opportunities. The project straddles the California/Nevada Stateline area in El Dorado County and Douglas County and is proposed to reduce the existing U.S. Highway 50 to two eastbound lanes with westbound traffic redirected on Lake Parkway.

State Route 89/Fanny Bridge Community Revitalization Project – Scheduled for completion in 2018 this project addresses seasonal traffic congestion at the Tahoe City Wye in Placer County and the structural and seismic deficiencies of Fanny Bridge on the Truckee River. Fanny Bridge will be upgraded to provide improved pedestrian and bicycle safety with a new SR 89 alignment through the 64-acre United States Forest Service parcel located west of the existing State Route 89.

#### Table C TRPA Regional Plan Alternative Growth Allocation and Development Rights Accounting

# **On-Road Motor Vehicle Emissions Analysis**

The on-road mobile source emissions estimates for Mobility 2035 were produced with the EPA approved EMFAC2007 (v. 2.30 November 6, 2006) emission inventory model developed by the California Air Resources Board (ARB) for use in California. EMFAC calculates emission factors that are used as input to the activity module to produce an on-road mobile source emissions inventory. Additional analysis was completed with the updated EMFAC2011 which ARB has updated with the latest information on vehicle populations and miles traveled in California. Both models were used because EMFAC2007 is the current model accepted by EPA for purposes of conformity analysis, but it is anticipated that EPA will accept EMFAC2011 in the fall of 2012 and will use the model for conformity analysis thereafter. Both models use inputs on the types of vehicles in use, vehicle speeds, vehicle operating conditions (e.g., cold starts, hot starts, hot stabilized running etc.,) and temperature corrections (for diurnal and hot soak evaporative processes) to generate on-road vehicle emission factors. These emission factors are applied to the appropriate on-road activity data (e.g., VMT, VMT by speed class, and number of trip starts for each vehicle type and technology group) stratified by time of day (to account for diurnal ambient temperature variations) to produce a countywide on-road mobile source emissions estimate.

The emissions associated with VMT and vehicle starts are accounted for in the EMFAC models based on the distribution of these trips by vehicle classification, vehicle technology class, operating mode and activity by time of day. ARB default distributions were used for this purpose. The Emission Budget Results and On-Road Activity Data can also be found in Table D.

# California Conformity Determination

As a result of the emission results identified in Table D, the TMPO finds the proposed new transportation programs discussed in this document do not affect CO attainment nor exceed the CO budget in either Placer or El Dorado Counties for the life of this plan. For this reason, the TMPO stipulates that this plan is consistent with the California's State Implementation Plan for air quality and is therefore in full compliance with the conformity requirements of the Clean Air Act.

# Nevada Conformity

Nevada's conformity analysis differs slightly from California's in that there is no emissions budget to form a conformity determination. As mentioned previously, Carson City and Douglas Counties are working under a limited maintenance plan for CO (NDEP's Carbon Monoxide Redesignation Request and Limited Maintenance Plan which was adopted by the EPA February 2004). Areas with Limited Maintenance Plans do not need to conduct a regional emissions analysis, however the limited maintenance plans for these areas includes provisions for interagency consultation procedures should CO concentrations exceed a pre-determined "trigger." This trigger includes two verified 8-hour average concentrations in excess of 7.65 ppm (85% of the CO NAAQS) at any one monitoring site in any CO season (November through February) as the pre-violation action level. Since Mobility 2035 is working under a Limited Maintenance Plan in Nevada, it is not required to satisfy the regional emissions analysis for a given pollutant.

In March 2012, NDEP drafted another revision to Nevada SIP for Carbon Monoxide titled 2012 Revision to the Nevada State Implementation Plan for Carbon Monoxide; Updated Maintenance Plan for the Nevada side of the Lake Tahoe Basin, NDEP 2012. Under the transportation conformity rule, EPA guidance asserts that in limited maintenance plan areas, emissions budgets may be treated as not constraining because the area is unlikely to grow enough that a violation of the NAAQS would occur and that emissions need not be capped for the maintenance period.

Public Notice

Tahoe Metropolitan Planning Organization \_

# NOTICE OF 30-DAY PUBLIC COMMENT PERIOD

# DRAFT

# **2017 FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM**

The Tahoe Metropolitan Planning Organization announces a 30-day public comment period for the Draft 2017 Federal Transportation Improvement Program (FTIP). The public comment period commences on July 11, 2016 and closes on August 12, 2016. There will be an opportunity for public comment on July 22, 2016 at the scheduled Tahoe Transportation Commission Board meeting.

The FTIP document is available upon request or can be accessed online at:

http://www.tahoempo.org

Submit comments to:

Tahoe Metropolitan Planning Organization Attn: Judy Weber, Transportation Planner P.O. Box 5310 Stateline, NV 89449

Or email: jweber@trpa.org

The 2017 FTIP is a four-year program of surface transportation projects for the Tahoe Region that is consistent with the Lake Tahoe Regional Transportation Plan and related local, state and federal planning processes. This document has been prepared and is being circulated as required by the United States Department of Transportation's metropolitan planning regulations 23 Code of Federal Regulations Part 450.

Please direct any questions regarding this notice to Judy Weber at <u>iweber@trpa.org</u> or 775-589-5203.

# Appendix J

# FTIP Checklist and Development Guidance

# 2017 Federal Transportation Improvement Program (FTIP) Checklist for Caltrans FTIP Coordinator

### I. <u>Timeline:</u>

Ensure each Metropolitan Planning Organization (MPO) submits the following items to Caltrans:

- The *Draft* 2017 FTIP at the start of the FTIP public review period but not later than **September 1**, 2016.
- Three copies of the *Final* 2017 FTIP, along with any amendments and administrative modifications to the 2017 FTIP by **September 30, 2016**.
- Web-link to the Final 2017 FTIP and amendments by September 30, 2016.

### II. FTIP Package Submittal:

Verify the FTIP package includes the following:

Project Listings

- Projects that are Transportation Control Measures (TCMs) are identified
- Detailed listings for highway and transit grouped projects (back-up listings)

Signed board resolution that addresses the following:

- Consistency with the metropolitan transportation planning regulations per Title 23 Code of Federal Regulations Part 450
- Consistency with the Regional Transportation Plan (RTP) \_\_\_\_ (e.g. 2030)
- Financial constraint the enclosed financial summary affirms availability of funding
- Meets Air Quality Conformity
- Does not interfere with the timely implementation of the TCMs contained in the State Implementation Plan (SIP)
- Completion of the public participation process in accordance with the MPO's Public Participation Plan (PPP)

Project listings included in the Final 2017 FTIP are available in the California Transportation
 Improvement Program System (CTIPS)

□ Financial Summary

• Includes financial information covering the first four years of the FTIP

• Excel file submitted electronically (Template is posted at <u>http://www.dot.ca.gov/hq/transprog/oftmp.htm</u>)

Air quality conformity analysis and determination

□ PPP/Interagency Consultation

- Expedited Project Selection Procedures (EPSP) documentation
- Three copies of the Final 2017 FTIP mailed to:

California Department of Transportation Office of Federal Transportation Management Program, MS 82 P.O. Box 942874 Sacramento, CA 94274-0001 Attention: Muhaned Aljabiry

# 2017 Federal Transportation Improvement Program (FTIP) Development Guidance

This guidance is <u>not</u> intended to supersede federal regulations. FTIPs must comply with all applicable metropolitan transportation planning regulations per Title 23 Code of Federal Regulations Part 450.

# I. Update to the California State Statutes

### Government Code 65074

Caltrans is required by state statute to submit the Federal Statewide Transportation Improvement Program (FSTIP) to Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) by December 1 of each even-numbered year.

### Streets and Highways Codes 18.6 and 182.7

MPOs are required to submit FTIPs to Caltrans by October 1 of each even-numbered year.

### II. Timeline

- a) Submit two copies of the draft 2017 FTIP to Caltrans at the <u>start of the public review</u> period, but not later than September 1, 2016. Except for the signed board resolution, all items listed in the 2017 FTIP Checklist must be included.
- b) Submit the final FTIP to Caltrans by September 30, 2016. Note: Only FTIPs received by the deadline will be included in the draft 2017 FSTIP to FHWA/FTA. Caltrans will not process late FTIPs until after the approval of the 2017 FSTIP, which is expected on 12/16/2016. These FTIPs will be posted separately for 14-days to comply with the FSTIP's Public Participation Plan (PPP).

## Amendments and/or administrative modifications

Any amendment and/or administrative modification to the board-adopted FTIP received before September 30, 2016, will be included as part of the draft 2017 FSTIP. Note: MPOs with delegated authority from Caltrans may only approve administrative modifications to the 2017 FTIP, and not to the 2017 FSTIP during this time. Amendments and/or administrative modifications not received by September 30, 2016, will be processed after the 2017 FSTIP is approved.

## III. Maintenance and Operations Costs

Include in the FTIP's financial plan an analysis of revenues dedicated for maintaining and operating the federal-aid system, including the basis for calculation. Address any anticipated shortfall in available revenues and describe plans to deal with the gap.

# IV. Satisfying Public participation requirement for development of the Program of Projects (POP) for FTA 5307 Program through FTIP Development

The FTIP's public involvement process can be used to satisfy the public participation requirement for the development of the POP for the FTA 5307 program. In such case, the transit recipient shall coordinate with the MPO, and ensure the public knows that it is using the public participation plan associated with FTIP to satisfy the public hearing requirements for the POP. MPO must ensure that the FTIP explicitly states that public involvement activities and time established for public review and comment for the FTIP will satisfy the POP requirements of the FTA 5307 Program.

# V. Project Listings

- a) Verify planning studies (non-transportation capital) are included in the Overall Work Program. They do not need to be listed in the FTIP.
- b) Program funding for each phase of a project in the year of obligation (E-76).

c) Include Grouped Project Listing: See the guidance for grouping projects in air quality nonattainment or maintenance areas for further information, located here: <a href="http://www.dot.ca.gov/hq/transprog/federal/fedfiles/res\_publications/grouped\_pit\_listings.pdf">http://www.dot.ca.gov/hq/transprog/federal/fedfiles/res\_publications/grouped\_pit\_listings.pdf</a>

For MPO areas and Rural non-MPO counties that are classified as air quality attainment (SBCAG, AMBAG, and Shasta), refer to 23CFR771.117 (c) and (d) for additional information on projects that can be classified as "Categorical Exception (CE)." For those areas, projects that are not considered regionally significant and qualify as CE may be grouped together. MPOs are responsible for determining if projects are eligible for inclusion in the grouped project listing. Note: FTA-funded projects can be grouped, provided the detailed project list is made available to FTA and the public. The detailed project list must be included in the FTIP (and in the FTIP amendment) when it is circulated for public review.

- d) Include projects in the FSTIP that need environmental approval, even if no funds are identified within the four years of the FTIP. Reference the Regional Transportation Plan (RTP), the project completion date, and add the following language to the project description:
  - 1) "Project included in the FTIP for environmental approval."
- e) Provide the following information for each project:
  - 1) Sufficient description (i.e., type of work, termini, and length) to identify the project. (See the section below for more information.)
  - 2) Total project cost based on the latest estimates which may extend beyond the four years of the FTIP. Cost estimates must use an inflation rate to reflect the "year of expenditure dollars" based on reasonable financial principals and assumptions, and be included in the financial plan. Projects in air quality nonattainment and maintenance areas can be included in the first two years of the FTIP and FSTIP only if funds are "available" or "committed."
  - 3) The amount of federal funds proposed to be obligated during each program year (for the first year, this includes the proposed category of federal funds

and source(s) of non-federal funds. For the second, third, and fourth years, this includes the likely category or possible categories of federal funds and source(s) of non-federal funds).

- 4) Required non-federal matching funds.
- 5) Implementing agency.
- 6) Corresponding RTP number or RTP page number. MPOs that use CTIPS to develop their FTIPs may use the "Project Title, Location & Description" field or the "MPO Comments" field to include the RTP information.

## Highway Projects (State Highways/Local Roads) Description Format

Description Forr	nula: [(Location :) + (Limits) + (;) + (Improvement)]
Location:	<ul> <li>The nearest city or significant town illustrated on state highway maps. If the project is located more than five miles away from the city or town, then prefix the city name with "East, West, North, or South of."</li> <li>f) In Bakersfield:</li> <li>g) South of Bakersfield</li> </ul>
Limits:	<ul> <li>Project limits can be stated as from one road to another. Other boundary landmarks, such as rivers, creeks, state parks, freeway overcrossings, can be used in-lieu of streets or roads.</li> <li>h) Between 1<sup>st</sup> Street and Pine Boulevard;</li> <li>i) North of Avenal Creed to South of Route 33;</li> <li>j) At Rock Creek Bridge;</li> </ul>
Improvement:	<ul> <li>Describes the work to be done. Include significant components of the improvement (in particular those that relate to air quality conformity).</li> <li>Rehabilitate roadway.</li> <li>Convert 4-lane expressway to 6-lane freeway with 2 HOV lanes.</li> <li>Construct left turn lane.</li> </ul>
Example: In Bak	ersfield: Between 1 <sup>st</sup> Street and Pine Boulevard; rehabilitate roadway.

#### **Transit Project Description Format**

Description Form	Description Formula: [(Location :) + (Limits) + (;) + (Improvement)]		
Location:	<ul> <li>For work at spot locations for large (statewide) transit agencies:</li> <li>The nearest city or significant town illustrated on state highway maps. If</li> <li>the project is located more than five miles away from the city or town, then</li> <li>prefix the city name with "East, West, North, or South of."</li> <li>k) In Bakersfield:</li> <li>l) North of Bakersfield:</li> <li>Otherwise: Skip this step.</li> </ul>		
Limits:	For work at spot locations (all agencies):		

Name of the station, description of facility, name the rail corridor for the	
project etc.	
m) Lafayette BART Station;	
n) The Daly City Yard, adjacent to the Coloma Station;	
o) San Joaquin Corridor;	
Otherwise: Skip this step.	
Describes the work to be done. Include significant components of the	
mprovement (in particular those that relate to air quality conformity.	
Construct a station.	
Construct a child care facility.	
<ul> <li>Track and signal improvements.</li> </ul>	
Projects that apply to entire transit agency jurisdiction – describe activity	
• Purchase of 59 buses 12 MCI's and 47 Standard 40 ft buses (note if	
expansion or replacement).	
• Para-transit van leasing.	
Operating assistance for Sacramento Regional Transit.	
th of Bakersfield: San Joaquin Corridor – Track and signal improvements.	
ayette BART Station; construct a child care facility.	
erating assistance for Sacramento Regional Transit.	

# VI. Use of Toll Credits

Federal-aid highway projects typically require sponsors to provide non-federal funds as match to federal funds. However, at the MPO's discretion, a project may be funded without the required non-federal match using Toll Credit (TC) provisions. The non-federal share match requirement can be met by applying an equal amount of TCs and therefore *allow a project to be funded at 100% federal* for federally participating costs. TCs can be used for the four-year duration of the 2017 FTIPs for state and local highway and for transit projects. Note: The use of TCs does not generate additional federal funding and is limited to the non-federal match required for the federal apportionments available in any given year.

AC
PP AC
or NHS
ble
ral funds
CMAQ,
<b>'</b> )
ole
ral funds
CMAQ,
<b>'</b> )
Q,RSTP
ous

Toll Credits may be used for the following programs:

\* Notate in the FTIP the "Use of TCs" in the project description for CMAQ and RSTP-funded projects.

Note: TCs shall not be used if the non-federal matching requirement has already been met with other non-federal funds

# VII. 2016 State Transportation Improvement Program (STIP)

The total project cost and all funding, including non-STIP funding, must be shown in the FTIP. (Note: If a phase is programmed outside of the 2017 FSTIP period, then the total project cost can be shown in the MPO comment section or in the project description field in CTIPS). When a STIP project is transferred from the STIP into the FTIP in CTIPS though the "CTIPS Transfer Mechanism," right of way support and construction support costs will be added to the corresponding capital costs. Ensure projects are programmed using the appropriate "STIP-RIP/IIP" fund type. Projects with the construction cost (excluding support costs) and/or the right of way cost (excluding support costs) greater than \$1 million are eligible to receive TCs. TCs shall not be used if the non-federal matching requirement has already been met with other non-federal funds (e.g. Proposition 1B, local funds).

MPOs may choose one of the following options for programming STIP projects:

- a) **<u>Recommended Option</u>**: Use the California Transportation Commission (CTC) adopted 2016 STIP.
- b) Use CTC staff recommendations.
- c) Use the county and interregional shares information from the Revised 2016 STIP Fund Estimate (FE). <u>http://www.dot.ca.gov/hq/transprog/ctcbooks/2016/0116/Yellow\_Items/Tab18</u> <u>4.17.pdf</u>

Note: For the first three years of the 2017 FTIP, program only existing projects from the 2014 STIP that are to be re-programmed in the 2016 STIP. Program new STIP projects, if any, in the fourth year of the 2017 FTIP. The total programmed STIP funding in 2017 FTIP must be constrained to the available STIP targets for the region per FE.

d) Program only existing projects from the 2014 STIP that are to be re-programmed in the 2016 STIP.

Note: Options b, c, and d, will require the MPO to process an amendment to align the FTIP with the 2016 STIP once the CTC adopts the 2016 STIP. The FTIP amendment must be submitted to Caltrans by **September 30, 2016**.

Timeline:

- ✓ April 22, 2016 CTC staff recommendations for the 2016 STIP projects are expected to be released.
- ✓ May 18, 2016 CTC adoption of the 2016 STIP.
- ✓ June 2016 The 2016 STIP will be available in CTIPS for transfer into the FTIPs.

Projects that are eligible to receive TCs, STIP – IIP or RIP funding portion of the project (including all support and capital costs) must be programmed with 100% "STIP-AC" fund type.

Any non-STIP project funding (e.g. Proposition 1B, local funds) must be programmed consistent with the STIP funding details in CTIPS.

	Edit Fund Type	Browse All Funds

#### VIII. 2016 State Highway Operation and Protection Program (SHOPP)

For non-attainment areas, projects that are not exempt from air quality conformity determination must be listed individually in the FTIP. For attainment areas, projects that are not classified as Categorical Exclusion (CE) must be listed individually in the FTIP.

- Program all projects with 100% "SHOPP AC" fund type using TCs.
- Verify in the financial summary that the total revenue is equal to the total programmed.

Note: MPOs are responsible for determining if a project can be classified as non-exempt or CE. Contact the District FTIP Coordinators if more information, such as a detailed project scope, is needed to make that determination.

Timeline:

- ✓ January 31, 2016 Caltrans to submit proposed 2016 SHOPP to the CTC.
- ✓ March 2016 CTC adoption of the 2016 SHOPP.
- ✓ July 1, 2016 The 2016 SHOPP will be available in CTIPS for transfer into the FTIPs.

# TMPO Board Resolution Adopting 2017 FTIP

#### TAHOE METROPOLITAN PLANNING ORGANIZATION TMPO RESOLUTION NO. 2016 - 05

#### ADOPTION OF THE 2017-2020 FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM FOR THE LAKE TAHOE REGION

WHEREAS, The Tahoe Metropolitan Planning Organization (TMPO) is the designated planning organization for the Lake Tahoe Region as defined by the Transportation Equity Act for the 21<sup>st</sup> Century; and

WHEREAS, the 2017 TMPO Federal Transportation Improvement Program (FTIP) has been developed in accordance with Fixing America's Surface Transportation Act (FAST); and

WHEREAS, the Federal Clean Air Act Amendments require that no department, agency, or instrumentality of the Federal Government shall engage in, support in any way or provide financial assistance for, license or permit, or approve an activity which does not conform to an implementation plan approved or promulgated under Section 110; and

WHEREAS, no metropolitan planning organization designated under Title 23 of the U.S. Code shall give its approval to any project, program or plan which does not conform to an implementation plan approved or promulgated under Section 110; and

WHEREAS, the 2017 FTIP meets all applicable transportation planning requirements per Title 23 CFR Part 450; and

WHEREAS, the assurance of conformity to an implementation plan is the affirmative responsibility of the Tahoe Metropolitan Planning Organization; and

WHEREAS, the 2012 Regional Transportation Plan (RTP) for the Lake Tahoe Region describes a transportation system envisioned for the horizon years and was adopted as a financially constrained plan by the TMPO Board on December 12, 2012; and

WHEREAS, the 2017 FTIP is consistent with the transportation system and financial plan described in the 2012 RTP; and

WHEREAS, the 2017 FTIP meets Air Quality Conformity requirements; and

WHEREAS, the 2017 FTIP is financially constrained by year and includes a financial plan that demonstrates which projects can be implemented using committed funds; and

WHEREAS, the 2017 FTIP includes all regionally significant transportation projects to be funded from local, state or federal resources; and

WHEREAS, the 2017 FTIP has been developed under TMPO policies for community input and interagency consultation procedures; and

WHEREAS, the 2017 FTIP does not interfere with the timely implementation of the Transportation Control Measures contained in the State Implementation Plan.

NOW, THEREFORE, BE IT RESOLVED, that the Governing Board of the Tahoe Metropolitan Planning Organization adopts this resolution approving the 2017 Federal Transportation Improvement Program for the Lake Tahoe Region.

BE IT FURTHER RESOLVED, that TMPO staff is hereby directed and authorized to work with Caltrans, the Nevada Department of Transportation, the Federal Highway Administration, the Federal Transit Administration and the Environmental Protection Agency to make whatever technical changes or corrections are needed to the format and organization of the document to obtain its approval by these agencies.

BE IT FURTHER RESOLVED, that the TMPO Board authorizes staff to administratively amend the 2017 FTIP as outlined in the Public Input and Project Selection Procedures outlined in the 2017 FTIP.

PASSED AND ADOPTED by the Governing Board of the Tahoe Metropolitan Planning Organization at its regular meeting held on September 28, 2016, by the following vote:

Ayes: Mr. Beyer, Ms. Berkbigler, Mr. Bruce, Mr. Cashman, Ms. Cegavske, Mr. Lawrence, Ms. McDermid, Ms. Novasel, Mr. Sass, Mr. Shute, Mr. Plemel Mr. Yeates

Absent: Ms. Faustinos, Mr. Sevison

Change Bey \_\_\_\_

Casey Beyer, Chair TMPO Governing Board

Public Comments and Responses

# PUBLIC COMMENTS AND RESPONSES

Date	Provided By	Public Comment	Response
7/12/2016	Pam Brunnmeier, Caltrans	Please see attached for my comments. I am also attaching current CTIPS 2016 STIP and 2016 SHOPP project printouts FYI. Thanks for the opportunity to review. Is this for 03-3F530, PPNO 3304, EFIS ID 0313000135? If so, the project was revised 6/29/16 for a cost increase, and total cost is now \$10,645k in the 17/18 FY.	Yes, cost revision made to the o3-3F530 SHOPP project. See Appendix D page 18 of 19 and Appendix E page 1.
7/20/2016	Joseph Spencer, NDOT	For the 2017 draft I will need to make a change to WA20160053. State Gas Tax - Decrease funds in FFY 17 in CON from \$8,223,511 to \$5,723,511 Total project cost decreased from \$25,500,000 to \$23,000,000. Per TMPO breakout Local funds: local \$9,050,000 - FLAP \$8,227,000.	Funding changes made. See Appendix D page 17 of 19.
8/2/2016	Abhijit Bagde, Caltrans	Thank you very much for providing us an opportunity to review TMPO's Draft 2017 FTIP. My compliments to you for preparing an excellent document. Please include response to the comments below when submitting final 2017 FTIP to Caltrans. Financial Summary: 1. 2016 STIP: Include the RIP revenue from the AB3090 Replacement Projects (EAs – oC9301, oC931) as shown below. Project Listings: 1. CTIPS Id: 220-0000-0130: Since this is a grouped project listing, and detailed project listing is included; please remove the reference to the project from the project description.	Revisions made. Financial Summary: 1. See Appendix A page 1 of 5. Project Listings: 1. See Appendix D page 19 of 19.
8/12/16	Abhijit Bagde, Caltrans	Additional Comment: Satisfying Public participation requirement for development of the Program of Projects (POP) for FTA 5307 Program through FTIP Development: Please clarify and note in the FTIP if public involvement process for the FTIP is intended to satisfy the POP requirements of the FTA 5307 Program.	Comment noted. The public participation statement for the FTA 5307 program is found on page 13 of document.

		some questions:	
		TRPA/TMPO Governing Board	
		Executive Summary	
		Regional Snapshot	
		My comments and suggestions on the	
		following sections are in rewrite format and	
		are intended to improve accuracy and	
		understanding:	
		Section 3: Transportation Planning Structure	
		3.1. Tahoe Regional Planning Agency,	
		3.2 Tahoe Metropolitan Planning	
		Organization	
		3.3 Regional Transportation Planning Agency	
		(California Only)	
		3.5 Tahoe Transportation Commission	
		3.6 Tahoe Transportation District	
		Section 4: Consistency with Plans and State	
		and Federal Programming	
		Under 4.1 Lake Tahoe Regional Plan	
		4.4 Public Participation Plan
